Issue #299

April Food's Day - Again!

Pat Thibodeau, Associate Dean for Library Services

This is no joke! Food and beverages are now allowed on all levels of the Library. Last year's April Food's Day offering of a food-friendly area in the Library was so successful that we are expanding the policy to include almost all areas of the Library. While the Library has not been able to find a vendor yet for the "MCL Cyber Café" on the entrance level, snack and coffee machines will be installed in the café in early April.

Two exceptions to this policy are the History of Medicine area and the Medical Library Electronic Center classroom, where food is allowed ONLY during special events approved by Library Administration.

Here are a few guidelines that have allowed us to expand this food and beverage policy, and we need YOUR HELP to continue to be successful:

- ☉ Please throw out all bottles, wrappers and other containers in the trashcans around the library. Do not leave items on shelves, study tables, and carrel tops since they attract bugs
- ☉ Report spills found in any area of the Library right away so we can have them cleaned up.
- ☉ If you have a spill, please report it to the Library Service Desk or ask for some paper towels to clean it up.
- ☉ Be considerate of others in terms of messy or smelly foods. Not everyone loves garlic or popcorn.
- ☉ Bring food for yourself and not for a crowd. Groups are welcome to gather together for a "brown bag study session," but bringing in a buffet meal is inappropriate.
- ☉ Plan to bring your food with you. Deliveries will be turned away by Library staff.
- ☉ Leave food trays in the cafeteria and use "to go" boxes and bags.

Everyone has been great about following these guidelines! By playing by the rules and not "fooling around," you have enabled us to radically change our policy.

E-Journals: Crazyer than Ever!

Pat Thibodeau, Associate Dean for Library Services

Publishers have discovered that scientists and the general public want current access to research information, and many are now offering earlier access to journal articles. As a result, the e-journal world is now even crazier for you and for the Library. Here are just a few of the permutations that we have to contend with.

- Journal A releases cutting-edge research articles immediately but not others
- Journal B has a 6-month embargo before anything is freely available
- Journal C has a 12-month waiting period
- Journal D has a 12-month waiting period UNLESS the author pays an additional fee
- Journal E is freely available from the beginning
- Journal F allows authors to post manuscripts with all final edits on their own or institutional Websites for free access, but the publishers' versions are only available through subscription

New variations on "open access" initiatives are being announced almost every week! The proposal from the National Institutes of Health (NIH) has added yet another variation, since articles generated by NIH-funded research may be deposited in PubMedCentral as part of the NIH Public Access policy (<http://grants.nih.gov/grants/guide/notice-files/NOT-OD-05-022.html>). The hope is that most authors will choose immediate deposit or access at least within 12 months of publication. This is not just a publisher's policy; authors now have the right to make this decision. When signing a publisher's agreement for your articles, remember to ask for the right to deposit them in PubMed Central and stipulate that you want them published immediately, or within 6 or 12 months, at the very least.

There are other rights the author may want to ask for as well. The Association of Research Libraries has created an excellent "author's addendum" at <http://www.arl.org/sparc/author/addendum.html> to provide information about contract language, as well as retaining rights as an author.

One way the Library has been helping to sort out this craziness is by tracking free open access journals, also available through PubMed, and posting them on our e-journals page. Judy Woodburn, Head, Journals Department, has also been adding annotations to our e-journal list when titles are not immediately available. The National Library of Medicine is now helping us manage all the variations through PubMed by keeping track of when an article is freely available, including the individual articles that will be in PubMed Central, and adding icons to indicate when something is free. A new service will allow our Library to combine the open access titles and our subscription titles with very little effort.

Publishing policies will get more complex, but we hope some of the services that we have added will make the ever-changing e-journal world less frustrating!

Farewell to Ovid MEDLINE

The time has come to say goodbye to the commercial version of MEDLINE offered by Ovid. A fuller, more up-to-date version of MEDLINE has been available through PubMed for some time now, and recently some new features have been added to the search interface (see page 3). We can no longer justify spending about \$10,000 to \$15,000 to support the Ovid version of MEDLINE when PubMed is freely available.

