and the uninsured

10 DUMC History with Charles Hammond, MD **12** Leaving No Child Behind

Duke Pays Tribute to “A Grand Outfit”

by Marty Fisher

For 30 or so members of the Duke-affiliated 65th General Hospital Division of World War II, the events of Saturday, October 26, at Duke were bittersweet.

They came from as far away as Hawaii and England to reunite with **Ivan Brown, MD’40, HS’40-’42, ’45-’54**, and several of the surviving nurses and enlisted men with whom they served during the fiercest fighting of World War II.

Chancellor Ralph Snyderman, MD, HS’65-’67, Dean Sandy Williams, MD’74, HS’77-’80, Chancellor Emeritus Bill Anlyan, MD, **U.S. Army Brigadier General Eric B. Shoomaker, MD, HS’76-’78** and the 82nd Airborne band were there to honor them. And a bronze sculpture so realistic it brought many to tears was unveiled near the entrance of Duke Clinic.

“You have given the gift of life and freedom, and for that we will always be grateful. You have indeed brought honor to the Duke School of Medicine.”

– Ralph Snyderman, MD

As former Staff Sgt. Frank Holt barked out the commands, two members of the 65th retired the colors for the final time. When the flag was lowered and carefully folded, Holt gave the final command—“65th, dismissed!”

The ceremony was the final reunion for the group, which has been reuniting every year since their fifth reunion in 1947.

The 65th was formed in 1940 at the urging of the School of Medicine’s founding dean, Wilburt C. Davison, MD. It was made up of Duke faculty, house staff, alumni, and nurses. The group spent a year in training at Fort Bragg, N.C., and were joined by some 500 enlisted men, mostly from New York and New Jersey. In 1942, they were called to active duty in England, where they treated wounded soldiers from the North African theater of operations.

Five months later, the division was transferred to East Anglia, England, where the physicians and nurses treated members of the 8th Air Force, who were sending as many as 1,000 airplanes and 10,000 soldiers a day on bombing raids over Europe. The battle wounds were severe, caused by anti-aircraft fire (flak), exploding shells and bullets from German fighter planes, and exposure to –60 degree in-flight temperatures. In 22 months overseas, the 65th treated 17,250 bed patients and more than 30,000 outpatients. For fresh battle casualties, the hospital’s mortality rate was a low 0.4 percent.

“If these freshly wounded soldiers reached the 65th alive, they stood a 99.6 percent chance to survive,” said Brown, a former James B. Duke professor of surgery and the youngest physician to serve with the 65th.

All of the speakers paid tribute to what news commentator Tom Brokaw has called “the greatest generation,” adults who fought the world’s largest war and built the United States into the world’s leading economy.

“You have given the gift of life and freedom, and for that we will always be grateful,” said Snyderman. “You have indeed brought honor to the Duke School of Medicine.”

Williams introduced the sculptor, Stephen H. Smith of Marshville, N.C., and three medical students helped remove the drapes to unveil the sculpture’s four figures—a physician, a nurse, a wounded soldier, and a corpsman. The sculpture was commissioned through a

grant from The Duke Endowment. An additional grant from the Mary Duke Biddle Foundation made it possible to add the corpsman.

Smith spent two years working on the sculpture, including many conversations with Brown to understand life in a frontline World War II hospital. It depicts a frightened wounded soldier being cared for by a kneeling nurse. A physician beckons to the corpsman, who carries an IV bottle. Every detail, down to the insignias on the uniforms and the dog-tags on the soldier’s chest is authentic.

The 65th was among many medic units in World War II that served with distinction. At the war’s end, the unit was commended by General Dwight D. Eisenhower and General Carl Spaatz, Commander of the 8th Air Force; and the surgeons general of both the Army and the Air Force.

“It was one of the best outfits in the world,” said former member Edith Zdunczyk, a nurse. “It was a grand outfit.”

DUMC Exceeds \$600M Campaign Goal

Eleven months ahead of schedule, the Medical Center has surpassed its goal of raising \$600 million in support of research, education, and patient care initiatives at Duke.

