February 2008

Issue #316

Renovations at the Library

Pat Thibodeau, Associate Dean for Library Services & Archives

Over the next several months, major changes will be happening in the Medical Center Library.

To free up the Second Stack Level (i.e., the top floor of the Library), we will be storing older books and journals in the Duke University Library Service Center (LSC), located off Briggs Avenue. This preservation-quality storage facility holds millions of volumes and has an efficient retrieval system. We are currently analyzing the book and journal collections to determine which items must stay in the Library due to currency or high use and which can be stored. Some materials that are duplicated elsewhere on campus or that have rarely been used will be withdrawn from the collection. Once we have completed moving materials to the LSC, the journal and book collections will be consolidated on the First Stack Level.

What will remain in the Library?

- ▶ Journals from 1985 to the present, if they are not available in electronic format
- ▶ Books from 1995 to the present
- ▶ Heavily used books published before 1995
- ▶ Series indexed by MEDLINE from 1985 to the present
- ▶ Core historic journals such as *JAMA*, *Lancet*, *BMJ*, and the *New England Journal of Medicine*

What will go to storage?

- ▶ Journal volumes published before 1985
- ▶ Indexes that are now online
- ▶ Older volumes of series published before 1985
- ▶ Books published before 1995 that are of historic interest or represent core titles in certain disciplines

Why are we doing this?

Duke Medicine is in dire need of office space, so the Library's top floor will be converted into offices. The First Stack Level will be filled with current books and journals. The group carrels and conference rooms on the top floor will be relocated to other areas of the Library, such as the Mezzanine Level.

In addition to these changes, the Library will be exploring the feasibility of creating other user spaces, such as a coffee shop and informal gathering areas. Additional restrooms may be placed on the Entrance or Mezzanine Levels as well.

Tea With Trailblazers

Jessica Roseberry, Medical Center Archives

This year as part of our Black History Month celebration in February, three special guests will share stories of their experiences as African-American “trailblazers” at Duke: **Dr. Brenda Armstrong**, Associate Dean of Medical Education, Director of Admissions, and Associate Professor of Pediatric Cardiology at Duke Medicine; **Dr. Joanne Wilson**, Professor of Medicine in the Division of Gastroenterology at Duke Medicine; and **Dr. Thelma Brown**,

President and CEO of Central Homehealth, Inc., and Central Family Home. This year’s event will be held on **February 7, 2008**, from 2:30 - 4:00 pm on the Duke Medical Center Library’s Mezzanine Level.

The public is invited to attend and will have a chance to ask questions of the panelists. Tea and other refreshments will be served at 2:00 pm. Admission is free. For more information, please contact **Jessica Roseberry** at (919) 383-2653. A summary of last year’s event is available on our Website at <http://www.mclibrary.duke.edu/about/news/ln04-07.html#tea>.

Celebrating Black History Month

Did you know that Dr. Daniel Hale Williams (1856-1931) performed the first successful open heart surgery in 1893 or that Mary Eliza Mahoney (1845-1926) was the first Black professional nurse in the United States? In honor of Black History Month, the Medical Center Library revisits “Black History Month: A Medical Perspective,” a popular display first exhibited in 1999. This virtual exhibit (<http://www.mclibrary.duke.edu/hom/exhibits/blkhist>) contains a wealth of information including a chronology of achievements of African Americans in medicine, a section on folk medicine, and a selective bibliography.

Mary Eliza Mahoney

[Renovations in the Library, continued from page 1](#)

When will the move start?

We will start moving materials around February 18th, and it will take about six weeks to complete the move. There may be a period of two to three weeks when the stacks will be closed, but staff will retrieve materials for you during this time.

How will you access stored materials?

You will be able to request books through the online catalog, and they will be retrieved within one working day during weekdays. In the case of journals, the Library will be trying a FREE copy service for all materials stored off site. Library staff will scan materials at the LSC and deliver them to you in digital format. We will offer this as a free service for three to four months to assess the volume of requests. You can continue to request the materials through the online interlibrary loan and document request form on our Website at <http://illiad.mclibrary.duke.edu/>.

It may take awhile for all the materials to be processed at the LSC storage facility. In the interim, the Library will obtain copies for you through interlibrary loan.

Normal photocopy and printing fees will be charged for all materials that remain in the Library or that are available in electronic format.

