February 16, 1984

VISIT YOUR ALMA MATER WITHOUT LEAVING DUKE

This feat is easily accomplished by the approximately one-third of Duke medical students who were Duke undergraduates. The other two-thirds, however, may take advantage of the fine details of Duke architecture to reminisce about their home schools. Placed along the sides of the Union Building above the sidewalk cluster, and from there all the way around the building, are the seals of many prominent colleges and universities.

One might imagine that Mr. Duke himself chose the emblems, however, two of his four supported schools - Duke, Davidson, Furman, and Johnson C. Smith are missing from the roster. Thanks go to the Duke University Archives for providing the following list of college seals:

Union Building: Northern elevation - University of Virginia, University of North Carolina, Wofford College, Furman University, Randolph-Macon College, Wake Forest College, Davidson College, Vanderbilt University, Washington and Lee University, Emory and Henry College, University of the South, City of Durham Seal, Seal of the State of North Carolina, University of Texas.

Western elevation - Guilford College, Columbia University, The United States Naval Academy, Cornell University, The Johns Hopkins University, University of Chicago, University of Wisconsin, University of Michigan, Leland Stanford University.

Southern elevation - Haverford College, Millsaps College.

Eastern elevation - L'Universite de Geneve, L'Universite de Louvain, University of Oxford, University of Cambridge, University of Paris, Harvard University, Yale University, Princeton University, Dartmouth College, University of Pennsylvania.

Kilgo Quadrangle: On bay window of small tower facing west are the shields of Emory University, Tulane University, Clemson College, and the College of William and Mary.

DAVISON DUES TO INCREASE

Davison Society dues, after having remained at \$15 per year for the last 14 years, will increase to \$25 per year beginning with the 1984 fall semester. The increase will bring approximately \$4800 more into the Davison treasury next year. This should allow for, among other things, an expanded social budget.

As has been noted before, the \$15 charge for Davison dues that was on this semester's bills was an error. All medical students' accounts have been credited to correct this mistake.

REGISTRATION NEWS

Upcoming third and fourth year students must register for summer 1984 courses March 13-14, Tuesday and Wednesday. The new elective course booklet is available in the Registrar's Office for those students who have not yet picked theirs up.

PART-TIME EMPLOYMENT OPPORTUNITIES

The Central Laboratory Collection Service (CLCS) needs early morning and weekend phlebotomists. Third year students are encouraged to call 684-2901, Ms. Margaret Pollard, CLCS Supervisor, to inquire about these positions. CLCS is particularly interested in those students remaining on campus throughout the summer months. All phlebotomists must meet the requirements of DUMC Phlebotomy Certification to be eligible. Ms. Pollard will inform applicants of the procedure to arrange an evaluation toward Certification.

MAKE PLANS NOW

In an official replay of last week's controversial inner-tube water polo overtime game, goalie Andy "Squid" Saltzman starred by stopping four of five free shots on goal to win the shootout for the Tube Steaks. His stellar play continued in the nightcap, in which Paul "Aquaman" Sperduto demonstrated his typical evening quickness by scoring 15 times in a 17-7 romp over the highly regarded business school. Once again, opposing players were harassed by Dave "The Hammer" Loback and his defensive crew - Steve "Yank" Mawhooter and Bucky "Bucky" McNeill. The high offensive output was attributed to the absence of Mike "Tank" McNamara. Also outstanding were Dean "Be Cool" Taylor and "Will he show up?" Flanagan. Make plans now to come out and see the undefeated Med School Tube Steaks.

You're learning everything about your profession...except how to plan it.

After years of studying and training, you'll be prepared to provide professional service and care. But what about managing a profitable practice...does your curriculum also include the principles of business management and financial planning?

That's where MAPS comes in. MAPS is the Mutual Association for Professional Services — a non-profit membership organization dedicated to solving the diverse administrative and economic problems of students and practicing professionals in the health care, legal and accounting fields.

MAPS representatives offer personalized solutions to the problems you encounter — providing the specialized resources and planning expertise that will help you now and throughout your professional career. From confidential loans and insurance programs to medical jackets and equipment leasing to name just a few.

All from one convenient source...to save you time and money.

For more information on MAPS, contact your local service office...and make sure your career begins the way it should...professionally.
