SPRING 2005

Nobel Prize Recipient Named Vice Chancellor

Peter C. Agre, MD, winner of the 2003 Nobel Prize in Chemistry, will join Duke University Medical Center on July 1, 2005, in the newly created post of vice chancellor for science and technology.

Agre will help guide the development of Duke's

biomedical research enterprise in its efforts to support and attract the world's top scientists and students. He will also lead an ongoing assessment of global health care needs—and work to ensure that Duke's research programs are positioned to address those needs.

Agre will work closely with Victor J. Dzau, MD, chancellor for health affairs, the deans of the Schools of Medicine and Nursing, and faculty members to develop strategies for the future direction of science at Duke and to identify opportunities presented by rapidly evolving technologies.

Agre's 1992 paper in *Science*—written with Johns Hopkins University physiologist Bill Guggino, PhD—documented the discovery of the first water-channel protein, called an aquaporin, which facilitates the movement of water molecules into and out of cells through the cell membrane. Agre and his colleagues have since found that aquaporins are part of the blood-brain barrier and associated with water transport in the skeletal muscles, lungs, and kidneys—and researchers worldwide have now linked aberrant water transport to many human disorders.

In 2003, Agre shared the Nobel Prize in Chemistry for revealing the molecular basis for the movement of water into and out of cells.

Peter C. Agre, MD

A Little Mindless Entertainment

Duke medical students, from left, John DuBose, MSI, David Garras, MSII, and Andrew Pogozeleski, MSI, enjoy a game of foosball on the table recently donated by the Duke Medical Alumni Association. According to Garras, who is currently vice president of the Davison Council, the solid wood table—which cost \$321—is a great addition to the medical student lounge. “We already have a pool table,” says Garras, “but foosball takes less skill and it's a great break from studying. All of the students would like to really, really thank the Alumni Association,” he added. “This is just the tip of the iceberg of all they've done for us this year.”

Alumnus Gross and Wife Endow \$5 Million in DukeMed Scholarships

William H. Gross, T'66, manager of the world's largest bond mutual fund, and his wife, Sue, are giving more than \$23 million to Duke University to provide financial aid for needy and excellent students and other programs.

\$15 million of the Grosses' gift will endow undergraduate scholarships, \$5 million will endow scholarships for medical students, and \$3.5 million will be used to support faculty members in Duke's Fuqua School of Business and other priorities. Gross is chief investment officer and a founder of the Newport Beach, Calif.-based PIMCO and was an A.B. Duke Scholarship recipient during his undergraduate years. The gift will establish three new university endowments, including The William and Sue Gross Honorary Scholarships in the School of Medicine.

The scholarships—to be awarded to students whose families have an adjusted gross income in the lowest quartile for families applying for need-based support at the medical school—will provide financial aid for excellent and needy students pursuing medical degrees or MD-PhD degrees at Duke. Awards may range from partial to full tuition.

DukeMed Student Awarded Marshall Scholarship

Second-year medical student Alexander Oshmyansky is one of two Duke students to earn a prestigious 2005 Marshall Scholarship.

Established by U.S. General George C. Marshall in 1954, the Marshall Scholarship program names about 40 promising U.S. scholars each year to study in the United Kingdom at the graduate—and occasionally, undergraduate—level in any field. Marshall Scholars are considered potential leaders and decision-makers. Financed by the British government, the two-year scholarships are valued at approximately \$60,000.

Oshmyansky, who is interested in computational neuroscience, the mathematical modeling of the brain, plans to earn a degree in mathematical biology from Oxford University before returning to Duke to finish medical school. His goal is to become an academic neurosurgeon who divides his time between research and clinical practice.

“I want to figure out how the pathways of the brain work,” says Oshmyansky, who earned a degree in biochemistry from the University of Colorado at Boulder after just one year. He was also the recipient of the Boettcher Scholarship, the most esteemed merit-based scholarship awarded to graduating high school seniors in Colorado.

Duke undergraduate Emily Heikamp, a senior majoring in biology, was also named one of this year’s Marshall Scholars. Heikamp, who will study at Oxford, as well, plans to continue her work on the molecular mechanisms of angiogenesis.

Gills Makes \$2 Million Gift to Duke Eye Center

James Pitzer Gills, Jr., MD’59, an associate professor of ophthalmology at Duke from 1965-68, has established the James P. Gills, Jr., MD, Research Fund with a \$2 million gift to the Duke University Eye Center.

Distributions from the fund will be used to support Department of Ophthalmology clinician-scientists conducting research on the prevention, treatment, and cure of glaucoma and corneal and retinal diseases—conditions that rob millions of people of their eyesight each year.

Gills, the first ophthalmologist in the U.S. to dedicate his practice to treating cataracts with intraocular lens implants, is the founding director of St. Luke’s Cataract and Laser Institute in Tarpon Springs, Fla., the largest free-standing ambulatory surgery and eye care center in the country.

Center for Interdisciplinary Engineering, Medicine and Applied Sciences Opens

With the November grand opening of the Center for Interdisciplinary Engineering, Medicine and Applied Sciences (CIEMAS), Duke physically united scientists and educators from across scientific disciplines to stimulate innovation.

In addition to enabling the Pratt School of Engineering to more than double its teaching and research space, the \$97 million, four-building, 322,000-square-foot CIEMAS complex houses units of the School of Medicine and the Institute for Genome Sciences and Policy.

Duke's first Leadership in Energy and Environmental Design (LEED) research building, CIEMAS was constructed with solar energy-deflecting roof membranes, motion-sensing lighting controls, and a hidden 70,000-gallon reservoir to capture rainfall for landscape irrigation.

In addition to its state-of-the-art structural features, the center also features unique artistic details. Etched glass features Leonardo da Vinci's "Spectra" and a stylized tree symbolizing the union between engineering and living systems. Restrooms are tiled with a pattern that recreates one of the BRCA1 breast cancer genes and the bone morphogenetic protein that controls the formation of cartilage *in vivo*. An Irish café features a cozy area for study and conversation.

Medical initiatives currently underway at CIEMAS include work being done by undergraduate engineering students to improve speech quality through cochlear implants and to find novel ways to treat tumors with cancer-treating drugs. Breast cancer genomics research is also underway in the Barbara Levine Breast Cancer Genomics Research Laboratory.

Construction on the complex is not quite complete. A "clean room" to be used for nanoscale fabrication of biological, chemical, photonic, and mechanical materials is slated to open in 2006, and a six-sided "Visroom" virtual reality facility, one of only seven in the world, will open this spring.

Principal donors **Michael, T'70**, and **Patricia Fitzpatrick, WC'69**, and **Jeffrey, E'81**, and Penny Vinik were on hand for the center's official dedication ceremony in November.

Medical Alumni Council Welcomes Newest Members

The Medical Alumni Council (MAC) welcomes the following members for 2005-07:

Samuel I. Brown, MD, HS'79-'85, is an orthopedic surgeon with the Sports Medicine and Orthopaedic Center, Inc., in Chesapeake, Va. He and his wife, Rosemary, have two daughters and live in Portsmouth, Va.

David Butterly, MD'87, HS'87-'92, is an associate professor in Duke's Division of Nephrology. He and his wife, Kay, a physical therapist, have two sons and live in Cary, N.C.

Nicholas J. Leonardy, T'81, MD'85, is a senior partner and president of Retina Vitreous Associates, a large multi-office practice in Ohio that provides surgical and non-surgical treatment of vitreoretinal diseases. He and his wife, Terri, an artist and designer, have two sons and a daughter (**Emily, T'08**) and live in Perrysburg, Ohio.

Neil S. Roth, T'87, MD'91, is an attending physician at Lenox Hill Hospital in New York City, where he specializes in sports medicine and shoulder and knee surgery. He and his wife, Melissa, an entertainment and music attorney, live in Scarsdale, N.Y., with their three children—Jacob, Sophia, and Max.

Katherine S. Upchurch, MD'76, is an associate professor of medicine and the associate chief of the University of Massachusetts Medical School's Division of Rheumatology. She has a busy consultative practice and is engaged in teaching, writing, and community volunteer work. She and her husband have three children and live in Concord, Mass.

Harold E. "Hal" Shaw, Jr., MD, HS'74-'77, is in private ophthalmology practice with Jervey Eye Group, PA, in Greenville, S.C. He also holds staff appointments with and serves as a consultant for five healthcare institutions, including the Duke Eye Center. He and his wife, Minor, have three children and live in Greenville.

MAC members returning for a second term are **David Goodkind, MD'75, HS'80-'82**, and **John C. Murray, MD'76, HS'79-'82**.

Professorship Honors Longtime Neurosurgery Chair

Robert H. Wilkins, MD, professor and chief emeritus of the Division of Neurosurgery from 1976-96, has received a birthday present that has the potential to be a gift to many others, as well.

The Dr. Robert H. and Gloria Wilkins

Professorship Fund in Neurosurgery was established in August by son Michael and daughter-in-law Sheila Wilkins to honor his parents on his father's 70th birthday.

Wilkins, a graduate of the University of Pittsburgh School of Medicine, first came to Duke in 1959 as an intern in the Department of Surgery—and completed a neurosurgical residency in 1968.

An esteemed physician in his field, Wilkins has been a prolific writer and editor. He was the founding editor of the journal *Neurosurgery* and served on the editorial boards of several other neurosurgical journals. His 11-year term on the editorial board of the *Journal of Neurosurgery* concluded with a year as chairman. The principal editor of the three-volume textbook *Neurosurgery*, Wilkins wrote or edited 28 other books and published more than 300 articles and book chapters.

He has been the recipient of many of the most prestigious awards in his field, served as chair of the American Board of Neurological Surgery and president of the Congress of Neurological Surgeons and the Southern Neurosurgical Society.

As anyone who knows Wilkins personally can attest, he did not achieve this level of success alone. His wife Gloria was instrumental in helping him grow the division and has been his biggest supporter throughout his career—which is why the professorship was established in both of their names.

Wilkins also served as a mentor to Allan Friedman, MD, Duke's current chief of neurosurgery and Guy L. Odom, MD, Professor of Neurological Surgery.

"He has always been quite a presence—and has served as a mentor to about 40 young neurosurgeons," Friedman says. "He pioneered Duke's use of the operating microscope in neurosurgery and was always eager to attack new, highly specialized operative procedures."

Danny Jacobs, MD, left, chair of the Department of Surgery, and Allan Friedman, MD, HS'74-'80, Guy L. Odom, MD, professor and chief of neurosurgery, celebrate with Robert and Gloria Wilkins.

MAA Helps Document Duke's Tanzania Partnership

Duke's ongoing work in Tanzania, Africa, is detailed in the January-February 2005 issue of *DUKE Magazine*. A contribution from the Medical Alumni Association—along with backing from other Duke groups—supported the work it took to accurately and engagingly tell the story by enabling University Photography director Chris Hildreth to make the trip to Tanzania and document what he witnessed in a series of stunning photographs.

Visit <http://www.dukemagazine.duke.edu/dukemag/issues/010205/woes1.html> to read the article in its entirety.

After the Tsunami— DukeMed Responds

Within a week of the devastating tsunami that ravaged Southeast Asia on December 26, 2004, Duke administration, faculty, staff, and students took action.

Duke University Health System committed \$50,000 to the Duke Tsunami Medical Relief Fund and faculty, staff, and departments were encouraged to contribute through a dedicated web site, <http://tsunami.dukehealth.org>. To date, a total of \$65,000 has been raised.

On January 24, Victor Dzau, MD, chancellor for health affairs, addressed medical students, faculty, and employees in a town hall meeting to review Duke's medical relief plan.

"It is clear that there is a need for immediate disaster relief, but also that Duke has a special opportunity to help the area over the long term because of our expertise in health and our commitment to global health," said Dzau.

Dzau formed an advisory group chaired by Pascal Goldschmidt, MD, chair of the Department of Medicine, and Ralph Corey, MD, professor of medicine and infectious diseases and director of the Hubert-Yeargan Center for Global Health, who made the following recommendations for Duke's medical relief efforts:

- Organize fund-raising across the institution for medical relief;
- Identify a partner (hospital, university, or individual) in the affected area with whom we can work; and
- Share and gather information within the Duke medical community through meetings and a website.

