Exploring New Technologies

Pat Thibodeau, Associate Dean for Library Services & Archives

The Medical Center Library & Archives have been trying out some new technologies that hopefully will enhance our services, as well as our internal operations. Below are brief descriptions of some of these technologies. We welcome suggestions for other technological developments we should be exploring.

Blog - We now have a blog at <http://www.mclibrary.duke.edu/blog/> that brings you event announcements, lists of new book titles, as well as news about Library services and policies. You can get to it easily from our main Web page (<http://www.mclibrary.duke.edu/>) by clicking on “More Library News...”

Really Simple Syndication (RSS) Feed - You can sign up to have our blog content delivered to an RSS feed reader by clicking on the  icon from our Website at <http://www.mclibrary.duke.edu/>. If you’re not sure what an RSS feed is, then visit our blog entry at <http://www.mclibrary.duke.edu/blog/2007/01/whats-rss.html> to learn more.

Wiki - We have set up a new communication and working tool using Wiki technology. This allows us to share internal information, post important documents, discuss issues, and track projects.

Internet Messenger (IM) - This is certainly not a new technology, but a new service for us. As we announced in the last newsletter issue (<http://www.mclibrary.duke.edu/about/news/newsletter.html#imessenger>), we are still piloting the service. You may IM us at **dukemclref** from your AOL, Google Talk, or Yahoo Instant Messenger account. Away from your computer? Access your account through Meebo (<http://www.meebo.com>) from any computer’s Web browser.

Podcasts - Again, this is not a new technology, but we trying to find ways to use podcasts to bring information and services to you. Oral histories and recordings of presentations are logical applications, but we are wondering if orientations to the Library, tutorials, or other information would be useful on your iPod or MP3 player. Let us know what you might be interested in.

del.icio.us - Our librarians have put together a list of high quality medical references, including links to Duke resources, on this social bookmarking site at <http://del.icio.us/dukemedicalcenterlibrary/>. You can add our list to your favorite bookmarks in del.icio.us or select specific resources from it for your del.icio.us bookmarks.

D-Space - This technology is allowing us to build a repository to capture digital documents, images, and other files. Our version, “Duke MedSpace,” is being used by Archives for capturing Duke records and images. We have also been working with Rubicon Foundation to make materials on hyperbaric medicine available.

Tea With Trailblazers Celebration

Jessica Roseberry, Medical Center Archives

(l. to r.) Evelyn Wicker and Donna Harris

On February 9, 2007, two African-American “trailblazers” met with an audience of approximately seventy campus and community members at the Medical Center Library to describe their experiences as Duke pioneers. Both women spoke of how they pushed the boundaries of Duke Medicine’s cultural landscape by realizing the importance of a struggle bigger than their own.

Dr. Evelyn B. Wicker, an early African-American nursing administrator who became the Nursing Director of Duke Hospital South, shared with listeners what it was like to be the only person of her skin color as she began her administrative career in the Outpatient Clinic in the 1970’s. “How many of you in this audience have either been the first or the only one, whether the only female, male, black, white, nurse, physician?” she asked. “Think about what that felt like. Always on stage but sometimes invisible. Isolated, no one to talk to, walking on eggshells, straddling the fence because you don’t know what’s on either side.”

As she rose through the ranks, Dr. Wicker influenced Duke in a positive way and hired many qualified African-American nurses in management positions, supporting and challenging them along the way. In the question and answer period following the talks, an audience member told the group that she herself had been one of the African-American nurses appointed by Dr. Wicker. “I would really like to thank you,” the audience member told Dr. Wicker, “because you were my mentor in giving me my first management position.” She went on to say that she always remembered Dr. Wicker encouraging her to “give back.”

The second panelist, **Donna A. Harris**, was the first African American to graduate from the Duke University School of Nursing, in 1971. Growing up in a small North Carolina town, she was one of five African-American young people to integrate her local high school. After the trauma of this racially-charged experience, Mrs. Harris learned that she was accepted to the Duke School of Nursing as the first African-American student.

Although she had another institution in mind, she chose to attend Duke for financial reasons. “I was wanting to get back to a circle of peers of my own race, but that did not happen,” she said. But Mrs. Harris did get a lot of support from the people in her hometown, who knew she could do well. She was determined not to let them down and to succeed on the college level at this prestigious institution. She told the audience, “Remember that it’s not all about us. It’s about opening the doors for others who will continue with the struggle and go further than we did.”

For more information about this annual event, sponsored by the Medical Center Library & Archives, or for recordings or transcripts, please contact **Jessica Roseberry** at (919) 383-2653 or jessica.roseberry@duke.edu.