As of July 1, 2005, the Medical Center Library will be switching exclusively to PubMed for MEDLINE. To help everyone make the transition, staff will be creating educational materials and conducting training sessions. If you have particular concerns or questions, please contact the Library Service Desk at (919) 660-1100.

PubMed Enhancements

Connie Schardt, Education Coordinator, Information and Education Services

PubMed, the search interface developed by the National Library of Medicine (NLM) and the National Center for Biotechnology Information (NCBI), provides free access to MEDLINE and additional life science journal citations. Over the past year, PubMed has implemented several enhancements to its system.

My NCBI (formerly known as “Cubby”)

The new My NCBI account allows the user to store search strategies and schedule *automatic updates* for new records added to the database. Updates are sent via email and can include abstracts with links to the full text articles, if the journals are available at Duke. This is an excellent way to be alerted to newly published articles on specific topics.

The *save search* feature allows users to save a final search statement after developing a search strategy. Set numbers and Boolean logic (AND, OR, NOT) will be properly translated into the terms used so it can be saved by the system. Ovid users: Please note that PubMed will not save your entire search history, but enough of the strategy will be saved to duplicate the results. Users also have the option to manually run saved searches at any time from the My NCBI Saved Searches list.

My NCBI also allows users to customize up to five *search filters* that can automatically organize and limit search results. Examples of useful filters are “dukemlib” (limits retrieval to articles available from Duke in either electronic or paper format); “Core Clinical Journals” (limits retrieval to 120 English language, primary clinical journals); “Therapy/Narrow” (limits retrieval to the Clinical Query for therapy/specific); and “Age Groups.” PubMed will display the number of citations in the database for the search statements, as well as the number of citations limited by each of the filters. This gives users the option to quickly review all articles or just those limited to specific filters. The filter limits will show up as separate tabs at the top of the search results display screen.

To activate the customized features of My NCBI, users will need to sign in with a user name and password. This can be initiated before starting the search or at any time during the search. To “Register” (new users) or “Sign In” for My NCBI, use the link in the top right corner of the PubMed page (<http://www.mclibrary.duke.edu/pubmed>). User names and passwords that were active with the Cubby should work with the new My NCBI.

LinkOut

The LinkOut feature is designed to provide users with links from PubMed citations to full-text articles, as well as a wide variety of relevant Web-accessible online resources, including information from biological and chemical databases, consumer health information, research tools, and more. To link directly to the full-text of an article, use the blue *DUMCL Online* button  above the abstract. The *DUMCL Stacks* button  indicates that the article is available in the Library. Clicking on *Links*, located to the far right of a citation, will open a short menu with several options. Chose the *Linkout* option for additional material that may be useful.

The Library will be holding several PubMed classes on a weekly basis in April, May, and June. For a full list of dates and times, see page 4. If you have any questions about PubMed features, please call (919) 660-1100 or send email to mclref@mc.duke.edu.

TOUGH Decisions

This column focuses on tough decisions we are making while trying to maintain our budget and cope with increasing costs. E-journals have been the primary focus in past columns, but we are now facing similar situations with books.

Issue: Electronic books have always been more expensive than print, but we are seeing much higher prices for new print editions of classic textbooks as well. With costs ranging from \$300 to \$600 per multi-volume set, we are beginning to question the value. Also, several classic texts on similar subjects were published this year. Often texts alternate years or come out every 2 to 3 years, but this year's pattern has had an additional impact on our limited book funds.