Peter Kussin, MD, an associate clinical professor of medicine in the Division of Pulmonary, Allergy, and Critical Care, has recently returned from an exploratory trip to Banda Aceh, Indonesia. *DukeMed Alumni News* will report on his findings in the Summer issue. Also, plans are underway to send a Duke psychiatry resident to Sri Lanka.

Students Do Their Part

By January 10, Duke medical students had gathered 60 boxes of medical supplies for use in Southeast Asia.

First-year medical students **Krupal Shah** and **Channa Jayasekera** delivered the supplies by van to New Jersey. The supplies joined an outgoing shipment being sent by the Sri Lankan Medical Association of America. The students collected the supplies through "Remedy at Duke," a student-created program that recovers unused surgical supplies and sends them to needy countries.

Proceeds from this year's Student-Faculty Show, which totaled \$5,000, were donated to tsunami relief.

If you would like to contribute to The Duke Tsunami Medical Relief Fund, please use the secure gift link at <http://tsunami.dukehealth.org>, or send a check to Duke University Office of Gift Records, Box 90581, Durham, NC 27708-0581. Checks should be made payable to Duke University with a notation The Duke Tsunami Medical Relief Fund in the memo line. All proceeds will be used for medical relief and supplies in the affected nations.

Duke to Open Medical School in Singapore

In a collaboration with the southeast Asian island nation of Singapore, Duke will open a satellite medical school in Singapore General, the country's largest hospital, in 2007. The country currently has only one medical school, based at the public National University of Singapore.

Eager to develop its medical science sector, Singapore has invested millions of dollars in education and is courting students in the Asia-Pacific region. In an effort to become an international hub for life-science research, the country has implemented liberal regulations on stem-cell research—and, having opened a \$300 million research center in 2003, hopes to be home to 15 world-class biotechnology companies by 2010.

The alliance with Duke “will be a big boost to Singapore’s medical services, including our biomedical initiative, which is a major drive by Singapore to develop the life sciences industry,” Deputy Prime Minister Tony Tan told reporters in January.

The program will accept students with a wide range of backgrounds, and the curriculum will stress health delivery, clinical care, and research.

The school's creation will also likely improve the caliber of the country's nursing education and care, as it will “pave the way for the establishment of a nursing school in Singapore where the nurses, at the end of their training, will be awarded degrees,” Tan said, adding that it would no longer be necessary for students to pursue nursing degrees overseas.

The Singapore government forecasts the number of foreign students to triple to 150,000 by 2012, as the growing Asian middle class seeks higher education outside of the U.S. and Europe. Foreign schools and universities with campuses in Singapore include the University of Chicago, France's INSEAD, Johns Hopkins, the Massachusetts Institute of Technology, and Stanford.

First year medical students, from left, Asad Shah, Lashonda Watts, Charles Withers, Ambika Sud, and Jon Ellison.

Students Have Two New Places to Take a Load Off

Thanks to the Medical Families Fund, weary med students now have two new benches on which to relax and enjoy the outdoors. The two Smith & Hawken benches are located in the courtyard outside the Duke Clinic amphitheatre, where first-year medical students attend most of their classes.

Second-year student Eric Dziuban says that although during his first year, he and his classmates enjoyed spending their short breaks in the courtyard, where they'd sit on the grass, on the walkway, or “just stand around—anything to spend a few minutes outside,” their breaks would have been better had there been some outdoor seating.

A group of students approached School of Medicine vice dean Edward Halperin, MD, and were happy to have their wish for benches granted. The benches were provided by the Medical Families Fund, an annual, current-use fund whose income is raised from families of medical students and designated for student life enhancements. In the past, the fund has been used to purchase online textbooks, student lounge furniture, travel scholarships, and computers. Last year, 138 donors contributed a total of \$23,710 to the fund.

Despite now spending more time in the hospital than in the amphitheatre, Dziuban says he often sees first-year students “taking in the outdoors on our new benches. It makes me glad to know that there's a little something for future classes to enjoy—and glad that the Medical Families Fund was able to provide it for us.”

REUNION 2004

THEY CAME IN RECORD NUMBERS TO LEARN,
CATCH UP WITH FRIENDS, AND CELEBRATE

October's Medical Alumni Weekend 2004 was one of the highest attended ever, with more than 700 alumni and their families, faculty, and current medical students.

Weekend events included the Davison Club 35th Anniversary Celebration and tribute to outgoing chancellor for health affairs **Ralph Snyderman, MD, HS'65-'67**, the annual Alumni Awards luncheon, campus and medical center tours, a health policy discussion, and a CME program. A cocktail buffet and class dinners provided opportunities to socialize with former classmates and colleagues.

New for 2004 was the program, *A Clinician's View of Health Policy and Leadership*, with Kevin Schulman, MD, MBA, professor of medicine at the Duke School of Medicine and professor and director of the Health Sector Management Program at the Fuqua School of Business. Four Duke medical students—**Susan Kansagra, MD'04**, **Jeff Sung, MD'04**, **Jason Williams, MSIV**, and **James Floyd, MD'04**—described their trip to Washington, D.C., for a health policy tour. Three of the students received funding for the trip from the Medical Families Fund.

The weekend CME offering, *DukeMed Now: Latest Trends in Science and Medicine*, was moderated by **William J. Fulkerson, Jr., MD, HS'87, MBA'02**, with the following presentations:

- Victoria Seewaldt, MD, on detecting breast cancer risk in high-risk women,
- Eric Westman, MD, MHS, on the controversial Atkins Diet,
- Michael Cooney, MD, on patient care in macular degeneration, and
- **Joanne Kurtzberg, MD, HS'80-'83**, on human umbilical cord blood and stem cell transplantation and tissue repair.

Oktoberfest was the theme of the cocktail buffet, complete with German cuisine and spirits, as well as an audiovisual show featuring student and faculty photos from the many different reunion classes' time in medical school.

The Class of 1994 experienced a record attendance of more than 80 alumni for their 10th reunion. Class chair, **Lisa Ferrari, MD'94**, used new communications tools provided by the MAA. The special reunion class web page and broadcast e-mail, now available to all reunion classes, helped publicize private events for the class and encouraged communication and information sharing prior to the reunion. On Friday evening, **Amy Abernethy, MD'94, HS'94-'01**, and her husband, Steve, hosted a cocktail party at their Cary, N.C., home, complete with babysitters. On Saturday, the class and their families visited the North Carolina Museum of Life and Science for an old-fashioned North Carolina barbecue. They were joined by their medical school deans for their class dinner at the Siena Hotel. To wrap up the weekend, **Chris Woods, MD'94, HS'94-'97, '99-'02**, and his wife, **Suzanne, HS'94-'95, HS'98**, hosted a Sunday brunch.

The 2004 recipients of Medical Alumni Association Awards were featured in the Fall 2004 issue of DukeMed Alumni News. For photos and bios of these and previous awardees, please visit the MAA on the Web at <http://medalum.duke.edu>, and click on "Awards Program" on the left-hand navigation bar. ▼

Dr. Davison's School— the birth of Duke Medicine

DUKE
MEDICINE

EST. 1930

Even today, the stamp of founding dean, Wilburt Cornell Davison, MD, is evident in Duke Medicine's innovative approach to medical education, dedication to research, and commitment not only to excellent medical care, but also to advancing the practice of medicine in service to society.

In celebration of Duke Medicine's 75th Anniversary 1930-2005, here's a look back at the early days, 1891-1934, and Dean Davison's influence.

by Marty Fisher

1927

1891

Benjamin N. and James B. Duke

Dean Wilburt C. Davison, MD

"On all our walls under the paint, one finds inscribed, 'Davison was here.' He was a dynamic, informal, and humorous man." Jay Arena, MD'32

1891 – "Durham Fever"

Trinity College moves to Durham from Randolph County, and the community hopes the college will add a medical school and hospital. In ratio of physicians to population, North Carolina ranks 41st nationally. Fast-growing Durham lacks an adequate water and sewer system, and typhoid fever is so common it's referred to as "Durham fever" in more established cities like Raleigh and Charlotte.

1925 – The Great Gift

After four unsuccessful attempts to start a medical school and hospital at Trinity, industrialist James Buchanan Duke's philanthropy—an extraordinary bequest of \$4 million, part of a more than \$100 million gift to fund Duke University and The Duke Endowment—makes it happen.

1927 – A Leader

Wilburt Cornell Davison, MD, a pediatrician and assistant dean at Johns Hopkins University School of Medicine, is hired as the new medical school's first dean. Davison's Hopkins credentials, as well his pediatrics training—with its emphasis on epidemic disease and public health—make him the ideal candidate.

Getting off the Ground

Davison sets up offices in Bivins Hall. One of his first executive decisions changes the orientation of Duke Hospital (now the Davison Building) to take advantage of low ground to build additional floors. He also expanded the medieval-style windows to catch the breeze in the days before air conditioning.

Youthful Exuberance

Davison robs Hopkins to build a faculty. Like Hopkins's founding four physicians, all are under age 40. "Duke might not be able to find the equals of those Hopkins pioneers... (fortunately no one will know until after we are dead), but our best chance was men under forty..." wrote Davison.

July 1, 1930 – A Hot Time

Duke Hospital opens its doors to the public, and approximately 5,000 people tour the facility. It was, according to Davison, "the hottest day I have ever experienced. I lost six pounds and ruined a white linen suit showing visitors through the building and repairing overloaded elevators."

July 2, 1930 – Open for Business

Duke Hospital opens for patients with 17 of 400 beds filled on day one. Ward beds

cost \$3 per day, \$4 for semi-private rooms, and \$5 for private. By November, the patient census was up to 100.

Bring Your Own Doctor

Hospital patients with private and semi-private rooms, as well as clinic patients, were encouraged to bring their own physicians and pay their expenses.

Separate, but Equal

Duke's Outpatient Clinic opened from 1:30 to 3:00 p.m. for white patients, and 3:30 to 5:00 for "colored" patients. The price was \$2 per visit. If you brought your own physician, the clinic was free except for X-rays and special services.

Open-Door Policy

To help meet the critical need for continuing medical education, Davison extended an open invitation: "If any doctor wishes to spend a few days, weeks, or months reviewing his knowledge of medicine, surgery, obstetrics, pediatrics, or other branches, or if he has to do an unusual operation and wishes to refresh his memory of the anatomy involved, the facilities and equipment will be at his disposal."

1932

E. W. Robbins, MD'32
first female medical alumna

How to Build a Medical Library

“U” for Useless

Davison takes a radically practical approach to furnishing his medical library, which he called “more important than the building, faculty, and students.” Instead of relying on book-buying agents, he sends mimeographed lists of the collections of Hopkins, Rochester, Vanderbilt, and Boston Medical Libraries to book dealers throughout the world for bids. Simultaneously, the same lists are sent to colleagues who rank them “N” for necessary, “O” for optional, and “U” for useless.

Name Your Price

Davison set a limit of \$3 for books marked “N” and “O.” A \$50 exception was allowed for a rare book. “It was a profitable rule,” he wrote, “because a man from Texas wrote to me that his father, while a student in Germany, had bought a surgical book by Ambrose Pare, published in 1575. I replied that I knew that the book (*Oeuvres Chirurgicales*) was too valuable for us to buy because \$50 was our limit. He wrote, ‘Please send the \$50.’” At the time, *Oeuvres Chirurgicales* was worth more than \$1,000.

Bargain Hunting

Thanks to a depressed market for books in Europe, Davison made the most of a \$100,000 appropriation from The Duke Endowment. He purchased most of his “N”s and “O”s from dealers in London, Leipzig, Berlin, Paris, and Amsterdam for his \$3 set price. With gifts from other institutions and individuals, Duke’s medical library accumulated more than 20,000 volumes in a few short years.

The Reading Germ

Denying students entrance to the stacks is “an evil inherent in many libraries,” wrote Davison. “This custom...makes it impossible for [the student] to become contaminated by [a book’s] neighbors while he is pulling it off the shelf.” The Duke medical library, built by enclosing an open courtyard, contained a central reading room and open stacks. A 1934 American Medical Association Survey indicated that Duke students were national leaders in checking out books.