[Exploring New Technologies, continued from page 1](#)

Aware Image Server - Archives is also heading up this project. Not only does this software allow us to capture and search for images, but it also has the capability to zoom in on high-resolution images for more detailed viewing. Our current explorations range from capturing historical images to cytology slides.

Second Life - Although we have not purchased an island or built a library yet, several of us have begun to explore this digital world (<http://secondlife.com/whatis/>) by creating avatars (digital personalities or beings). We are also talking to colleagues who are providing health information services in Second Life. If you have ideas for applications, please let us know.

Do you have other ideas of what we should be exploring? Please send them to me at patricia.thibodeau@duke.edu.

We Still Have Books!!!

Elizabeth Berney, Access Services

Sometimes it's just not possible to get all the information you need online. And it may be difficult to find time to come to the Library and search the stacks for books. But there is an alternative. You can have the Library staff retrieve the books you need from the stacks and place them on the hold shelf under your name. That way all you will need to do is come to the Library Service Desk and pick them up. The retrieval service is available for all items within our circulating book and audiovisual collections. Journal retrieval is not available at this time. Placing a request is easy!

1. Search the Library's catalog (http://www.lib.duke.edu/online_catalog.html) for the item you want.
2. Once you find it, click on **Medical Center Library** under "Library (Owned/Out)" in the Location/Call No. column.

Selected records: Select All | Deselect | View Selected | Download/Mail | Add to Basket | Create Subset

82 Records for your Full Duke Catalog search "Keywords= acs" Sorted by: Year, then Author
Sort options: | Author/Year (D) | Author/Year (A) | Year/Author (D) | Year/Author (A) | Author/Title | Title/Year (D) | Title/Year (A) | Yes

Records 1 - 20 of 82

#	Author	Title	Format	Year	Location/Call No.
1	<input type="checkbox"/> Field, John M.	Advanced cardiovascular life support provider manual /	Book	2006	Location/Request: Medical Center Library: Reserve Room WG205 Ac63 2006 Medical Center Library: Stacks WG205 Ac63 2006 Durham Regional Hospital Lib.: WG205 A1845 2006 Library (Owned/Out): Medical-Center-Library(12/ 10) Durham-Regional-Hospital-Lib.(12/ 0)

3. If any copies are available, "On Shelf" will show in the Due date column. Click on **Request** to the right of the call number. *Please note: Items that are located in the Reserve Room, on Reference, or in the Journal Stacks will not be retrieved.*
4. When you click on Request, you will be prompted to log into the system. You can enter either your NetID and password or type your DukeCard number (located on the back of your DUMC photo ID under the barcode) in both boxes. If you have problems with the login, just add a 1 or 2 to the end of your number in both boxes.

Request (link below) an item that is on loan, at LSC, in another Duke Library, or Special Collections.

Select year: All | Select volume: All | Select library: Medical Center Library | Go

	Description	Item status	Sub-library	Collection	Location	Due date	GetIt@Duke
Expand	c.8	Standard Loan	Medical Center Library	Stacks	WG205 Ac63 2006	Reshelving	Request
Expand	c.8	Standard Loan	Medical Center Library	Stacks	WG205 Ac63 2006	On Shelf	Request
Expand	c.7	Non-circulating	Medical Center Library	Reserve Room	WG205 Ac63 2006	On Shelf	Request
Expand	c.6	Standard Loan	Medical Center Library	Stacks	WG205 Ac63 2006	04/11/2007	Request
Expand	c.6	Standard Loan	Medical Center Library	Stacks	WG205 Ac63 2006	04/11/2007	Request
Expand	c.4	Standard Loan	Medical Center Library	Stacks	WG205 Ac63 2006	On Shelf	Request
Expand	c.8	Standard Loan	Medical Center Library	Stacks	WG205 Ac63 2006	On Shelf	Request
Expand	c.2	Standard Loan	Medical Center Library	Stacks	WG205 Ac63 2006	04/11/2007	Request
Expand	c.12	Standard Loan	Medical Center Library	Stacks	WG205 Ac63 2006	04/16/2007	Request

5. From the "Hold Request Form" screen, you can choose a **pickup library location** (for most this will be the Medical Center Library) and a "Not Needed After" date. After you submit your choices, a message at the top of the screen will indicate your item is scheduled for pickup at the Medical Center Library.

We pull books from the shelves twice a day - in the morning and afternoon. Once your item is available for pickup, an email message will be sent to the address on file stating that your materials will be kept on hold for 48 hours. After this time, items will either be sent back to the stacks or given to the next person who has placed a hold. **Please note: You will also receive a default, but incorrect, email message stating that your items will be kept on hold for 10 days.**

We believe you will find this service very useful. Not only can you request items that we own, but you can also request items from any Duke Libraries and have them delivered to the Medical Center Library under your name.

