Meet the Class of 2013...

Please help us welcome our new class of interns. We are excited to have them join the Duke Med-Peds family in July 2009.

Carolyn Avery, MD, MHS, was born in Boston, Massachusetts. She completed her undergraduate, medical school and masters studies at Yale University. During medical school, she was a recipient of a Doris Duke Clinical Research Fellowship. Her research focused on human metapneumovirus in mothers and infants. Carolyn enjoys sports (a possible recruit for Turkey Bowl) and making chocolate truffles (an item for pot-luck...).

Carolyn Avery

Joel Boggan, MD, MPH, was born in Louisville, Kentucky. He completed his undergraduate degree in biology at Emory University,

and after a year studying international studies in Scotland, he started Duke Medical School. During his medical school training, Joel also obtained his MPH from the UNC School of Public Health. In addition, Joel traveled to Haiti with Family Health Ministries and participated in research projects focusing on nutrition and growth patterns in rural Haitian communities. Joel enjoys Duke basketball, back-packing, camping, and traveling.

Joel Boggan

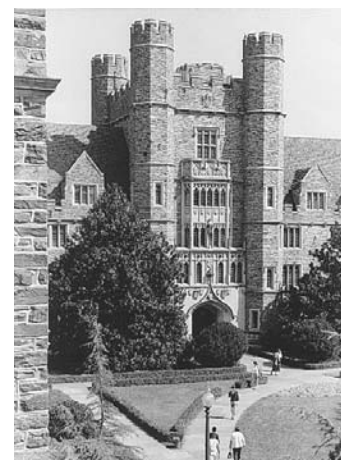

Stephen Dolgner, MD, originated from Elizabethton, Tennessee. He did his undergraduate education at the University of Tennessee with a double major in biology and biochemistry. He subsequently came to Duke for medical school and was an active spokesperson in the

medical school in medical education, information technology, facilities development, and admissions. In his free time, you will find Steve playing soccer, running, or cheering on collegiate football and basketball.

In this issue:

- Class of 2013
- Duke Alumni Announcements
- Residency Updates
- Section Updates
- Congratulations!

Greetings from Section Chief and Program Director

Welcome to the first issue of the Duke Med-Peds Newsletter. We have established this publication to improve communication with our alumni and to strengthen the community ties between our current trainees and former trainees. The goal of this newsletter is to keep our alumni up-to-date with the Duke Med-Peds Program.

Let me know if I can provide any additional information. Enjoy! Sue Woods, MD

Class of 2013 (continued)

Andy Livingston

John “Andy” Livingston, MD, was born in Arlington, Texas. He received his undergraduate degree in biochemistry from the University of Colorado and returned to Texas for his medical school training at the University of Texas Medical Branch in Galveston. Throughout medical school, Andy served as mentor to students of all ages, from elementary to undergraduate to

first-year medical students. He is an avid cyclist and enjoys traveling, cooking, and snow-skiing.

Ann Marie Navar

Ann Marie Navar, MD, MSPH, PhD, was born in Corpus Christi, Texas. She completed her undergraduate degree in Spanish at the University of Texas. She made a stop at the Johns Hopkins to obtain her

MSPH and then came to Duke for medical school. Throughout medical school at Duke, she continued to collaborate with the Johns Hopkins School of Public Health to earn her PhD. Her research focus was adverse events following immunizations in neonates in the ICU. Ann Marie is fluent in Spanish, enjoys camping and traveling, and is an avid UT football fan.

Andrea Shaw

Andrea Shaw, MD, was born in Syracuse, New York. She received her undergraduate education at Cornell University in ecology and evolutionary biology. She returned to her home town to attend the State University of New York at Syracuse College of Medicine, and spent one year working with Duke faculty at the Kilimanjaro Christian Medical Center in Moshi, Tanzania. She researched febrile illness in the community and participated in a study of HIV and Tuberculosis co-infections. Andrea enjoys outdoor activities, as well as pottery, drawing, and painting.

Residency Program Updates

Like all other Med-Peds residency programs in the country, the Duke Med-Peds Residency Program had been previously supported through the parent residency programs. However, in 2006, the ACGME supported accreditation of an institution's combined Med-Peds residency training program as its own specialty. Thus, the Duke Med-Peds Residency Program received its own accreditation in 2006 and will have its first ACGME site visit later in 2009.

The Duke Med-Peds residents continue to be a strong presence in both departments, representing the program in both medicine and pediatric residency councils and leadership positions. Several of the MP4's are

Medicine ACRs, and we will have at least 4 consecutive years of a MP resident as one of the Pediatric Chief Residents. We will also have the 3rd MP resident to be named one of the Medicine Chief Residents, serving his time in 2010-2011.