“Intelligence and Character, Plus Two Years of College Work”

An entire page of the *Duke Medical School Bulletin* of 1930 is devoted to detailing 12 reasons why DukeMed required two, not four, years of college. Basically, Davison valued hands-on experience over classroom learning, and he understood the practical value of getting young physicians into the workforce. Besides, he wrote, “there is no relationship between the *quality* of a student’s intelligence and the *quantity* of hours spent in college.”

Equal Opportunity

From the beginning, women were accepted to Duke “on the same terms as men” as stated in the *Bulletin*. There was one woman in the group of third-year students who entered DukeMed in 1930 and graduated in 1932, and three in the entering class of 1930, one of whom dropped out.

“An Ultra Persimmon”

Eleanor Easley, MD'34, wrote that while the faculty treated women “wonderfully well,” classmates and colleagues were less friendly. “We were tolerated, usually politely, then avoided, if possible,” she wrote. “One

1930

1931

Hart's Surgical Gowns Protect Against UV Exposure

assistant resident's regular greeting was 'I'm an ultra persimmon to 'rd medical women.'" After graduation, even Duke was reluctant to accept women as interns. Wrote Easley, "...the Professor of Medicine declared 'No women and no married students will be accepted.' But Dr. David Smith, Professor of Bacteriology, managed to get me accepted anyway." Easley credited "chance, good luck, and a tolerant husband," for her later successful career as a Durham physician.

The Three-Year Plan

Duke's longstanding tradition of curriculum innovation started with Davison. Instead of the standard four years with four months of summer vacation, he offered an optional "three-year plan." Duke medical students could start October 1, with three 11-week terms separated by week-long vacations in December, March, and June, with September off each year. They could then graduate in three years, and Davison hoped they'd devote a year to internship.

Work Ethic

Another page of the *Bulletin* argues the case for Duke's "continuous curriculum" over the standard. In addition to time savings and continuity, Davison cited the value of "seeing the clinical material peculiar to the summer months." He had little patience for concerns about overwork and heat: "It has been said that a medical student cannot endure physically the work of 44 weeks a year," wrote Davison. "If so, he probably should enter some less arduous occupation..."

Linen and Silver

The cost of a Duke medical education, including tuition, room and board, and expenses in 1930 was around \$300 a year. From 1930-32, medical students had rooms in Duke Hospital and enjoyed "delicious meals with faculty and house staff," complete with tablecloths and silver, according to **Jay Arena, MD'32** a member of the first graduating class and subsequent pediatrics chairman.

Spaghetti and Poker

Arena also remembered using a sterilizer in an unused operating room to make spaghetti at 3:00 in the morning. "Martin Conti, whose heritage was Italian, and I would argue about whose mother's sauce was best," wrote Arena. "Poker was a favorite pastime among faculty, house staff, and the few students who had any money," Arena continued. "'Dr. Canfield, Dr. Canfield,' over the loud-speaker indicated to all that a poker game was in progress in the house staff lounge on the third floor. If it was 'Dr. Rokitanski, Dr. Rokitanski,' it meant that an autopsy was about to be started."

Purple Jesus

According to Davison, "Prohibition was the cause of many alcohol thefts at Duke by employees and students. The former usually sold it, and the latter drank a mixture of alcohol and grape juice called Purple Jesus. They also made their own beer. Adding flourescein to the ward alcohol soon stopped those thefts, but the unadulterated pharmacy

and pathology alcohol was in constant demand. The Hopkins students even drained it from the museum specimens."

Problem Solving

Infections in patients were a problem at Duke and other hospitals. Deryl Hart, MD, professor of surgery, investigated and discovered that while patients, surgeons, instruments, and supplies were sterile, operating room air contained staphylococcus aureus from the nasal passages of operating room staff. He installed ultraviolet lamps to kill the germs and reduced the rate of infection from 33 to 3 percent. To protect staff from radiation, Hart experimented with gowns like the ones above.

The Compleat Physician

Started at Hopkins in 1919 as a notebook of easily forgotten facts and methods, Davison's book, *The Compleat Physician*, was published in eight editions and several languages. Similar to today's *Idiot's Guides*, he took the name from popular "how-to" book titles of the day. It was said to be the only medical book available after the surrender at Bataan during World War II, and used at Cabanatuan, Philippines, to calculate the dietary needs of the 13,000 American prisoners of war. The dust jacket price was \$4.25 cash or \$4.50 on credit; "money back if desired."

1932

1933

1933—Early Success

Less than four years after Dean Davison welcomed the first medical students, Duke School of Medicine ranked among the top 20 medical schools in the country, according to the American Medical Association.

Sheela Agarwal, MSIII

Helping Her Classmates—One Step at a Time

One student's common-sense ideas benefit fellow students

by Jeni Lyttle

Even small adjustments can make a big difference in patient outcomes—physicians learn that early on. Third-year medical student Sheela Agarwal applied this philosophy to improve the day-to-day lives of her often exhausted and overextended classmates—and likely to those in future classes, as well.

At 16, Agarwal, a 24-year-old from Orlando, Fla., came to Duke to pursue a double major in economics and biology. She later earned a master's degree in economics. Although she has not yet chosen a medical specialty, she's spending her research year examining drug-induced liver injuries as part of an eight-institution study in which Duke is participating.

It's hard to imagine how she found the time, but not long after beginning medical school, Agarwal began confronting small problems that had a big impact on the daily lives of her fellow students.

Slashing Textbook Costs

If you're reading this article, chances are you're well aware of the skyrocketing price of textbooks—particularly medical textbooks. You also probably know that medical students typically need each textbook for only the six-eight weeks of each rotation.

Agarwal determined that students who purchase the recommended two to four textbooks new spend, on average, about \$1,200 per year. Without the books, she says, students are at a disadvantage to their peers nationwide. After some investigation, she devised a textbook-exchange program in which students chipped in

as a group to buy textbooks in bulk from online merchants like Amazon.com.

"I created a system that enables us to exchange the books among ourselves based on our rotation schedules," Agarwal explains, adding that students are responsible for returning the books after their rotations are over. "It ended up costing each person \$66 for a whole year's worth of books, and each person has the appropriate books for the rotation he or she is on at the time."

The program, which was implemented for the first time in 2004, is receiving rave reviews from participants. Agarwal no longer has to store all the textbooks in her apartment—they now reside at the Medical Center Library.

Midway through the program, Agarwal sent out a feedback form to the class and reports that "every response has been positive, and all of my classmates said they would recommend this program to other classes."

Digitizing Tests

Another positive change that Agarwal has been instrumental in bringing to fruition concerns class tests that are passed down from upperclassmen to underclassmen. A longtime tradition at Duke, she says, is the "big sib" assigned to each underclassman, who passes along a year's worth of tests for study purposes—along with all the tests that the upperclassman inherited from his or her big sib, and so on.

A good idea, yes, but not very practical when you consider that—until Agarwal worked to coordinate a change—each person was responsible for an increasingly heavy box of disorganized paper-copy tests.

"Because this tradition started in the 1970s—if not earlier—some of those boxes weighed about 50 pounds," Agarwal says. "And because some big sibs are more organized or dedicated to the effort than others, there's a lot of inconsistency in what the test files contain"—not to mention that tests passed down from students who did poorly aren't much help to those in later classes and, because class sizes differ, all students don't necessarily receive a test file.

"These test files are a huge way we study, and this system was just not very equitable the way it was," Agarwal says. "And in this day and age, there's no reason why all this information can't be computerized."

So she and classmate Jason Langheier compiled a "best of" collection of tests from over the years,

accepted some small financial donations from classmates, went to the local copy center, scanned all the tests, and posted them online.

Although they have had no official institutional support for their effort—the newly created standardized master test file lives on Langheier's personal website—at least the days of students schlepping heavy boxes of hard-copy tests are over...providing that students in future classes maintain the effort.

"I really hope someone will pick up where I leave off," says Agarwal.

A Heart for Her Home

Agarwal has other projects she'd like to get off the ground, as well. They include the creation of an official university website containing student feedback about courses and clerkships—an unregulated, unofficial version of such a site currently lives on her personal website. She would also like to raise funds for new furniture to replace the run-down couches in the Duke North student lounge.

Agarwal has also initiated an effort to get scrub cards for all medical students. During certain courses and rotations—OB/GYN and surgery, for instance—students are assigned free temporary scrub cards. They check out scrubs and return them for a clean pair as needed. Other courses require the \$25-a-pair scrubs, but don't issue scrub cards.

To avoid this cost, students at many medical institutions with similar policies are notorious for simply "forgetting" to return the scrubs they check out. They launder them themselves and keep them on hand.

Agarwal conducted an anonymous survey asking how many scrubs her classmates have that they don't plan to return, and of the 86 responses she received, the average student has four pairs—or \$100 worth—of scrubs. She says it seems clear that Duke would save—not lose—money by issuing scrub cards to all medical students.

A go-getter in every sense of the word, Agarwal says she likes to be efficient and is always looking for ways to make improvements.

"After spending eight years at Duke, it's like my home—and because the administration and faculty do such a great job of setting everything up for us, I'm happy to do what I can to make things better for my classmates and the classes that will follow," she says. "It's absolutely worth my time and effort." ♥

Lyndon Jordan, T'57, MD'61, has a roomful of students enthralled as he describes, then locates student Asad Shah's internal organs. Observing, from left, are Robert Jones, Crystal Reynolds, Michael Rhodes, Serena Tan, Lisa Nowell, and Cooper Wriston.

A Week on Faculty

Alumni Participate in Pilot Program

by Marty Fisher

Three Duke Medical alumni recently had the experience of being Duke medical faculty members for a week.

Lyndon Jordan, T'57, MD'61, **John Witherspoon, T'62, MD'66**, and **Betty Bradley, MD'79**, each spent four days, January 30-February 3, helping teach Duke Medical students physical exam skills. Each alumnus/a was paired with a Duke faculty member and assigned to one group of students for the week. After attending lectures on the major topics—vital signs, musculoskeletal and peripheral nerves, GI, cardiology, pulmonary, and ENT—small groups of students gathered with a faculty member (or alumni guest faculty member) and took turns practicing their exam skills on a fellow student.

All three alumni said they found the experience enjoyable and would be interested in trying it again. The pilot program, sponsored by the Medical Alumni Association in cooperation with Barbara Sheline, MD, director of the Practice Course for first-year students, and Colleen Grochowski, PhD, assistant dean for curriculum development, was offered to DukeMed alumni currently practicing internal or family medicine. Based on the success of this year's program, it will be offered again and possibly expanded next year, according to Ellen Luken, executive director of medical alumni affairs and external relations.

"We often get requests from alumni who are interested in interacting with current students and being a part of the Duke medical education mission," says Luken. "We hope this is the first of many opportunities to help alumni feel involved with our students and faculty."

Jordan and Bradley are both family medicine physicians. He is retired from private practice in Four Oaks, N.C., and she currently practices with Bladen Medical Associates in Elizabethtown, N.C. Both felt they brought a perspective and style from the world of

John Witherspoon, T'62, MD'66, observes as students *Rashmi Kudesia, left, and Lindsay Jones, right, take turns giving an eye exam.*

community practice that might be different from what students experience in Duke's academic environment.

Witherspoon is a professor of medicine and internist at the Medical College of Virginia. He enjoyed getting to know the students and suggested more informal out-of-class time—such as a lunch get-together.

The alumni—who were responsible for their own lodging arrangements—were in class from 8:00 a.m. to 4:30 p.m. most days, with an hour for lunch and Wednesday afternoon free. They were entertained at a dinner with faculty and staff on Sunday, and they had an opportunity to debrief with Medical Alumni Affairs and Development staff at a luncheon meeting on Wednesday.

If you would like more information about this pilot program, please contact Ellen Luken, executive director of medical alumni affairs and external relations at (919) 667-2515, or ellen.luken@duke.edu. ▼

Betty Bradley, MD'79, demonstrates the finer points of palpating the abdomen while students *Robert Hollowell and Lauren Kahn* look on. *On the table is student volunteer Melanie Greenman.*

ON THE SPOT

What do you remember most about camping out in K-ville this year?