This is a big change for the Library and our users, so we ask for your patience as we go through this transformation.

**Renovations
Underway**

NIH Public Access Policy Now Mandatory

Pat Thibodeau, Associate Dean for Library Services & Archives

In December, 2007, Congress passed and the President signed the Consolidated Appropriations Act (PL-110-61). This law included language which made the National Institutes of Health (NIH) Public Access Policy mandatory and compliance to it a statutory requirement. The law becomes **effective April 7, 2008**, and states the following:

The Director of the National Institutes of Health shall require that all investigators funded by the NIH submit or have submitted for them to the National Library of Medicine's PubMed Central an electronic version of their final, peer-reviewed manuscripts upon acceptance for publication, to be made publicly available no later than 12 months after the official date of publication: Provided, That the NIH shall implement the public access policy in a manner consistent with copyright law.

Basic information about this new mandatory policy, as well as some links to important resources, are listed below. The Medical Center Library is working with Dr. Eugene Oddone, Vice Dean for Research, and others, to create a system to assist you in complying with this policy. Watch for more information about what you need to do and the services available to support you.

If your research or contract is funded by NIH, and you have an article accepted by a peer-reviewed journal, here is what you need to do:

- √ Ensure your copyright agreement with the journal publisher allows you to submit your article to PubMed Central (PMC). NIH has sample language at <http://publicaccess.nih.gov/FAQ.htm#c3>. Duke is working on suggested language as well.
- √ **[EFFECTIVE April 7, 2008]** Submit all peer-reviewed articles (that arise from funded research) upon acceptance of your manuscript. Please note that submitting “upon acceptance” is a major change from the initial policy.
- √ Submit your version of the final peer-reviewed manuscript, along with all graphics and supplemental materials, to PubMed Central (<http://www.pubmedcentral.nih.gov/>) using the NIH Manuscript Submission System (<http://www.nihms.nih.gov/>).
- √ The manuscript can be submitted by you, someone in your lab or office, or by the Medical Center Library.
- √ The article will be released to the public no later than 12 months after it is published. You may negotiate a shorter release time with the publisher when you sign the copyright agreement.
- √ **[EFFECTIVE May 25, 2008]** If you are submitting an application, proposal or progress report to the NIH, you must include the PMC or NIH Manuscript Submission reference number when citing applicable articles that arise from NIH funded research. The Library can help find PMC ID numbers for you.

For more information about the policy and what Duke will be doing to assist you, contact **Pat Thibodeau** at (919) 660-1150 or patricia.thibodeau@duke.edu.

Finding an Article

Brandi Tuttle, Public Services

The easiest way to find a known article is to choose the appropriate system (PubMed or Ovid for biomedical literature and CINAHL for nursing or allied health literature) and follow the steps below.

Searching for the Article

PubMed Single Citation Matcher

1. Open the Single Citation Matcher located on the left under “PubMed Services.”
2. Fill in as much information as you have (at least two fields) and then click the “Go” button.

Ovid Find Citation Tab

1. Click on the “Find Citation” tab above the search box.
2. Fill in as much information as you have (at least two fields) and then click the “Search” button.

CINAHL Advanced Search Tab

1. Select the type of information you have (title, author, etc.) from the drop down menu and type that information into the search box.
2. Fill in as much information as you have (at least two fields) and then click the “Search” button.

Not Finding the Article? If you can't find the citation you are looking for, double check your typing. Next, try adding or removing various parts of the citation since not all the information may be correct (e.g., you may have an incorrect year). Contact the Library for further help.

Accessing the Article

Used in PubMed, Ovid, Web of Science, Library catalog, CINAHL, etc.

The “GetIt@Duke” button provides options for acquiring the article such as links to:

- full-text options
- search the catalog of the Duke University Libraries
- request the article from a journal we don't own

Used in PubMed

The “DUMCL Online” button links to the electronic full text of the specific article. The “DUMCL Stacks” button indicates the article is held in print by the Library.

Need Help? Call the Library Service Desk at (919) 660-1100 or IM dukemceref.