DUMC was one of several areas throughout the University that met its goals in January, bringing the *Campaign for Duke* to more than \$2 billion. Duke is one of only five universities nationwide to reach \$2 billion through a single campaign.

“Although the *Campaign for Duke* has almost a year to run and several crucial priorities to fund, it has already provided strong support for Duke’s most important goals and visions for the future,” said University President Nannerl O. Keohane.

The Medical Center’s campaign, *Keeping the Promise of Medicine*, which began in 1996, has succeeded in generating 203 endowments in the Schools of Medicine and Nursing. These include professorships, fellowships, research endowments, and many other funds. Endowment and unrestricted support are the two areas of emphasis for the remainder of the campaign, which ends in December 2003.

The Medical Center’s goal for restricted support—money directed to specific programs or faculty members—was exceeded by 50 percent. But the categories of endowment, unrestricted support, and capital support for the Medical Center are short by 27, 59, and 27 percent respectively.

“We are thrilled that so many friends, alumni, foundations, and staff have come together in support of DUMC,” said Steven Rum, vice chancellor for development and alumni affairs. “While we have met our dollar goal, we still have much work to do to meet all of our goals.”

New Historian To Begin Work on 75th Anniversary Book

Duke University Medical Center will celebrate its 75th anniversary in 2005, and a historian has been hired to begin writing its history.

Walter E. Campbell, III, PhD, author of the award-winning book, *Across Fortune’s Tracks: A Biography of William Rand Kenan, Jr.*, will carry the institution’s history forward from where the late James F. Gifford, Jr., PhD, DUMC’s first archivist, left off in his book, *The Evolution of a Medical Center: A History of Medicine at Duke University to 1941*.

Campbell is a graduate of UNC-Chapel Hill and holds a doctorate in American history with a focus in business, science, and race relations. He has extensive experience working with the Southern Oral History program at UNC and has participated as a scholar with Duke’s Center for Documentary Studies on “Behind the Veil: Documenting African-American Life in the Jim Crow South.” He was the writer/researcher for a series of one-minute vignettes broadcast on North Carolina Public Television as part of America’s 400th anniversary celebration and is currently involved as a producer on several film projects, including “Color Lines: Race, Media, and College Basketball.”

Reunion 2003 Save-the-Date

Medical classes from years ending in 3 or 8, and any classes from 1953 and earlier are invited to attend Medical Alumni Weekend, October 31-November 1. The weekend celebration will include an awards luncheon, continuing medical education events, class gatherings, and an induction ceremony for members of the class of 1953, the newest members of the Half Century Club.

Snyderman to Step Down

Ralph Snyderman, MD, HS'65-'67, has announced that he plans to step down in June 2004 as chancellor for health affairs and executive dean of the School of Medicine at Duke University Medical Center.

Snyderman, 62, has served as chancellor for health affairs, dean of the School of Medicine, and James B. Duke Professor of Medicine since 1989, and as executive dean and president and CEO of the Duke University Health System since 1998. He helped guide a number of important initiatives at Duke, including the establishment of the Duke Clinical Research Institute, the Institute for Genome Sciences and Policy, and the Duke University Health System.

"I have been privileged to serve Duke University and its medical enterprise for the past 15 years," said Snyderman. "I made this decision last September and discussed my plans with (Duke University President) Nan Keohane and several key members of the university and health system boards. When Nan announced her own decision to leave next June, some people asked about my intentions. I thought it best not to wait until the end of the semester, as I'd originally planned, but instead to coordinate with Nan in telling the larger community what she had discussed with Duke's Board of Trustees."

"Ralph told me last fall of his decision not to continue for a fourth term as chancellor for health affairs," Keohane said. "I know that he is as committed as I am to making these final 16 months full and productive. We look forward to doing a great deal more together."

Snyderman is former chair of the Association of American Medical Colleges. He also held leadership roles in the Association of American Physicians and

the Institute of Medicine. His active role in promoting "prospective health care" as a new approach for national health care was recently highlighted in the *Wall Street Journal* and other national media.