Stumbling to the check-in line at 3 a.m. with my flip-flops on the wrong feet (somehow), slipping on a discarded piece of pizza, and landing on my backside in a puddle. At this point I seriously considered switching my loyalties to the football team. In the end, getting to watch Duke beat UNC in person more than made up for the soggy britches...

Drew Munro, MSI
Newport News, Va.

Our "community service" project was to complete some surveys those ambitious business students were taking during campout. Boy, did we have a good time messing with them...

Brandon Isariyawongse, MSI
Brownsville, Pa.

Finding out that I had gotten a ticket and would be going to the Duke/Carolina game.

Sean Heffron, MSI
Blacksburg, Va.

My first campout I didn't own a tent, so I slept in a folding lounge chair and a flimsy blanket. During the near-freezing night, fellow campers kept waking me up to see if I was still alive. In the morning I found out that my friend in the tent next door had been out partying all night, and I could have slept in there!

Jason Etzel, MSIV
La Mesa, Calif.

Medical students, from left, Sean Heffron, Drew Munro, Brandon Isariyawongse, and Dave Hostler endured sub-freezing temperatures, rain, sleet, and snow for basketball tickets this year. It all seemed worth it when Duke beat Carolina 71-70 in February.

Do you have a question you'd like to ask Duke medical students? Send it to jennifer.p.crumpler@duke.edu, and put "On the Spot" in the subject line.

Submit your class note online at <http://medalum.duke.edu>. You may also mail class notes to Duke Medical Alumni Association, Class Notes, 512 S. Mangum Street, Suite 400, Durham, NC 27701-3973, or send an e-mail note to dukemed@mc.duke.edu. Due to space limitations, we are not always able to publish all the class notes we receive for a given issue. If you didn't see yours in this issue, please look for it the next time. All class notes are posted on the Medical Alumni Association web site for six-months.

1940s

George W. Liles, T'42, MD'44, retired from practicing general surgery in 1990. He served as mayor of Concord, N.C., from 1993-2001—and was honored with the AMA's Nathan Davis Award for that service in 1997. He also received the 2004 Distinguished Service Award from the University of North Carolina at Charlotte and was named the Cabarrus Regional Chamber of Commerce Citizen of the Year in 2003. He lives in Concord.

Sam S. Ambrose, T'44, MD'47, HS'47-'50, '53, professor of surgery emeritus with the Emory University School of Medicine, is retired from practicing urological surgery and lists his current job title as "senior citizen." The father of sons, Stuart and Bruce, and daughter, Ann, he keeps busy by playing golf, farming, and caring for his wife, Betty. He lives in Atlanta, Ga.

Sherman H. Pace, T'44, MD'47, HS'47-'50—still practicing family medicine full time in Clearwater, Fla., where he also lives—has been recognized for his service to a number of organizations. He has three children and five grandchildren—"all with loads of college degrees," he reports.

Berry B. Monroe, MD'48, is retired, but spends time caring for patients in a free medi-

cal clinic near his home and doing medical mission work. Both his wife, Susan, and a daughter died in 2002. He has two sons, a surviving daughter, and three grandchildren and lives in Florence, S.C.

1950s

Norman H. Garrett, Jr., T'45, MD'50, HS'52-'54, has been retired from practicing medicine for 12 years. He and his wife, Rebecca, have lived on the same 30-acre farm in Greensboro, N.C., for more than 50 years—and enjoy their second home in North Myrtle Beach, S.C. He has four children, 16 grandchildren, and two great-grandchildren.

John L. Vogel, T'46, MD'50, is retired from practicing internal medicine. He enjoys playing golf, skiing, traveling, and gardening. His daughter, Jana, is a physical therapist; daughter, Lesley, is an actress and producer; and granddaughter, Hayden, an actress, portrayed the young Doris Duke in the movie, *The Secret Life of Doris Duke*. He lives in Winona Lake, Ind.

Wilma Jeanne C. Diner, MD'50, has retired from practicing radiology. She has three children—an electrical engineer, a mechanical engineer, and a psychiatrist—and three grandsons—one in college and two in high school. Active in volunteer work, she

teaches reading and Biblical Hebrew. She also enjoys exercising, overseas travel, and spending time with her friends and family. She lives in Little Rock, Ark.

Wilmer J. Coggins, MD'51, is the co-author and editor of *A Special Kind of Doctor*, a book about the 30-year history of the University of Alabama School of Medicine's College of Community Health Sciences. He and his wife, **Deborah, MD'51**, celebrated their 55th wedding anniversary last year. They live in Tuscaloosa, Ala.

Laurens N. Garlington, T'50, MD'53, practices anesthesiology at California Pacific Medical Center and has an interest in preventive nutrition. He and his wife, Joan, have two children and five grandchildren and live in San Francisco, Calif.

Horace B. Cupp, Jr., MD'55, HS'55-'56, '58-'64, has retired from practicing neurosurgery and says he "got out of the rat race and it's wonderful." He lives in Johnson City, Tenn., and enjoys traveling.

Eugene L. Komrad, MD'56, is semi-retired, but serves as the medical director of Quality Oncology in Sunrise, Fla. His son, Mark, is a psychiatrist in Baltimore, Md., and his wife, Audrey, stays busy doing enameling. He lives in Coral Gables, Fla.

George E. Bacon, MD'57, HS'57-'58, professor emeritus in the University of Michigan's Department of Pediatrics, was named the 2002 Pediatrician of the Year by the Michigan chapter of the American Academy of Pediatrics. He and his wife, Grace, a retired teacher, enjoy taking car trips to historic presidential sites around the country. They have three children—Nancy, a teacher; George, an engineer; and John, a writer, radio host, and hockey coach—and live in Ann Arbor, Mich.

Harold P. Schulz, Jr., MD'57, is retired from practicing ophthalmology. He enjoys spending time with his grandchildren, reading, and playing golf. He and his wife, Betty, live in Hillsborough, Calif.

Alan Solomon, BSM'56, MD'57, a hematologist/oncologist, is a professor of medicine and the head of the Human Immunology and Cancer Program at the University of Tennessee Graduate School of Medicine. He also serves as an American Cancer Society clinical research professor. His wife, Andrea Cartwright, is a yoga instructor and a religious studies master's degree candidate at the University of Tennessee. They live in Knoxville, Tenn.

W. Scott James, Jr., T'53, MD'57, HS'57-'58, a retired pediatrician, plays the trumpet in a 35-piece concert band. Son, **W. Scott, III, T'80, MD'84**, is an orthopedic surgeon in Rock Hill, S.C. He and his wife, **Christina, WC'53**, live in Atlanta, Ga.

Lawrence G. Thorne, T'54, MD'58, an allergy, asthma, and immunology specialist, practices with the McGovern Asthma and Allergy Clinic, PA, in Bellaire, Texas. Active in his church and with the Boy Scouts of America, he has three sons—all Eagle Scouts—and one daughter, a physician who practices internal medicine. His wife, Sandie, is a nurse. They live in Houston, Texas.

H. Courtenay Harrison, T'56, MD'59, practices with his son, Courtenay, Jr., at Endocrinology Consultants in Virginia Beach, Va.—and both father and son have received the annual American Diabetes Association award for their practice. Son Randy is in medical sales with Proxima and lives in Raleigh, N.C.; son Tom is an anesthesiologist at Henrico Doctors Hospital in Richmond, Va.; and daughter Carol Ann's husband holds a doctoral degree in mathematics and works with Morgan Stanley. He and his wife, Bobbie, have 10 grandchildren and live in Virginia Beach.

George A. Engstrom, MD'59, HS'59-'62, serves as the medical director for the Stonewall Jackson Training Center, North Carolina's first juvenile detention center. He received the Award for Outstanding Achievement and Honorary Membership from the N.C. Pediatric Society for his service in many capacities. A master gardener, he volunteers his time to the Cabarrus County Arboretum. He and his wife, **Linda, N'60**, have four daughters—Lisa, Andrea, Clarissa, and **Elana, T'96**, a

medical student at East Carolina University—and live in Concord, N.C.

Melvin Litch, Jr., MD'59, HS'59-'60, an ophthalmologist with the University of Tennessee Medical Group, Inc., in Germantown, Tenn., also serves as a clinical assistant professor of ophthalmology at the University of Tennessee Medical Center in Memphis. His wife, Debbie, is the executive producer of Theatre Memphis, the largest community theatre in the Southeast. They live in Germantown.

Melvin D. Small, MD'59, is retired from practicing gastroenterology. He and Judith, his wife of 42 years, have two children—Michael, a creative director for a national magazine, and Michele, a certified chef and registered dietitian—and one grandchild, Tyler. He lives in Palm Beach Gardens, Fla.

1960s

James E. Crymes III, T'57, MD'60, is retired from practicing radiology. He has traveled extensively with his family—to Mexico, Costa Rica, Panama, Egypt, Peru, and The Netherlands, among other countries. Daughter, Jenni, is married and lives in Tempe, Ariz.; son, James, and his wife live in Winter Springs, Fla., and expected their first child in November. He and his wife, Barbara, live in Orlando, Fla.

William W. Fore, T'57, MD'60, HS'61-'64, is retired from practicing endocrinology and nuclear medicine and now serves as a part-time JCAHO field representative. He lives in Black Mountain, N.C.

Edgardo A. Garcia, T'56, MD'60, is an OB/GYN in private practice in Lowell, Mass. He enjoys traveling in his free time. He and his wife, Millie, have four daughters—Rosanna, an architect; Johana, a certified public accountant; Rebecca, a physician; and Alexandra, a college senior—and live in Chelmsford, Mass.

John A. Feagin, Jr., MD'61, an orthopedic surgeon, was named a 2004 Distinguished Graduate of the United States Military Academy at West Point and was inducted into the American Academy of Sports Medicine Hall of Fame in 2003. He has three children—**Randle, T'83**; **Nancy, E'87**, who reached the summit of Mount Everest; and **Robert, T'96**—and lives in Kerrville, Texas.

Harry H. Summerlin, Jr., MD'61, is a professor emeritus with the University of North Carolina School of Medicine's Department of Family Practice. He enjoys gardening, church work, and his involvement with the Boy Scouts of America. He and his wife, Joyce, have two children and four grandchildren and live in Asheville, N.C.

Donald H. Frank, MD'62, who practices with the Neurosurgical Group of New Jersey, enjoys antiques, art, and playing golf in his spare time. He and his wife, Cynthia, have three grown children—Amanda, Brian, and James—and live in New York, N.Y.

William B. Waddell, MD'62, HS'62-'64, a retired assistant consulting professor, has been taking a year-long

boat-building course and is close to completing a 12-foot sailing and rowing skiff. He lives in Southport, N.C.

Edward L. Lewis, Jr., MD'63, HS'64-'67, is a dermatologist in private practice in Athens, Ga. He has four daughters and two grandchildren, with another one on the way. He and his wife of 25 years, Beth, live on a farm in Greensboro, Ga.

Edgar J. Sanford, T'62, MD'65, HS'69-'72, a semi-retired urological surgeon, is a volunteer faculty member at the University of South Florida, where he teaches medical students and supervises residents in clinic and during operative procedures. A student of philosophy, logic and ethics, his primary interest is "tweaking the medical educational process in light of recent changes, i.e. genomics, computer science, and ethical and philosophical issues." A father of three, he and his wife, Barbara, live in Lutz, Fla.

Above, Markee and Sternbergh see patients in a village near Leogane.

▲ **Joseph Markee, MD'65**, and his wife, **Linda Markee, N'63**, spent seven weeks this past fall in Haiti assisting the victims of flooding in Gonaives, Haiti. Working with a disaster relief

team from Northwest Medical Teams International (<http://www.nwmti.org>), they saw more than 3,500 patients. They also traveled to Leogane, Haiti, to join a medical team from Rivermont Presbyterian Church in Chattanooga, Tenn., where Joe's classmate, **Chuck Sternbergh, MD'65**, and his wife Martha, were working as volunteers. The Markees live in Vancouver, Wash.