More E-Journal Backfiles: Thanks! to Main Campus

Judy Woodburn, Journal Services

Using special funds from the Strategic Initiative Plan, the Duke Libraries System (Perkins/Bostock and branches) has been able to purchase backfiles to more than 3,000 journals from major publishers including Elsevier, Springer, and Wiley. Access has been added to our e-journal (<http://www.mclibrary.duke.edu/find/ejournals/>) pages, and the journals will be linked through Get It@Duke when you search databases. Additional volumes of *Nature* have also been purchased and will be available later this year. This purchase will add the years 1869-1949 to the already loaded volumes from 1950 forward.

Here are just a few of the many titles now completely available online from volume 1 forward:

American Heart Journal 1925--
American Journal of Medicine 1946--
American Journal of Surgery 1926--
Archives of Gynecology & Obstetrics 1870--
Brain Research 1966--
Cancer 1948--
Cell 1974--
Journal of Allergy & Clinical Immunology 1929--
Journal of Comparative Neurology 1891--
Journal of Pediatrics 1932--
Lancet 1823--
Urology 1973--

Many thanks to the main campus library system for purchasing journal backfiles that benefit the entire campus!

Photocopying Just Got Better!

Elizabeth Berney, Access Services

Where Do I Copy Using...?

Medical Center Library Copy Cards

Behind journals D-L shelving section 44

Duke/Flex or Perkins Card
Mezzanine
First Stack
Second Stack
Behind journals D-L shelving section 44

**For assistance, contact the Library Service Desk
or call 660-1100 from any Library phone.**

With much fanfare and excitement, we announce the replacement of our old copiers with new, fast, swanky machines that will Collate! Staple! and Duplex! No more blurry copies and no more dark lines...

Next time you contemplate checking out that 1-day journal just to copy a single article, think again. You may find that you will get better quality copying from one of our new machines than from the clunker in your building.

Our new copiers are in the same locations on each floor of the building and use the same currency.

The copy card vending machine is located on the Entrance Level at the bottom of the Mezzanine stairs.

CINAHL Access to Switch from Ovid to EBSCOhost

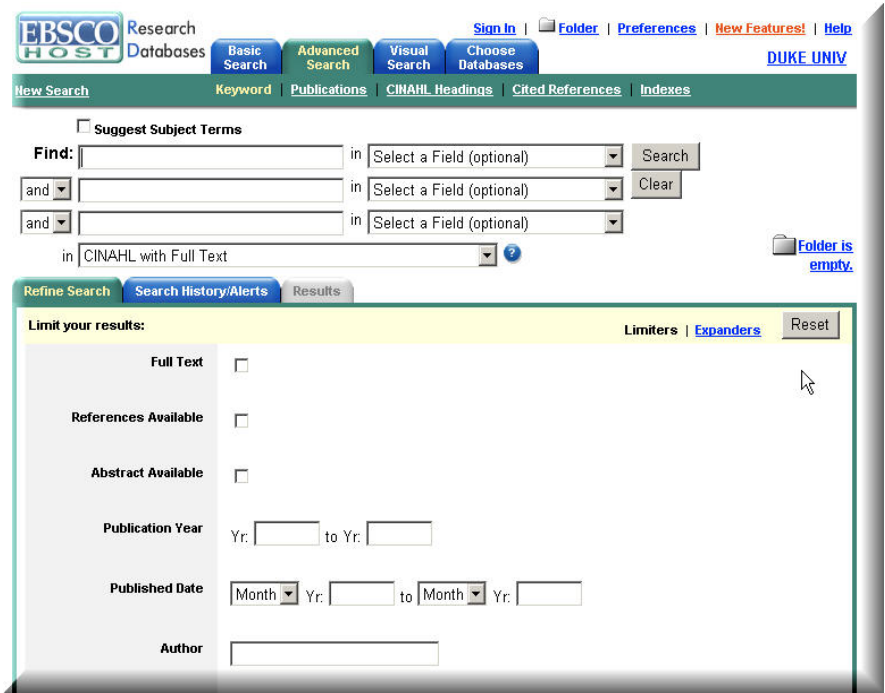

Anne Powers, Public Services

In late 2003, EBSCO Publishing, a provider of online databases and full-text journal content, acquired CINAHL Information Systems, producer of the CINAHL database. Earlier this year EBSCO announced that it would not be renewing agreements for distribution of CINAHL through other search systems, such as Ovid, and that CINAHL would be accessible exclusively through its own search platform, EBSCOhost.

At the end of June, 2007, access to the CINAHL database (Cumulative Index to Nursing & Allied Health Literature) for Duke users will switch from the Ovid search platform to EBSCOhost.