Snyderman plans to pursue several key goals during his remaining tenure. "Our highest priority now is to continue learning from the tragic death of J sica Santill n, and ensure the highest level of patient safety throughout our health system," he said. "In addition, we intend to push ahead with plans to improve health care throughout the Duke system, building on our excellent record of clinical care, research, and teaching. Finally, I'm deeply committed to the concept of prospective health care, which offers much promise for building on scientific advances to transform medicine and enable people to stay healthy and avoid chronic disease."

Snyderman said his understanding is that Duke's president and Board of Trustees plan to initiate the search for his successor sometime this fall, which will enable the new president of Duke University to participate in the selection process.

He plans to take a one-year sabbatical after stepping down and then return to Duke to continue working on prospective health care and other cross-cutting medical issues, as well as to pursue teaching and research.

An immunologist whose research contributed to the understanding of the precise mechanisms of how white blood cells respond to chemical signals to mediate host defense or tissue damage, Snyderman accepted his first faculty appointment at Duke in 1972. He left Duke in 1987 to oversee medical research and development at Genentech, Inc., returning in 1989 as chancellor for health affairs and dean of the School of Medicine.

Medical Alumni Council Issues Challenge

40% by 04!

With a goal of increasing MD alumni participation in annual giving by 10 percent, the Duke Medical Alumni Council has issued a

challenge: They will match gifts from new contributors to the Fund for DukeMed dollar for dollar through this December.

The School of Medicine's current rate of alumni participation, 30 percent, is below that of other institutions such as Washington University, Wake Forest, the University of Chicago, and Harvard.

"We're counting on alumni to help bring Duke's alumni participation where it should be—ahead of our peers," said Calvin R. Peters, MD, president of the Medical Alumni Association.

Earlier this year, the Fund for DukeMed met its goal of raising \$8 million in unrestricted support for the

medical school during the Medical Center's *Keeping the Promise of Medicine* campaign. Having more alumni participation is important as the Medical Center looks forward to a strong future, according to Ann Horner, director of annual giving. "We count on our alumni—the closest members of the Duke family—to provide unrestricted support. This kind of support is hardest to come by and it is critical to keeping Duke's School of Medicine the best it can be," said Horner.

The Fund for DukeMed, including the Davison Club, which honors donors of \$1,000 or more, goes to work annually where need is greatest across the School of Medicine for scholarships, educational technology, student travel, and innovative research projects.

MD alumni will be contacted by phone and asked for their participation. Gifts can be made online at <http://fundfordukemed.duke.edu>. The campaign officially ends December 31.

Keohane To Leave Presidency in 2004

Nannerl O. Keohane, Duke's eighth president, will step down in June 2004. Keohane, whose ten years in office have brought growing national prominence to the university, announced her decision to the Duke Board of Trustees on March 1. She will return to study and teaching.

Keohane, 62, became Duke's president on July 1, 1993. She left the presidency of Wellesley College to take the helm as Duke's first woman president and one of only a few women ever to oversee a leading U.S. research university. Under her leadership, Duke has launched major programs in fields ranging from genomics to ethics, raised more than \$2 billion through the *Campaign for Duke*, established the Duke University Health System, and become a much more diverse and international institution.

"It has been a privilege to lead Duke University, and I have treasured this experience," Keohane said in a letter to the Duke community. "The past 10 years have been very rewarding for me personally and professionally. Now, with our bold strategic plan firmly in place, the *Campaign for Duke* scheduled to conclude in December, and a strong administrative team in office, I believe it's a good time for Duke to move into the next state of its history as an institution, and for me to move on to the next stage of my life."

Harold "Spike" Yoh, who chairs the Duke Board of Trustees, said that Keohane has been one of the most innovative and successful presidents—at Duke and across the country. "Duke has blossomed under her leadership, becoming more than just a great regional

university to join the top rank of universities anywhere," said Yoh. "She has been a true leader in terms of her integrity, intelligence, and energy, and the university is a stronger, more interesting place because of her. I have no doubt Nan Keohane will be remembered as a major figure in the history of Duke University."

The Board's vice chair, Robert K. Steele, will head a search committee to select Keohane's successor. Steele, vice chair of Goldman Sachs & Co., and chairman of the board of directors of the Duke University Management Company, is expected to be joined on the committee by trustees, faculty, students, and other members of the Duke community.