Todd M. Grehl, T'63, MD'66, is a cardiac surgeon in private practice in Rancho Sante Fe, Calif., where he also lives. His son, **Michael, T'00**, holds a law degree from the University of San Diego.

Rebecca T. Kirkland, WC'64, MD'68, a pediatric endocrinologist with the Baylor College of Medicine, was presented with the Department of Pediatrics' Arnold J. Rudolph Baylor Pediatric Lifetime Excellence Award in October. She and her husband, John, an avid windsurfer, live in Houston, Texas.

Geoffrey K. Sherwood, MD'68, is the chief of hematology-oncology at Boston's Faulkner Hospital and also works in the hospital's hematology-oncology clinic and

multispecialty group. He lives in Waban, Mass.

1970s

William R. Somers, T'66, MD'70, HS'70-'71, 74-'77, a hepatologist, serves as medical director of the Susquehanna Center for Liver Disease in Williamsport, Penn., where he treats heroin addicts with hepatitis and HIV disease. In his spare time, he enjoys cabinet making, farming, and fly fishing. He and his wife, Nancy, a geriatrician and nursing home medical director, have four children—Mike, an emergency room physician; Emma, a senior at Princeton University; Andy, a banker with Bank of America; and **Katie, T'06**—and live in Cogan Station, Penn.

Douglas S. Lloyd, T'61, MD'71, is the director of the Center for Public Health in Rockville, Md. Daughter, Jennifer, is an attorney; daughter, Deborah, is with American Express; stepson, Derek, is an assistant accounting professor at Colorado State University; and stepdaughter, Karlyn, lives at home. He serves on the vestry at Saint Peter's Episcopal Church, and he and his wife, Linda, live in Columbia, Md.

Elwood W. Hopkins III, MD'72, HS'72-'73, practices neurology and aerospace medicine. After completing a tour of duty at the U.S. Naval Academy, he and his wife, Judy, recently transferred to the Naval Medical Center in San Diego, Calif. In his free time, he enjoys kayaking, boating, skiing, and cooking. His three children are all married and work in the San Francisco area.

Mona M. Shangold, MD'72, HS'72-'76, is a gynecologist in private practice in Philadelphia, Penn. She lives in Moorestown, N.J.

Donald C. Watson, MD'73, is a pediatric cardiovascular surgeon and professor. In his free time, he is involved in humanitarian aid and enjoys golf and aviation. He and his wife, **Susan, MD'71**, a pediatric anesthesiologist, have three children—Kea, Katie, and Kirsten—and live in Memphis, Tenn.

Douglas R. Gnepp, MD'73, G'74, an anatomic pathologist with a subspecialty in head and neck pathology, serves as the senior surgical pathologist at Rhode Island Hospital in Providence, R.I., where he also lives.

James W. Mold, MD'74, is a professor of family and preventive medicine and the director of research at the University of Oklahoma Health Center. He lives in Edmond, Okla.

Bernard P. Scoggins, MD'76, practices internal and geriatric medicine with Albany Area Primary Health Care, Inc., and at his local community health center. He and his wife, the Rev. Nancy Scarbrough, live in Albany, Ga.

Michael P. Vincent, T'72, MD'76, serves as the chief of plastic surgery at both Shady Grove Adventist and Holy Cross Hospitals. His wife, **Mary, T'74**, is the office manager for his practice. They live in Potomac, Md.

1980s

David E. Ludlow, MD'80, an OB/GYN at Spanish Fork Clinic, is assigned to the Utah National Guard and serves as the surgeon for the 19th Special Forces Group (Airborne). He served in Afghanistan for two months in 2004 as the Combined Joint Special Operations Task Force surgeon in an outreach clinic, where he treated everything from arthritis to severe burns and amputations. He lives in Spanish Fork, Utah.

Capt. Richard J. Calvert, T'77, MD'81, an internal medicine specialist who practices clinically part time at the National Naval Medical Center, is a research medical officer with the U.S. Public Health Service at the U.S. Food and Drug Administration in College Park, Md. He helped treat a large number of U.S. Postal Service employees during the October 2001 anthrax scare and also treated veterans and their family members in a medical tent during the World War II Memorial dedication in 2004. A Cub Scout assistant den leader, Cubmaster, and swim team supporter, Calvert enjoys water skiing and lap swimming in his spare time. He and his wife, Norma—a substitute teacher and master swimmer—have two sons, John, 15, and William, 11, and live in Gaithersburg, Md.

Susan P. Lodewijks, T'78, MD'82, practices family medicine in a group practice in Pennant Hills, Australia, and also serves in her local hospital emergency room. In her spare time,

Save the Date!

2005 Medical Alumni weekend

October 27-29, 2005

If your School of Medicine class year ends in "5" or "0," 2005 is your reunion year.

Help celebrate
the 75th Anniversary
of Duke Medicine.

1930-2005

In addition to traditional reunion activities, the weekend will feature scientific and medical symposia and other events to celebrate the birthday of Duke Hospital and the School of Medicine.

Even if it's not your reunion year, all Duke medical alumni—graduates of the School of Medicine or former Duke house staff—are encouraged to attend. Registration materials will be mailed to reunion classes this summer. For information or to register online, please visit <http://medalum.duke.edu>.

Jorge L. Gamba, MD, HS'82-'86, has a passion for medical volunteerism. Not only does he love to serve, he wants to improve the experience of other volunteers and the quality of service they provide.

In 2000, Gamba joined an all-volunteer task force to address the worldwide shortage of capable, trained health volunteers in developing countries. As a result, the International Health Volunteers Organization (IHVO) was created. Currently, Gamba is involved in the promotion of IHVO's website to recruit and match medical volunteers with appropriate outreach programs.

Founded in 2001, IHVO is an international outreach program whose primary purpose is to establish an accessible pool of physicians and other medical experts who would like to volunteer in domestic and international short-term medical service projects. By establishing an easy-to-use online database of interested medical personnel and reputable organizations, Gamba hopes to increase physician volunteerism and reduce health disparities in impoverished countries.

On the website, users will find a search engine allowing them to search for a particular organization by different criteria and a forum for information exchange, education, training, and resources on overseas trips. Prospective volunteers can learn more by reading reviews written by physicians about specific projects and/or organizations. Ultimately Gamba would like to add a service to distribute medical supplies and equipment to projects or regions of greatest need. To find out how to volunteer with IHVO, visit the organization's website at www.internationalhealthvolunteers.org.

she enjoys swimming, coaching youth basketball, and making formal dresses for her daughters. She and her husband, **John, G'82, G'85**, who teaches economics at the University of New South Wales, have three children—Ben, Emma, and Rachel—and live in Thornleigh, Australia.

Mark Haas, T'77, G'82, MD'82, is a professor of pathology—with a specialty in renal pathology—at Johns Hopkins University. He and his wife, Lisa, live in Timonium, Md.

Lucy D. Moore, MD'83, practices internal medicine at the University of California San Diego Medical Center. She lives in La Jolla, Calif.

Carolyn F. Bannister, MD'85, is with Emory University's Department of Anesthesiology. In her spare time, she enjoys traveling with son, Lucas, 16, to golf outings. She and her husband, Terry, live in Stone Mountain, Ga.

Tony Rabassa, MD'85, practices radiology at South Miami Hospital in Miami, Fla. He and his wife, Maria, stay busy raising their three children—Andrea, Tony, and Laura. The family lives in Key Biscayne, Fla.

Jennifer Ruh, MD'86, is a practitioner and managing partner of Orchard Park [New York] Family Practice. She and her husband, Daniel Rider, have four children and live in Buffalo, N.Y.

Elinor A. Mody, T'85, MD'89, HS'89-'92, a rheumatologist on faculty at Brigham and Women's Hospital, has been working to institute a combined dermatol-

ogy/rheumatology referral center for psoriasis and psoriatic arthritis patients, with an emphasis on biologic therapies. She and her husband, David, co-founder of an Internet company, enjoy spending time with their five-year-old daughter, Hannah. The family lives in Newton, Mass.

Roger W. Farmer, MD'89, HS'89-'90, '93-'97, is an otolaryngological surgeon who practices in Gainesville, Ga. He has made medical mission trips to Mexico and is active as an elder and Sunday school teacher in his church. He and Barbara, his wife of 19 years, have three children—Danny, Sam, and Andrew—and live in Gainesville.

1990s

Robin G. Witkin, MD'90, a pediatrician, is a partner with Pediatric and Adolescent Care of Silver Spring. She and her husband, Scott, a software developer, have three children—Rachel, Alex, and Steven—and enjoy swimming together as a family. They live in Olney, Md.

Leslie D. Reynolds, MD'91, has a solo neurology practice in Kinston, N.C. She has two children—Brian and Chelsea—and lives in Kinston.

Tim D. Oury, MD'91, G'93, HS'94-'98, was recently promoted to associate professor of pathology at the University of Pittsburgh Medical Center—and his NIH grant was renewed. He and his wife, **Charleen Chu, MD'91, G'93, HS'94-'98**, are starting a program at the university called The Pathology Investigator Research

Track that is designed to train physician-scientists during their pathology residency training. The couple lives in Wexford, Penn.

Andrew M. Kaplan, MD'93, a pathologist, leads the coagulation laboratory at Cape Cod Hospital. He and his wife, Linda, live in Cotuit, Mass., and stay busy raising their toddler, Ryan.

George M. Verghese, E'89, MD'93, a pulmonary and critical care medicine practitioner, is the director of the Interstitial Lung Disease Clinic at the University of Virginia. He lives in Richmond, Va.

James Van Eaton, T'88, MD'94, HS'94-'00, a practicing partner with Urology of Atlanta, was president of the Atlanta Urological Society in 2003. He and his wife, Melissa, a pediatrician, live in Atlanta, Ga., with their daughter, Katie, and son, Jon.

Shannon B. Putman, MD'96, and her husband, Eric Neurmberger, welcomed their son, Jack, last March. He joins a brother, Charlie, two. Mom is taking some time off from practicing internal medicine to raise the boys. The family lives in Baltimore, Md.

Mark Ming-Yi Yeh, MD'96, is a radiologist with Huntington Memorial Hospital in Pasadena, Calif., where he also lives.

Anjali S. Advani, MD'96, HS'96-'02, a hematologist-oncologist and assistant professor with the Cleveland Clinic Foundation, is working on a national intergroup study of young adults with acute lymphoblastic

DUKE CME CALENDAR

COURSE	DATE	LOCATION	REGISTRATION
2005 Duke Radiology Review Course	April 10–15, 2005	Sheraton Imperial Hotel Research Triangle Park, NC	Debbie Sykes, 919-684-7228 sykes010@mc.duke.edu
Katz-Wilfert Update in Pediatric Infectious Diseases	April 16, 2005	Durham, NC	Michelle Merritt, 919-416-3457 merri026@mc.duke.edu
Teaching and Leading EBM: A Workshop for Educators and Champions of Evidence-Based Medicine	April 19-22, 2005	Durham, NC	Phyllis Scott, MDiv, 919-681-3009
Musculoskeletal Assessment for Primary Care Providers	April 23, 2005	Terry Sanford Institute of Public Policy, Duke University Durham, NC	Alison P. Toth, MD http://events.duke.edu/sportsmed
Duke Tuesday in Urology	April 26, 2005; July 19, 2005; and November 8, 2005	Durham, NC	Duke Department of Surgery Division of Urology, 919-684-2033
8th Annual Duke Cardiothoracic and Regional Update	June 25-28, 2005	Hilton Head Island, SC	Sherry Layton, 919-681-6753 layton003@mc.duke.edu

leukemia. She lives in Highland Heights, Ohio.

Tanya A. Wahl, MD'97, practices hematology-oncology with Overlake Internal Medicine Associates in Bellevue, Wash. She lives in Seattle.

Meera S. Garcia, MD'97, practices at North Atlanta OB/GYN. She is married to Dr. Paul Garcia and has two daughters—Violet, 5, and Chloe, 3. They live in Decatur, Ga.

Bari E. Levinson, MD'98, practices internal medicine with Kaiser Permanente in San Rafael, Calif., where she also lives. She was recently appointed the leader of 12 other physicians. She enjoys traveling and has been busy planning her upcoming wedding.