The combined clinical training remains intensive, and the MP residents are well-trained to pursue a variety of career paths. Last year, the residents graduated to pursue careers in medicine hospitalist paths at Johns Hopkins and Brigham and Women's, a hematology-oncology fellowship, a pulmonary-critical care fellowship, a Pediatric Chief Resident role and a Health Services research fellowship. From this year's gradu-

ating class, residents will enter careers in hospitalist medicine at Duke, pediatric cardiology fellowship, adolescent fellowship at Boston's Childrens, Pediatric Chief Residency, homeless medicine at the Healthcare for the Homeless Clinic in Boston, and a primary care research fellowship at UNC.

We started a new elective for Med-Peds residents this year—an ambulatory experience that includes a community Med-Peds experience (Roxboro Med-Peds—with a former Duke Med-Peds resident), sports medicine, podiatry, adult congenital cardiology clinic, and their own continuity clinic experience, which has been a success. Two of our MP4s are participating in the

International Health Elective: Erin VanScoyoc went to the Indian Health Service in the summer of 2008, and Eleni Boussios is currently in Australia for 3 months. We have also continued our Med-Peds Journal Clubs and the (almost) monthly combined internal medicine and pediatric noon conference series focusing on adolescent medicine topics or topics spanning all ages.

We had a great group of interns join us earlier this year. Apara Dave from Brown, Olivia Granillo Johnson from Duke, Ketan Shah from the University of Southern California, and Sima Pendharkar from the University of North Carolina. We look forward to welcoming the new interns in July 2009.

Med Peds Social Events

“What is done is important, but why it is done is even more important.”
— Eugene Stead, Jr., MD

Faculty Section Updates

Medicine Holiday Party 2008

The Section of Medicine-Pediatrics was established within the Division of Primary Care Pediatrics and the Department of Pediatrics in early 2007, under the leadership of Suzanne Woods. The Department of Pediatrics recognized the need to support the expanding Med-Peds faculty group. The Med-Peds section now consists of 5 faculty members: Ed Evans, Dean Miner, Dan Ostrovsky, Jane Trinh, and Suzanne Woods. Other key MP faculty are Tom Owens, in the Section of Adult Hospital Medicine, and Kristin Ito, in Adolescent Medicine. Each faculty member continues to participate in clinical activities directed at his/her interests, a mixture of inpatient and outpatient medicine, as well as resident education. The main practice site remains at the Duke Primary Care Clinic on N. Roxboro Street.

With the creation of the Med-Peds section, we also welcomed the addition of our own section administrator, Phillis Scott, and clinic administrator, Linda Klein, who both came to us after working in the Department of Medicine for many years.

Featuring a Duke Med-Peds Graduate: Welcome back, Jamie Fox!

Jamie Fox has returned to Duke as a member of the Division of Pediatric Emergency Medicine. Originally from Ohio, he ventured down to Duke in 1999 for his Med-Peds residency, finishing in 2003. He subsequently decided to pursue a career in Pediatric Emergency Medicine and completed his fellowship at Nationwide Children's Hospital in Columbus, OH. For his first "real" job, Jamie worked as a Pediatric attending at Akron Children's in Akron, OH. He wore many hats there (as we would expect no less) and served as associate pediatric clerkship director, director of 4th year medical student pediatric elective, and director of the EBM curriculum. He, his wife Michelle, and their children decided to move back to Durham this spring for the love of the area, academic atmosphere, weather, and lasting friendships made from residency. Being away and coming back has made him appreciate the strength of the residents and the eagerness to learn. Jamie loves EBM and believes it's an important skill to learn to succeed in practicing good medicine. In his free time, Jamie enjoys spending time with his friends and family, exercising, non-scientific reading, and golfing.

Maria Monge and Dan Ostrovsky at Journal Club

"EBM is one of the most important skills for young physicians to learn."

——— **Jamie Fox, MD**

Congratulations!

Weddings:

- Lisa Nguyen (MP3) to Jesse Waggoner, and David Ming (MP3) to Janet Tcheung.

New Addition:

- Greg Barker (MP4) and wife Amy welcomed Luke Barker on 12/26/08.

Awards and Honors:

- Aimee Chung (MP4) received the Pediatrics Appleseed Award from the medical students for excellent teaching.
- Suzanne Woods was named President-Elect of the Medicine-Pediatrics Program Directors Association.
- *Medicine Assistant Chief Residents* (2008-2009): Jon Bae, Aimee Chung, and Richard Chung
- *Medicine Assistant Chief Residents* (2009-2010): Rhett Mays
- *Pediatric Chief Residents*: Aimee Chung (2009-2010) and David Ming (2010-2011)
- *Medicine Chief Resident*: Jon Bae (2010-2011)