Keohane said she and her husband, Robert O. Keohane, James B. Duke Professor of Political Science, will take a one-year sabbatical away from Duke beginning June 2004. She emphasized that they "look forward to continuing to be part of the Duke family in the years to come."

Among her top priorities for the next 16 months are to ensure the long-term vitality of the Duke University Health System; meet all of the fund-raising goals of the *Campaign for Duke*; continue to enhance undergraduate life; and further strengthen Duke's ties with the local community. She also remains committed to successfully completing the women's initiative at Duke, and to promoting the hiring and retention of minority administrators.

Eye Center Breaks Ground on Research Institute

Ground was broken in October on the Ruth and Herman Albert Eye Research Institute, a five-story facility dedicated to research, education, and advancing treatment for blinding eye diseases.

A gift of \$8 million from the late Herman Albert and his wife, Ruth, made the groundbreaking possible. The facility, which is expected to be completed by fall 2004, is the second addition to the Medical Center campus to be financed almost entirely through philanthropy. The first was the McGovern-Davison Children's Health Center, which opened its doors in April 2000.

The new eye research institute will stand behind the Wadsworth Building, where the Eye Center's clinical facilities, research laboratories, and administrative offices are now housed. Some special features of the new building will include a state-of-the-art auditorium and reception area, a multi-sensory garden, and two floors dedicated to high-tech imaging laboratories and tissue culture laboratories. The Pediatric Clinical Service, which has been crowded into the basement of the Wadsworth Building, will get a spacious new home on the second floor.

An Open Door for Those Shut Out

by Miriam Sauls

Donald T. Lucey, MD'63, FACS, firmly believes the health care system in this country is broken. In the world's wealthiest and most developed country, it's hard to believe that nearly a third of the population—men, women, and children—are denied access to basic medical care.

To Lucey, the doors of health should be open to all those who knock. And that is how he's spent his career. Back in 1985, he was instrumental in starting North Carolina's first free clinic, the Open Door Clinic in Raleigh.

The last in a long row of brick and metal warehouses along the railroad tracks downtown, the clinic doesn't enjoy the most convenient location, but it's cheap space, says Lucey.

Lucey recently retired from his urology practice and a position as clinical professor of urology at UNC-Chapel Hill. He travels around the state and nation serving as a volunteer doctor and helping other communities start free clinics.

"There are community health centers out there — a hodgepodge of structures that serve different populations like maybe migrant workers or the homeless or Hispanics," says Lucey. "But that can still leave a lot of people out. There are so many uninsured families these days. So at our free clinic, we catch everybody that doesn't belong anywhere else. There are gaps in the system, so we created the Open Door Clinic to fill the gap."

"People Like You and Me"

Indeed, more and more Americans are being left behind in the health care scuffle. NBC News recently reported that more than 41 million people in the United States have no health insurance—that's one in seven Americans, and it's 1.4 million more than the year before. And who are these people? "These are people just like you and me," says Dr. Arthur Kellerman, who runs the emergency room at Atlanta's Grady Hospital. "They are contributing to the economy, they wait on our tables, they fix our cars, they are our neighbors. In some cases they are even members of our own families."

In fact, the largest jump in the uninsured was in the \$75,000-and-up income bracket, with 7.7 percent uninsured last year. "We're getting to the point where insurance is not just a poor people's prob-

lem, not just a problem of the down and out, but a middle-class problem," says Diane Rowland, executive director of the Kaiser Commission on Medicaid and the Uninsured.

Of course, without money to pay for a private doctor's care, the uninsured come to emergency rooms, where doctors are obligated to treat them, even if they can't pay. Often, this is after their illness is dangerously advanced. And who pays that bill? We all do, in higher insurance premiums and higher taxes. The cost to cover the uninsured is \$35 billion a year.

A decade ago, the plight of the uninsured was a dominant political theme, according to a *Washington Post* article on health coverage. Recently though, political debate over health care has focused mainly on narrower questions, such as how to help the elderly pay for prescription drugs and patients' rights.

And there is no certainty that the government will address the problem of the growing number of uninsured any time soon. "We couldn't do anything about

this when we had huge surpluses, so it's going to be that much harder to do with deficits," says Paul Fronstin, an analyst for the Employee Benefits Research Institute.