2000s

Brian A. Jaquette, T'94, MD'00, a pediatrician with the Indian Health Service in Shiprock,

N.M., married **Brandy M. Allen, MD'00**, an internist, in 2003. The couple lives in Shiprock, and they enjoy hiking, skiing, camping, and learning about Navajo history and culture.

Vanessa R. Cole, MD'00, is a cardiology fellow with the University of Alabama at Birmingham, where she also lives.

Carter J. Maurer, MD'00, is completing a residency in orthopedics. He and his wife, **Lauren Gist, MD'01**, live in San Diego, Calif.

Jesse L. West IV, MD'02, HS'02-'03, is completing an orthopedic surgery residency at the University of Wisconsin. He and his wife, Emily, welcomed their first child, Lydia, last June.

1940s

Joseph B. Parker, Jr., MD, HS'46-'48, has retired from practicing academic medicine, but continues to serve as a psychiatry consultant. He and his wife, Phyllis, have a son and a daughter and live in Durham, N.C.

Robert Grayson, MD, HS'47-'49, is a retired pediatrician. Active in the American Academy of Pediatrics throughout his career, he also served as the editor of the AAP's senior bulletin from 1990-2002. He lost his wife of 60 years, Shirley, in 2003, and stays busy these days "maintaining useful and necessary activities." His daughter is a radiation oncologist. One granddaughter is in her third year at Harvard Medical School; the other is in her third year of undergraduate school at Yale. He lives in Surfside, Fla.

William Dignam, MD, HS'48, professor emeritus with the UCLA School of Medicine, is retired from practicing OB/GYN. He lives in Pacific Palisades, Calif.

1950s

Robert P. Hummel, Jr., MD, HS'51-'52, a retired general surgeon, is an emeritus professor of surgery at the University of Cincinnati, where, at various times during his career, he led the medical center's trauma service, burn center, and breast consultation center—and also served as both vice chairman and chief of staff. He enjoys playing golf, fishing, swimming, and "enjoying life at the Ocean Reef Club" with Helen, his wife of 50 years. They have three children—one of whom,

son, **Robert P. Hummel III, T'83**, is a Cincinnati plastic surgeon—and six grandchildren, and live in Key Largo, Fla.

Robert D. Crouch, MD, HS'50, '53, '54-'56, is a urologist in private practice in Frederick, Md., where he also lives. He has performed more than 2,000 perineal and retropubic prostatectomies and is currently working to become proficient in cryosurgery. He still pilots the same twin-engine plane he has owned for 20 years. He has four children from his first marriage and two stepchildren with his present wife.

1960s

Norman Bauman, MD, HS'60-'64, lost his wife, Jean, in 2004. Although retired from practicing rheumatology, he serves as a part-time clinic physician and enjoys mentoring local high school students who are interested in research. He has three children and six grandchildren and lives in Tomkins Cove, N.Y.

Sanford Schneider, MD, HS'63-'64, is a professor of neurology and pediatrics at Loma Linda University School of Medicine. He and his wife, Joan Schneider, PhD, live in Riverside, Calif.

William B. Scroggie, MD, HS'64-'67, practices with Fort Worth Pediatrics, in Fort Worth, Texas, where he also lives. In his free time, he enjoys traveling and playing golf. He and his wife, Linda, have three grown children and four grandchildren.

David W. Robinson, MD, HS'66-'69, is retired from practicing psychiatry and enjoys spending his time traveling, exercising, and doing charitable activities. He and his wife, Barbara, a retired English teacher, have four children between them and live in Glastonbury, Conn.

Joel R. Temple, MD, HS'60-'61, '64-'66, is an allergist in private practice in Dover, Del. He has eight children—seven daughters and a son—and 14 grandchildren, with another on the way. Very active in his church, he also lives in Dover.

Curtis J. Krock, MD, HS'65-'66, is a retired physician with three part-time jobs: He serves as the associate medical director of the internal medicine residency program at the University of Illinois College of Medicine and the Carle Foundation Hospital, where he also serves as the chief of medicine and the medical director for respiratory care. Lately he has been working with medical residents to initiate quality improvement projects in the Carle Clinic. He spends much of his time caring for his wife, Ruth, who suffers from multiple sclerosis and has been confined to a nursing home for eight years. His son works for a software start-up company. He lives in Champaign, Ill.

Richard Obenour, MD, HS'60-'62, practices pulmonary medicine and serves as vice chairman of the University of Tennessee Department of Medicine. He and his wife, Mary, live in Knoxville, Tenn.

Kenneth C. Johnson, MD, HS'66-'70, who is retired from OB/GYN practice, spends one month a year as a missionary physician—most recently in Kenya. He enjoys traveling and playing golf in his spare time. He and his wife, Martha, have been married for 41 years and live in Carlsbad, Calif. They have three children and eight grandchildren.

Sigurd C. Sandzen, Jr., MD, HS'61-'64, an orthopedic surgeon, works part time at the Mather Field VA Hospital. A member of both the J. William Littler Hand Soci-

ety and the Dan Riordan Hand Society, he enjoys traveling, SCUBA diving, and reading in his free time. He and his wife, Pamela, were married in 2002 and live in Sacramento, Calif.

Samuel D. Spivack, MD, HS'62-'63, is a clinical professor emeritus with the UCSF School of Medicine. His daughter, Alix, is the executive director of the San Francisco Bay Ecology Association. He and his wife, Karen Spivack, MD, live in Sausalito, Calif.

Send us Your Memories!

To celebrate Duke University Medical Center's 75th Anniversary, we'd like to capture some of the flavor of DUMC down through the decades. Do you have a memory of a special faculty member, event on campus, learning experience, or just a recollection of what living and learning in Duke Hospital and medical school was like during your time here? Please help us recapture days gone by.

Send your memories via e-mail to marty.fisher@duke.edu or write to DukeMed Memories, 512 S. Mangum Street, Suite 400, Durham, N.C. 27701.

DUKE
MEDICINE

EST. 1930

Richard K. Shadduck, MD, HS'63-'64, a hospital-based physician who practices hematology-oncology and bone marrow transplantation, serves as the director of West Penn Hospital's Cancer Institute in Pittsburgh, Penn., where he also lives.

Richard Farquhar, T'52, HS'60-'63, an oral maxillofacial surgeon with the Medical Dental Center in Santa Fe, N.M., has served for two years as the president of St. Vincent Hospital's staff—and is the first dentist to hold that position. In his free time, he enjoys playing golf and tennis, fly fishing, and skiing. The father of four grown children from his first marriage and one child from his second marriage, he and his wife, Jennie, live in Santa Fe.

1970s

Claude A. Peter, MD, HS'78-'80, is a regional medical executive manager for Caisse Nationale d'Assurance Maladie, a public health organization in Brittany, France. He and his wife, Valerie, live in Bordeaux.

Russel E. Kaufman, MD, HS'73-'78, professor emeritus at Duke, is the president and CEO of The Wistar Institute and serves as the director of Wistar's National Cancer Institute Cancer Center. A national council member of the American Cancer Center, he also serves on the boards of Philadelphia's BioAdvance and Science Center, on the board of trustees of the city's University of the Arts, and as CEO council to the Greater Philadelphia Chamber of Commerce. He is spending most of

his time in Philadelphia these days.

Lance Lang III, MD, HS'75-'78, is the vice president and senior medical director of quality improvement and informatics with Health Net of California, Inc. He and his wife, Jalyn, live in Berkeley, Calif.

Lennart Fagraeus, MD, HS'74-'77, has stepped down after serving as Christiana Care Health Services' Department of Anesthesiology chair for 16 years. A professor at Jefferson Medical College, he is enjoying semi-retirement by "taking courses in subjects [he] never had time for before." Daughter, **Charlotte, T'89**, is a veterinarian; daughter, Louise, is a trauma/ICU nurse at Christiana Hospital. He and his wife, Elizabeth, will celebrate their 40th anniversary in July. They live in Wilmington, Del.

Frederick V. Minkow, MD, HS'66-'70, an orthopedic surgeon, practices with Bloomfield Hand Specialists in Bloomfield Hills, Mich., where he and his wife, Millie, live.

Donald A. Greeley, MD, HS'71-'77, practices pulmonary medicine—with a specialty in sleep disorders—at the Carle Clinic in Urbana, Ill. He and his wife, **Elizabeth, G'75**, a faculty member with the University of Illinois College of Veterinary Medicine, have two grown children—a chemical engineer and a mechanical engineer—and live in Urbana.

Jeffrey M. Ambinder, MD, HS'75-'79, an oncology/hematology specialist who founded the 25-physician Access

Medical Group, PA, serves as the medical director of the New York Cancer Center. He and his wife, Melanie, have eight children—ages three to 26—and live in White Plains, N.Y.

Richard D. Kane, MD, HS'71-'77, practices with Wake Urological Associates in Raleigh, N.C. He served as Rex Hospital's chief of surgery from 1998-2002 and began his tenure as president of the hospital's medical staff this year. His daughter, Catherine, is a sophomore at Florida State University. He and his wife, Susan, have been married for 21 years and live in Raleigh.

Malcolm G. Robinson, MD, HS'69-'71, is an emeritus clinical professor of medicine with the University of Oklahoma College of Medicine. Throughout the 1990s, he was closely affiliated with The Oklahoma Foundation for Digestive Research, a large non-profit gastrointestinal research organization that he founded and directed. For the last few years, he has been a self-employed research consultant and has continued active medical publication. He was honored with the 1995 Janssen Award for Clinical Achievement in Gastroenterology. He and his wife, Susan, an avid supporter of the symphony, live in Sarasota, Fla.

Sadye B. Curry, MD, HS'67-'72, an associate professor of medicine emerita with Howard University Hospital, is an active member of the U.S. Coast Guard Auxiliary. She lives in Potomac, Md.

1980s

Nicholas F. Zornek, Jr., MD, HS'77-'81, a private OB/GYN practitioner in Lewiston, N.Y., is the president of District 8 of the Medical Society of the State of New York. He lives in Lewiston.

Roberto A. Arguello, MD, HS'82-'83, an ophthalmologist in private practice in McAllen, Texas, specializes in corneal and external diseases. He and his wife, Cecilia, live in McAllen.

Jeffery G. Jennings, MD, HS'81-'83, is a pediatric cardiologist and clinical associate professor at the University of Tennessee Hospital. He lives in Knoxville, Tenn.

J. Dirk Iglehart, MD, HS'75-'84, the chief of surgical oncology at Brigham and Women's Hospital and the Anne E. Dyson Professor of Woman's Cancers at Harvard Medical School, leads the Harvard Specialized Program of Research Excellence in Breast Cancer. He and his wife, Elizabeth, have three children—Max, Annie, and Liz—and live in West Newton, Mass.

Barry M. Lamont, MD, HS'77-'81, a diagnostic radiologist who works exclusively on a locum tenens basis, says he is enjoying life as it flows by, rather than waiting until he is eligible for Social Security. He lives in West Roxbury, Mass.

Ross M. Ungerleider, MD, HS'79-'87, the John C. Hursh Chair of Pediatric Cardiac Surgery at Doernbecher Children's Hospital in Portland, Ore., is also the chief of Oregon Health Sciences University's Division of

Cardiothoracic Surgery. He and his wife, Jamie, present nationally about humanism in medicine, "medical marriages" and relationships, team-building, and conflict-resolution skills. They live in Portland.

Gail M. Cawkwell, T'84, MD, HS'88-'91, is with Pfizer Global Pharmaceuticals in New York, N.Y., where she serves as a medical director and development leader. She lives in Bedford, N.Y.

Judd W. Moul, MD, HS'88-'89, the developer of PSA screening guidelines for African-American men, was recently appointed chief and professor of urology at DukeMed. His wife, Ellen, has taken a position as an executive officer with the National Institute of Environmental Health Sciences in Research Triangle Park. They live in Chapel Hill.

Steven J. Ory, MD, HS'82, practices reproductive endocrinology and obstetric gynecology in Margate, Fla. Elected vice president of both the American Society for Reproductive Medicine and the Society for Humanism in Medicine, he and his wife, Kathy, live in Coral Springs, Fla.