Finding a Journal

Brandi Tuttle, Public Services

E-Journals Web Page

- This is the fastest way to access electronic journals.
- Click on the <http://www.mclibrary.duke.edu> button at <http://www.mclibrary.duke.edu> for an up-to-date list of full-text electronic journals to which the Medical Center Library subscribes.
- Journal titles can be browsed alphabetically or by subject, or you can search for a specific title.
- Additional information such as coverage dates, embargoes, or name changes will be listed with the title.
- Links take you directly to the journal's site, where you can browse available issues.
- This list primarily includes biomedical electronic journals. Check the Online Catalog for complete holdings.

Online Catalog

The Online Catalog contains records for print and electronic journals available at all of the Duke Libraries.

► Search for journals using the Journals/Serials Tab in the Basic Search Mode

- Begin by clicking on the “**Journals/Serials**” tab on the Basic Search screen.
- Select “**Title Keywords**” from the dropdown menu and enter as many words from the title as you know.

► Viewing summary information from the results list

- Links to the electronic journals are provided under *Electronic Resource*. Clicking on one of these links will lead you to the journal's site, where you can browse available issues.
- *Shelf Location* provides a list of print holdings. To view journal volumes and issues that we own, click on “Medical Center Library: Journal Stacks.”
- If both electronic and print versions of the journal are available, you may see separate, adjacent records in the results list.

#	Author	Title	Format	Year	Location/Call No.
1	Chicago, Ill. : American Medical Association, c1969-	Archives of internal medicine symposia	Serial	1969	Shelf Location: Call No.: Medical Center Library: Journal Stacks
2	[Chicago]American Medical Association.	Archives of internal medicine [serial].	Journals	1960	Electronic Resource: Journals@Ovid_1996-2003 Archives of internal medicine, Nov. 1998- Shelf Location: Call No.: Perkins/Bostock Library: Internet Resource Perkins/Bostock Library: Internet Resource.Ovid Medical Center Library: Journal Stacks
3	Chicago, Ill. : American Medical Association	Archives of internal medicine [electronic resource].	Journals	1960	Electronic Resource: get #9 Duke

Tips and Reminders

- Some materials, such as serial monographs, may not be indexed as journals in the Catalog. If you do not find the journal you are looking for, try broadening your search by using the “Full Catalog” tab.
- If we do not have the item you are looking for, you can request it via Interlibrary Loan. Connect to <http://www.mclibrary.duke.edu/services/mcldd.html> for instructions and fee information.
- Current print journals and bound journals with titles beginning with **A-C** are located on the **First Stack Level**, and those beginning with **D-Z** are on the **Second Stack Level**. Note: Once our renovations have been completed, all journals will be shelved on the First Stack Level. Please see our cover story on page 1 for more details.

Staff News

Anne Powers and Hattie Vines, Information and Education Services Librarians, recently coauthored articles in the *Journal of Family Practice*, as part of the Clinical Inquiries series from the Family Physicians Inquiries Network (FPIN). In this network, librarians team up with physicians to review a topic and publish an evidence-based answer to a clinical question. Hattie's topic was focused on which technique for removing nevi was the least scarring, while Anne's focus concerned the evaluation of an adult with a testicular mass.

Text Us by Cell Phone

In addition to being able to contact us by email, phone, and IM, you can now send us a text message!

1. Initiate a new text message
2. Type *dukemclref: then your question*
Don't forget to include the colon between your question and our name!
3. Send to 265010 (normal texting fees apply)

The reference librarian on call will receive your message and send an answer back to your cell phone.

This service is available Monday through Friday from 9 am - 5 pm.

Launch of Mystery Photos Project

Jessica Roseberry, Medical Center Archives

The Duke Medical Center Archives and the Duke Medical Alumni Association have launched a joint project that will give Duke Medicine alumni and other interested persons the chance to identify certain "mystery" archival photographs. The project has two major components: a print version and an online version. The print version began in January, 2008, with the publication in *Duke Alumni Magazine* of a set of unidentified photographs currently in the Archives' collection. These photos are unlabeled and need further explanation or identification.

The online version of the project is located on the Archives' Website, which will post the same set of photographs seen in the magazine, as well as additional photos, some of which are from previous issues of *Duke Alumni Magazine*. Space will be provided on the site for external parties to type in information about the images. The newly-provided explanations of the images will be available to read online. Please visit <http://medspace.mc.duke.edu/mystery/index.html> to view the online version of this project.

If you have information about any of these photographs, please contact **Mira Waller** at (919) 383-2653 or mira.waller@duke.edu.