EBSCO has built upon the original CINAHL database to develop *CINAHL with Full Text*, a database incorporating easy access to more than 600,000 full-text journal articles. *CINAHL with Full Text* provides indexing back to 1982 for more than 2,800 journals in the following disciplines: nursing; biomedicine; alternative/complementary medicine; consumer health; physical therapy; occupational therapy; physician assistant; health education; and other allied health disciplines. Transitioning to *CINAHL with Full Text* will provide additional content for Duke users since it comes bundled with the full text of more than 300 journal titles, many of which we do not subscribe to. "In process" citations to new journal articles awaiting subject indexing are also included, to keep content as up-to-date as possible. Another powerful feature is searchable cited references for more than 1,000 journals, so that researchers may follow a line of inquiry by means of articles that have cited an earlier paper. EBSCOhost offers several search modes to accommodate novice users as well as more sophisticated searchers.

From now until the end of June, 2007, Duke users will have access to both the Ovid and EBSCOhost versions of CINAHL. Links to CINAHL via EBSCOhost have been added to the Medical Center Library's CINAHL login page at <http://www.mclibrary.duke.edu/databases/nursing> and to the main "Databases" page at <http://www.mclibrary.duke.edu/databases>. CINAHL users should plan to make the transition to EBSCOhost as soon as possible, to allow plenty of time for becoming familiar with the new search interface. Since the cutoff date for Ovid access is fast approaching, the Library is offering training sessions in the use of EBSCO's version of CINAHL. The sessions are listed on the Library's "Tutorials & Training" Web page at <http://www.mclibrary.duke.edu/training>. Users may also stop by or call the Library Service Desk at (919) 660-1100 for assistance with CINAHL via EBSCOhost.

Staff News

Beverly Murphy, Webmaster and Assistant Director, Marketing and Publications, has been elected to the 2007/08 Nominating Committee of the Medical Library Association, which is responsible for preparing the slate of candidates to run for MLA President, Board of Directors, and Nominating Committee. Beverly has also been appointed as Chair of MLA's Professional Recruitment and Retention Committee.

Brandi D. Tuttle, Information and Education Services Librarian, is featured on **experience.com**, a recruitment service for recent college graduates, as a "rising star" for healthcare and medical librarianship. Read Brandi's profile and interview at http://www.experience.com/alumnus/channel?channel_id=rising_stars&page_id=home.

News Page is Now a Blog!

Our new blog (<http://www.mclibrary.duke.edu/blog/>) features news, updates, tips, new book alerts, and an option for your comments! Bookmark our blog or sign up to send our news feed straight to your RSS aggregator. We'd love to hear from you!

Recent Additions to DUMCL Online

<http://www.mclibrary.duke.edu/>

Search REVISED

<http://www.mclibrary.duke.edu/search.html>

The Search page has been revised and expanded. You can now enter terms in the search box to query a variety of resources, including the entire Website, DUMCL Subject Guides, DUMCL Historical Images in Medicine Database, the Online Catalog, PubMed MEDLINE, Ovid MEDLINE (Duke IP only), Duke Search - People, Places, Things, and Google. You can access the search function from the header at the top of any page on our Website.

New DUMC Articles NEW

<http://www.mclibrary.duke.edu/pubsupport/dukeauthors>

This is a list of the most recent articles by Duke authors added to the PubMed (MEDLINE) database. It is updated every Sunday. "New DUMC Articles" can be accessed under *Publication Support* from the main Web page.

National Library Week
April 15 - 21, 2007

EndNote Web

Brandi Tuttle, Public Services

Do you use the bibliographic citation management software EndNote? If so, you may be interested to know that Endnote Web is now integrated with ISI Web of Knowledge (i.e., Web of Science and Journal Citation Reports). EndNote Web provides you with online storage for your references and the ability to instantly format bibliographies in your word processor. Next time you find yourself away from your computer, don't worry, you can import citations (from a variety of sources such as PubMed in addition to Web of Knowledge products) into EndNote Web from anywhere. Keep all your citations online or download them to your personal computer later! Some new Endnote Web upgrades include the following:

- Cite While You Write™ now available for both Windows and Macintosh users
- Firefox Browser Extension (plug-in)
- One-click author searching from a folder or reference page

Access live, free training or recorded presentations at Thomson Scientific's Training Website (<http://scientific.thomson.com/training/>) or download a factsheet through ISI Web of Knowledge. If you are unfamiliar with EndNote or want to learn more, you may contact **Ginger Carden**, Librarian and EndNote specialist, at virginia.carden@duke.edu or (919) 660-1184.

Library Educational Offerings

*The Medical Center Library offers a variety of educational opportunities.
A roster of training sessions is listed below.*

Individual and Group Sessions

To arrange for a session, please contact the librarian listed under your topic of interest.