Donald N. Ludlow, Jr., MD, HS'83-'88, a pediatrician with Seashore Pediatrics, PC, in Loris, S.C., was named Loris Healthcare System's 2004 Physician of the Year for the compassion and care he has shown to his patients and their families. He lives in Loris.

Mark A. Burns, MD, HS'87-'91, was promoted to clinical associate professor of psychiatry at the University of Texas

Health Science Center in San Antonio. He enjoys running, scuba diving, backpacking, and spending time with his wife, Margaret, and their sons, Andrew and Will. The Burnses live in New Braunfels, Texas.

Alan E. Seyfer, MD, HS'80, has been honored by his students with five teaching awards in the past two years—and 16 awards in the last 11 years. A distinguished professor of both surgery and anatomy, physiology, and genetics at the Uniformed Services University of the Health Sciences in Bethesda, Md., he is also a volunteer surgeon at Walter Reed Army Medical Center. He and his wife of 36 years, Glenna, have two grown daughters and live in Bethesda.

Andrew N. Antoszyk, MD, HS'83-'89, received the American Academy of Ophthalmology's 2004 Honor Award. The immediate past president of Charlotte Eye, Ear, Nose and Throat Associates, he serves as an assistant consulting professor at Duke Eye Center. He and his wife, Karen, live in Charlotte, N.C., with their two children, who are both nationally ranked tennis players. Brian, 17, is a National Honor Society member and National Merit Scholar semi-finalist, and Jennifer, 12, is an artist and straight-A student.

James Rice, MD, HS'81-'85, an OB/GYN, serves as the medical director of the Valley Women's Clinic in Renton, Wash., and the president of the Washington State Obstetrical Association. He enjoys mountain climbing, kayaking, and cycling. He and his wife, **Kim-**

ball, MD'84, have two children—Katie, 20, and Kristen, 18. They live in Mercer Island, Wash.

Michael H. Clayton, MD, HS'82-'85, is an allergy/clinical immunologist in private practice in Albuquerque, N.M., where he also lives. The governor of the regional, state, and local societies for Region 6 of the American Academy of Allergy, Asthma and Immunology, he also conducts clinical research with adolescent asthma patients in collaboration with the University of New Mexico Department of Psychology. He and his wife, Christine, have two children—Nicholas, 18, and Allison, 12.

Neil B. Hampson, MD, HS'84-'87, practices hyperbolic medicine at the Virginia Mason Clinic in Seattle, Wash., and served as the president of the Undersea and Hyperbolic Medicine Society from 2002-04. He and his wife, Diane, live in Mercer Island, Wash.

Richard L. Converse, Jr., MD, HS'87-'90, a specialist in cardiovascular disease, practices with the Presbyterian Heart Group in Albuquerque, N.M. He lives in Corrales, N.M.

Cary H. Meyers, MD, HS'88-'97, is a cardiothoracic surgeon with Cardiovascular Associates, PC, in Kingsport, Tenn., where he also lives with his wife of 18 years, Jeanne, and their three children—Lindsay, Melissa, and Michael. An assistant professor of surgery with the Uniformed Services University of the Health Sciences, he remains active with the U.S. Navy and serves as the director of surgical

services for Naval Reserve Hospital Great Lakes. He was recently recertified by the American Board of Surgery and will soon lead a humanitarian exercise to Antigua.

Rick F. Pospisil, MD, HS'80-'84, an orthopedic surgeon in private practice in Huntington Beach, Calif., enjoys world travel, spectator sports, and reading. He has three sons—Cameron, a junior studying pre-med at UCLA; Troy, a freshman at the University of California, Irvine, who recently started his own business; and Dean, a high school sophomore—and lives in Newport Beach, Calif.

Bjorn I.R. Carlborg, MD, HS'81-'83, an otolaryngologist, serves as the head physician of Malmoe University Hospital in Malmoe, Sweden, where he also lives. The father of five children ranging in age from seven to 27, he enjoys traveling and playing golf in his free time.

William L. Ebeling, MD, HS'85-'88, an allergy immunologist, is in private practice in Fresno, Calif. His daughter, Jenny, graduated Phi Beta Kappa with highest honors from Baylor University in 2004. He and his wife, Dianne, live in Fresno.

Bennett R. Hollenberg, MD, HS'82-'86, practices diagnostic radiology at Mecklenburg Radiologic Associates in Charlotte, N.C., where he also lives.

Kenneth Klein, MD, HS'88-'89, practices with East Carolina Dermatology in New Bern, N.C., where he also lives.

Ulrich Mennen, MD, HS'83, specializes in hand surgery at South Africa's Jacaranda Hospital. The secretary-general of the International Federation of Societies for Surgery of the Hand, he also serves as professor and head of orthopedic surgery at the Medical University of Southern Africa, where he has been recognized for being a top achiever. He enjoys reading about paleoanthropology and lives in Waterkloof, Pretoria, Republic of South Africa.

Joseph S. Moss, MD, HS'87-'89, practices nephrology in Latrobe, Penn. He lives in Greensburg, Penn.

Daryl G. Morriscal, MD, HS'81-'84, is the director of the critical care ICU at Medical Consultants in Muncie, Ind. In his spare time, he enjoys playing the guitar with his church worship team and learning to wakeboard with his two teenage sons and wife, Linda. They live in Yorktown, Ind.

Leland E. Garrett, Jr., MD, HS'79-'81, is a partner with Wake Nephrology Associates in Raleigh, N.C. He and his wife, Nancy, have three children—Katherine, a dentist; Christopher, and Jennifer—and live in Raleigh.

Randall M. Christenson, MD, HS'79-'83, practices geriatric psychiatry at Psychiatric Associates of West Michigan in Grand Rapids, Mich., where he also lives.

Ian Christoph, MD, HS'86-'89, practices cardiology with Cardiovascular Associates in Burlingame, Calif. He and

his wife, Lucile, live in San Francisco.

Patrick J. O'Connor, MD, HS'79-'82, is a senior clinical investigator with HealthPartners Research Foundation in Minneapolis, Minn. He and his wife, Kerin, live in St. Paul, Minn.

1990s

Eric D. Moffet, MD, HS'86-'90, is with Psychiatric Associates of Kingsport (Tenn.). He has two children—Charles and Melissa—and lives in Kingsport.

John N. Perry, Jr., MD, HS'88-'94, is a gastroenterologist with LeBauer HealthCare in Greensboro, N.C., where he also lives.

Cooper L. Terry, MD, HS'89-'95, practices orthopedic surgery with Oxford Orthopaedics and Sports Medicine in Oxford, Miss. He and his wife, Ginny, have three children—Virginia, Edward, and Annabel—and live in Oxford.

Joseph J. Van Nort, MD, HS'90-'94, practices internal medicine as a hospitalist with PrimeDoc of Asheville. In his spare time, he coaches youth baseball and basketball. He and his wife, Cindy, live in Fairview, N.C.

Amanda Carroll Rainwater, MD, HS'94-'95—formerly Margaret A. Carroll—is a dermatologist with Southwest Skin Specialists in Scottsdale, Ariz. She, her husband, Joel R. Rainwater, MD, and their daughter, Kendall, live in Scottsdale.

Pedro W. Baron, MD, HS'98-'00, an academic transplant surgeon at Loma Linda University

Medical Center, developed the medical center's laparoscopic living donor nephrectomy and pediatric liver transplant programs. Son, Juan, attends the University of North Carolina, Chapel Hill, and son, Carlos, is a high school sophomore. His wife, Margarita, is an elementary school Spanish teacher. They live in Redlands, Calif.

Konstantinos N. Malizos, MD, HS'88-'90, will serve as president of the European Bone and Joint Infection Society from 2005-07. He is an assistant professor at the University of Thessalis Medical School—where his wife, Evangellia, is a faculty member in neuro-ophthalmology. Son, Nikolas, a computer science graduate, hopes to attend graduate school at Duke; daughter, Angelliki, is in law school. He lives in Larissa, Greece.

James C. Yuen, MD, HS'90-'93, an associate professor with the Division of Plastic and Reconstructive Surgery at the University of Arkansas for Medical Sciences, was selected to join the American Association of Plastic Surgeons and was recently recertified in general and plastic surgery. He enjoys participating in 5K runs and spending time with his sons. He lives in Little Rock, Ark.

Adam R. Cutler, MD, HS'92-'95, a practitioner with Pediatric Associates, is the 2003-05 chief of Boca Raton Community Hospital's Department of Pediatrics. He and his wife, Debra, live in Boca Raton, Fla.

William N. White II, MD, HS'95, is an oph-

thalmologist with University Eye Specialists, PC, in Warsaw, N.Y. He and his wife, Laurie, live in Perry, N.Y.

David Holck, MD, HS'95, is the vice chair and residency director of the Department of Ophthalmology at the Wilford Hall Medical Center of Lackland Air Force Base in San Antonio, Texas. He edited and authored *Evaluation and Treatment of Orbital Fractures: A Multidisciplinary Approach*.

William G. Littlefield, MD, HS'91-'92, is a hand surgeon who practices with the Orthopaedic Institute of Dayton [Ohio]. He and his wife, Elizabeth, live in Dacula, Ga.

Gray Bowen-Swor, MD, HS'93-'96, practices radiation oncology in Sarasota, Fla., where she also lives with her husband, Dr. Michael Swor. In her spare time, she sails, plays golf, and enjoys her husband, six stepchildren (ages seven to 20), two dogs, and two parrots.

Jonathan J. Halford, MD, T'90, HS'97-'03, is an assistant professor of neurology who specializes in epilepsy and sleep medicine at the Medical University of South Carolina. He has passed the neurology and psychiatry board exams. His wife, **Heather, R'00**, a nurse, works with a cardiologist in Charleston, S.C., where they also live.

Mark W. Feinberg, MD, HS'94-'98, an associate physician and staff cardiologist at Brigham and Women's Hospital, where he is currently serving as principal investigator of a cardiovascular biol-

ogy laboratory. He and his wife, Lori, welcomed twin daughters, Sarah and Alyssa, in 2004. They live in Jamaica Plain, Mass.

Scott A. Anderson, MD, HS'93-'96, a family practice physician, founded Responicare, Inc., a health care delivery and consultation organization, in 2004. He previously served as chief medical officer for Pervea Health Plan in Green Bay, Wis. He and his wife, Annett, who live in Decatur, Ala., with their son, Seth, 3, expected their second child in January.

Stuart S. Winter, MD, HS'91-'95, a pediatric hematologist/oncologist, is the director of the pediatric specialty care unit of the Children's Hospital of New Mexico and an associate professor of pediatrics at the University of New Mexico. In his spare time, he enjoys trail running in the local mountains. He and his wife, Elizabeth, have three children—Catherine, 11, and Lucas and Matthew, 9—and live in Albuquerque.

Mark B. Silbey, MD, HS'85-'91, an orthopedic surgeon, is the director of Dartmouth-Hitchcock/Keene's sports medicine program and a consultant to the U.S. Soccer Federation. He lives in Walpole, N.H.

Amanda C. Trimpey, MD, HS'98-'99, is the associate medical director of Occupational Medicine Specialists in Wilmington, N.C. She and her husband, **Jeffrey Warhaftig, E'90**, have two children—Cameron, 9, and Rose, 6—and live in Wilmington.

Andrew W. Pippas, MD, HS'86-'92, who practices medical oncology/hematology, serves as the director of Columbus Regional Health System's John B. Amos Cancer Center and research program. He and his wife, Janette, have three children—Gabe, Ellie, and Grace—and live in Columbus, Ga.

Ravi Chari, MD, HS'89-'96, is an assistant professor of surgery and cancer biology at Vanderbilt University Medical Center. His wife, **Sharon Albers, MD, HS'89-'90**, is an assistant professor of medicine. They live in Nashville, Tenn.

Susan H. Wicke, MD, HS'89-'93, is a general adult psychiatrist in private practice in Durham, N.C., where she also lives with her husband, Michael, and daughter, Meriel.