Burns, Tony et al. "Rook's Textbook of Dermatology" (4 volume set): 2004. List Price: \$695.00

Cummings, Charles W. et al. "Cummings Otolaryngology - Head and Neck Surgery Edition" (4 volume set with continually updated online reference): 2005. List Price: \$699.00

DeVita, Vincent T. et al. "Cancer: Principles & Practice of Oncology" (2 volume set with CD-ROM): 2005. List Price: \$325.00

Harris, Edward D. et al. "Kelley's Textbook of Rheumatology": 2004. List Price: \$299.00

Koopman, William J., and Moreland, Larry W. "Arthritis & Allied Conditions: A Textbook of Rheumatology" (2 volume set): 2004. List Price: \$359.00

Mandell, Gerald L. et al. "Principles and Practice of Infectious Diseases" (2 volume set): 2004. List Price: \$299.00

Miller, Neil R. et al. "Walsh & Hoyt's Clinical Neuro-Ophthalmology" (3 volume set): 2005. List Price: \$699.00

Shields, Thomas W. et al. "General Thoracic Surgery" (2 volume set): 2004. List Price: \$299.00

Decision: While we have chosen to continue to purchase this core and authoritative sets of books, we have also come to terms with the fact that every \$600 set means 3 or 4 books we cannot purchase. Since we can no longer afford duplicate copies, core textbooks will be kept "on reserve" in our Reference Area and will only be available for use in the Library.

Attention: Ovid Searchers!

Your Ovid MEDLINE saved searches and autoalerts will not work after June 30, 2005.

If you have a stored search or autoalert in Ovid MEDLINE and you need assistance, please contact **Megan von Isenburg** at (919) 660-1131 or vonis001@mc.duke.edu.

Schedule of PubMed Classes

8:00 - 9:00 am

April: 6, 13, 27

May: 4, 11, 25

June: 1, 8, 15, 22, 29

Noon - 1:00 pm

April: 5, 12, 26

May: 3, 10, 24, 31

June: 7, 14, 21, 28

5:00 - 6:00 pm

April: 7, 14, 28

May: 5, 12, 26

June: 2, 9, 16, 23, 30

Library Advisory Committee

The **Medical Center Library Advisory Committee** advises the Associate Dean on policy issues, based on constituencies.

Staff News

Barbara Busse, Reference Assistant, History of Medicine Collections, attended the Southern Association for the History of Medicine and Science conference in Augusta, Georgia in February, 2005.

Meladie Capers-Adams accepted a Library Assistant position in Access Services in January, 2005. She had worked as a temporary employee since August. Meladie is presently enrolled in the nursing program at Durham Technical Community College.

Artura Goods, Senior Library Assistant, left the Medical Center Library in December, 2004, to pursue other opportunities. Artura, a Duke graduate, had worked at the Library since 1996.

Lana Michelizzi, Access Services Manager since 2002, accepted an information specialist position at a Raleigh pharmaceutical company in February, 2005.

Connie Schardt, Education Coordinator, has been elected to the Board of Directors of the Medical Library Association for a three-year term, beginning in May 2005.

Connie Schardt will be teaching "EBM and Study Design" to the Metropolitan Detroit Medical Library Group on April 4, 2005.

Patricia L. Thibodeau, Associate Dean, has received a President's Award from the Medical Library Association. The award recognizes and supports the valuable contributions Pat has made to the health sciences librarianship profession, especially her advocacy work in the area of scholarly publishing.

Introducing Karen Grigg

Maurice Reece, Access Services

Karen Grigg joined the Medical Center Library staff in October, 2004, as the Head of Collection Development and Electronic Resources. She replaces Mary Ann Brown who retired last June.

Karen describes her new job as a "work in progress," because the way the modern library functions has been changed by new trends and technology, bringing new twists to the job of collection development.

Her work will involve more than just adding to and updating the book collection, which will now be handled by Karen as part of a special committee charged with selecting books and monographs. She will be increasingly involved in negotiating contracts and licenses for electronic (non-journal) resources and databases.

Karen comes to Duke from the North Carolina State University (NCSU) Libraries, where she had worked as a Life Science Reference Librarian. She also spent two years serving as the Textile and Engineering Services Librarian. Before coming to NCSU, she worked as a special librarian and Web designer on a Lockheed-Martin project for the EPA in the Research Triangle Park.

A native of Norfolk, VA, Karen received a BA in English literature from Old Dominion University in 1990 and a Master's in Library Science degree from UNC-Chapel Hill in 1998. She also did graduate work at the University of Montana and Montana State.

Library Educational Offerings