2000s

Chris Aiken, MD, HS'00-'03, is a clinical psychiatrist in the student health services of both North Carolina Agricultural and Technology University and UNC-Greensboro, as well as with the Trinity Center, a Winston-Salem, N.C., Christian counseling center. He also sees inpatients at High Point Regional Hospital part time and maintains a private practice, through which he consults to the N.C. School of the Arts. He and his wife, Kelly June Hutcheson, a singer-songwriter, were married in 2003 and are now parents to twins David and Eleanor. They live in Winston-Salem.

Amy B. Heimberger, MD, HS'95-'02, a neurosurgeon, was to have

married Patrick Paul Davis in February. She lives in Houston, Texas.

Robert M. Levy, MD, HS'01-'02, is a pathologist at Naples Community Hospital in Naples, Fla. He lives in Hattiesburg, Miss.

Carolyn T. Oates, MD, HS'00-'03, is a staff psychiatrist—and also serves as a general physician—with the Durham VA Medical Center. She lives in Chapel Hill, N.C.

Radha Goel, MD, HS'99-'02, married Harsh Kachhy in 2004. She will complete a cardiology fellowship at the University of Maryland this year. She lives in Baltimore, Md.

Nicole D. Carter, MD, HS'99-'02, practices at The Pediatric Clinic in Opelika, Ala. She and her husband, Dr. Matthew J. Carter, have a son, Jackson, 1, and live in Auburn, Ala.

Pierre DeMatos, MD, HS'94-'01, practices general surgery with Regional Surgical Specialists in Asheville, N.C. A fellow of the Society of Surgical Oncology and a diplomate of the American Board of Surgery, he is also an initiate fellow of the American College of Surgeons. He and his wife, Monica, a pediatric nurse, live in Arden, N.C., with their son, Alexander.

Denis Hadjiliadis, S'01, HS'98-'01, practices academic pulmonary and transplant medicine in Toronto, Ontario, Canada, where he lives with his wife, Dr. Tara Morrison.

Bothwell Graham III, MD, HS'40-'41, died on July 11, 2003. A resident of Columbia, S.C., he practiced medicine for 50 years and was a distinguished U.S. Navy veteran of World War II. At the Veterans' Hospitals in Dallas, Texas, and Columbia, S.C., he was dedicated to treating the physical and mental illnesses of combat veterans. In Columbia, he established a private practice in general and internal medicine and served on the medical staffs of Baptist Medical Center, the Providence Hospital, Richland Memorial Hospital, and Fort Jackson Hospital. He was instrumental in creating the Mental Health Society of South Carolina, became its first president, and addressed the South Carolina legislature as an advocate for mental health services. A lifelong lover of classical and popular music, he was an accomplished pianist and accordion player, a consummate storyteller, and gifted public speaker. He is survived by his wife, Eleanor; one daughter, Eleanor; three sons, Bothwell, Kenneth, and Frank; two sisters; three grandchildren; and five great-grandchildren.

Jerome S. Harris, MD, died on January 19, 2005. He was the J. Buren Sidbury Professor emeritus and former chairman of the Department of Pediatrics at Duke University Medical Center from 1954-68. Harris joined the Duke faculty as a fellow in biochemistry in 1936. He was given a dual faculty appointment in 1937 in biochemistry and pediatrics and became Duke's first full-time pediatrician. He was called to active duty in World War II as a U.S. Army major and chief of communicable disease in the Duke Army reserve unit, the 65th General Hospital. After the war, he returned to Duke where he remained until his retirement. He was known for his work on Duke's pioneering research team that made notable contributions to the development of open-heart surgery. He is survived by his wife, Jacqueline, a retired Duke assistant professor of gastroenterology.

J. William Littler, T'39, MD'42, a surgeon who developed many techniques for restoring function and sensation to the fingers and wrist, died on February 27, 2005. He was 89 and lived in Manhattan, N.Y. According to family members, he died following a head injury suffered in a fall. Littler's early devotion to hand surgery contributed to its emergence as a separate discipline. During World War II, as a young surgeon in the U.S. Army, he operated on maimed soldiers at Cushing General Hospital, near Boston, and later at Valley Forge Army Hospital in Pennsylvania. Though he had yet to complete his residency training, he began shaping and refining surgical techniques still in use today. He worked on new ways to reconstruct missing thumbs, including replacing them with parts of forefingers, and he transplanted healthy bundles of nerves and arteries to areas that had lost feeling, a procedure known as a sensory neurovascular island transfer. To revive arms and hands paralyzed by nerve damage, he transferred tendons from areas that were unharmed. In the 1950s, Littler founded the hand surgery unit at what is now St. Luke's-Roosevelt Hospital Center, a teaching hospital of Columbia College of Physicians and Surgeons. Now called the C. V. Starr Hand Surgery Center, the unit was the first to devote itself to civilian hand injuries, according to the hospital. Hundreds of hand surgeons trained there under Littler. Littler was born in Manlius, N.Y., in 1915, and received his bachelor's degree and medical degree at Duke University. After a medical internship at Johns Hopkins Hospital, he enlisted in the U.S. Army. He then completed residencies in general surgery at The Roosevelt Hospital and plastic surgery at Presbyterian Hospital, now part of NewYork-Presbyterian/Columbia. In 1946, he helped found the American Society for Surgery of the Hand and was its president from 1962-63. His survivors include a daughter, Anne, of Paradise Valley, Nev., and a brother, Ted, of

Providence, R.I. His family also listed his longtime secretary, Joyce Jones Welles, among his survivors.

Robert Nickau, MD'39, HS'54-'56, died on January 29, 2005, of heart failure at age 90. A resident of Lakeland, N.J., he was the director of radiology for Morrell Memorial Hospital in Lakeland and later for Lakeland General Hospital, where he founded the School of Radiological Technology in 1965. He ran a practice of internal medicine for seven years in Jacksonville, Fla., and later became director of the Division of Radiology, Nuclear Medicine, and Radiation Therapy at Good Samaritan Hospital in West Palm Beach. Following his retirement, he was a radiological consultant at Bond Clinic for two years. He was also a veteran of World War II, where he was a battalion surgeon with the infantry. He preceded his wife of 65 years, Helen, in death by four days. He is survived by his sons, Robert and Douglas, and one grandchild.

Fred Schoonmaker, MD, T'53, HS'61-'65, died on January 5, 2005, at his home in Bozeman, Mont. One of the world's leading cardiologists, he is credited with developing procedures such as the use of lasers and stents for angioplasty. He also invented and patented many mechanical heart devices that are still in use today. After receiving a bachelor of science degree from Duke in 1952, he joined the U.S. Air Force and rose to the rank of major as a jet fighter pilot during the Korean Conflict, serving from 1953-55. Upon completion of his military service, Schoonmaker pursued his desire to become a cardiologist by earning a medical degree from the Colorado University Medical School. He completed post-graduate training as a chief resident in internal medicine at Duke University Hospital followed by fellowships in cardiology at Duke and the National Institutes of Health. During his medical career, he served as chief of the cardiovascu-

lar section and assistant chief of internal medicine at the Veterans Administration Hospital in Durham, N.C. He later practiced at St. Luke's Hospital in Denver, Colo., and launched the hospital's cardiovascular laboratory. He is survived by his wife, Jan; six children; and 14 grandchildren.

T. Duncan Sellers, Jr., T'36, MD'50, died on October 27, 2004, at the age of 89. He resided in Colorado Springs, Colo. After college, he served in World War II in the U.S. Army Air Corps, for which he was awarded a Distinguished Service Cross, a Distinguished Flying Cross, the Air Medal, and the Purple Heart. After the war, he earned a medical degree at Duke. He then joined the U.S. Army and was stationed in Japan, where he was in charge of patients undergoing rehabilitation and oversaw the care of amputees injured in the Korean War. Upon his military discharge, he moved his family to South Carolina, where he trained to perform specialized hip surgery, and then to Decatur, Ga., where he learned new techniques in pediatric surgery. He later lived in Silver Spring, Md.—serving as a surgeon at Walter Reed Army Hospital—and Nuernberg, Germany.

Alwyn A. Shugerman, MD'46, died on November 7, 2004. In 1952, he entered private practice in internal medicine in Birmingham, Ala. He also held appointments on the staffs of St. Vincent's and Highland Baptist Hospitals and a clinical appointment at the University of Alabama School of Medicine. In 1977, he joined the faculty of the Department of Medicine at the University of Alabama School of Medicine. He created the Division of General Medicine, where he served until his retirement in 1992 and was appointed professor emeritus. He continued clinical practice at The Kirkland Clinic until 1995. He is survived by his wife of 46 years, Elna; one son, Harry; two daughters, Anne and Nancy; two grandsons; and one brother.

David L. Spanel, MD'58, died on June 8, 2004. A retired surgeon, he lived in Princeton, N.J. His family remembers him as an avid outdoorsman who loved hiking. He was also a collector of paintings of Maine and a runner who competed in races well into his 70s. He is survived by two former wives, four children, and three step-children.

Thomas B. Watt, Jr., MD'53, died on February 9, 2005, in Conroe, Texas. A native of Hartsville, S.C., he was known as a man passionate in his faith and church and resolute in his science and medicine. He is survived by his wife of 54 years, Anne; two daughters; four sons; 27 grandchildren; and two great-grandchildren.

William Glenn Young, Jr., T'46, MD'48, HS'57, Duke professor emeritus of surgery, died December 21, 2004. In addition to his undergraduate and medical degrees, he completed a residency and spent several decades on the faculty. Young was a pioneer in the development of hypothermic cardiopulmonary bypass and performed the first successful aortic valve replacement for acute bacterial endocarditis. He also was the first to perform a coronary artery bypass procedure at Duke University Medical Center. He was a founding member of the Southern Association for Vascular Surgery, president of the Southern Thoracic Association, and a member of, among other professional organizations, the American College of Surgeons, the Southern Surgical Association, and the North Carolina Surgical Association. He served as a lieutenant in the U.S. Naval Medical Reserve during the Korean War. He was a deacon and elder in the Presbyterian Church and a member of Blacknall Memorial Presbyterian Church in Durham. He is survived by his wife, Frances Shields Young; son, William Glenn Young III, and his wife, Colleen S. Young, of New York City; daughter, Sally McElwee, and husband, Thomas B. McElwee, of Charlotte; daughter Ellen Hull, of Locust Valley, N.Y.; son, John Weaver

Young, and wife, Margaret F. Young, of Durham; and eight grandchildren. The family has requested that memorial gifts be directed for medical scholarships to The Fund for DukeMed, 512 S. Mangum Street, Suite 400, Durham, N.C. 27701-3973 or to Caring House, 2625 Pickett Road, Durham, N.C. 27705.

Reunion Honor Roll

I'd like to extend a big salute to DukeMed alumni for making 2004 a championship year! Members of the 2004 reuniting classes and the Half Century Club committed a total of \$2.4 million to Duke University Medical Center, which includes \$685,150 in unrestricted support for the Davison Club and The Fund for DukeMed.

My most sincere appreciation goes to each gift participant, Half Century Club chair Dr. Paul Cook, and all of the class agents and reunion chairs whose hard work and generosity made the 2004 Reunion Gift Program a tremendous success.

Thank you,
R. Sanders "Sandy" Williams, MD'74, HS'77-'80
Dean, School of Medicine

Alumni to Future Alumni—A Legacy of Support

FOR 35 YEARS, DUKEMED ALUMNI HAVE SUPPORTED THE NEXT GENERATION OF DUKE DOCTORS THROUGH THE DAVISON CLUB AND THE FUND FOR DUKEMED.

The Davison Club turns 35 this year. To celebrate, we've set a goal of 1,000 members. Please consider joining the Davison Club for 2004-2005. Your \$1,000 gift of unrestricted support provides scholarships, research funds, and educational enhancements. I thank you, and tomorrow's Duke Doctors thank you.

R. Sanders "Sandy" Williams, MD'74, HS'77-'80
Dean, School of Medicine

If you graduated between 1995 and 2004, joining the Davison Club just got easier. Our new recent graduate rate is just \$500 annually.

Pledge or pay online at <http://fundfordukemed.duke.edu>.