Many of the newly uninsured are in that category because their employers, especially those in companies with fewer than 25 workers, can no longer afford to offer health insurance benefits due to skyrocketing costs for health premiums.

In the meantime, while Congress continues to debate and surveys are tallied, and ordinary Americans choose between paying their rent and buying their meds, there are people like Don Lucey giving their time to take care of those who find their way to the Open Door.

Lighting a Fire

After the Raleigh free clinic had been open for a few years, Lucey saw a need to join forces with similar clinics in other towns in North Carolina. He helped establish the North Carolina Association of Free Clinics to provide a forum for sharing ideas, presenting a unified voice for member clinics, grant writing, and fund raising.

"We like to say that if you've seen one free clinic, you've seen one free clinic," says John Mills, executive director of the association. "Each one is unique, but all have in common the notion that the inability to pay should not prevent people from receiving health care. All our clinics are private, non-profit community-based organizations that seek to fill the gaps in local health care delivery, primarily through the use of volunteer health care professionals."

According to Mills, North Carolina now has more free clinics—48—than any other state in the country. These clinics delivered more than \$56 million in free health care services to some 200,000 patients in 2001, thanks to the efforts of more than 6,000 volunteer health professionals and other community volunteers who gave approximately 100,000 hours of service.

“Don Lucey was not only the impetus to start the state association, but he has been a driving force in the creation of this industry across the state and beyond,” says Mills. “He has been a real champion in the medical community, talking up the idea of volunteering and giving back any time he had a chance, whether he was speaking at state or local Medical Society meetings where he has chaired numerous boards and committees or at national meetings where he has been invited to speak. He planted a seed that has grown.”

Mills adds that the experience of volunteering has paid dividends to many physicians. “I hear doctors saying how much they enjoy it. They get to spend more time with patients and say ‘this is why we got into medicine.’”

To honor Lucey, the association has established the Don Lucey Award to honor individuals who character-

ize the mission of quality health care for all.

“Don Lucey lit a fire under all of us to get this association started,” says Carolyn Peck, executive director of the Community Care Clinic of Rowan County and a member of the original association board with Lucey. “He spearheaded the effort and was our first president. Knowing his plate was already overflowing with a full-time practice and teaching and then watching what else he was able to achieve was an inspiration to us all.”

Lucey also took it upon himself to organize annual conferences, according to Sandy Motley, executive director of Davidson Medical Ministries Clinic, Inc., and also an original board member. “Since free clinics are unlike anything else in the medical world, we sometimes felt like we were an island,” says Motley. “Don had the vision that the networking and sharing would be important, and he went above and beyond to make it happen.”

Having the network has paid off in other ways as well. The money from two large settlements with pharmaceutical companies was distributed by the state attorney general's office to the free clinics through the association. The money provided a huge

“Don Lucey was not only the impetus to start the state association, but he has been a driving force in the creation of this industry across the state and beyond.” -John Mills

executive director, N.C. Association of Free Clinics

boost, as funding for the clinics has to be raised primarily from the private sector through organizations like the United Way, foundations, businesses, civic organizations, churches, and individuals.

Unbounded Energy and Optimism

It should come as no surprise that not only has Lucey had awards named after him, he has won a few himself. Starting back in 1964 during his military days, Lucey won the Air Force Meritorious Award in Weisbaden, Germany. He went on to win an Outstanding Citizen of Raleigh Award, the Michael Weeks Humanitarian Award

from WakeMed medical staff and the Harry Dascomb Award for outstanding faculty at WakeMed's AHEC affiliate with UNC School of Medicine. He has won the Governor's Award for Outstanding Volunteer twice and the Faculty of the Year Award in urology at UNC twice. And the year before last he was presented with a Lifetime Achievement Award by the North Carolina Association of Free Clinics.

Now he is being awarded the Duke Medical Alumni Association Humanitarian Award, given on occasion to an alumnus/a or faculty member for service to society. Lucey will receive the award at a special luncheon during Medical Alumni Weekend 2003 on Friday, October 31.

Where does all Lucey's energy and compassion come from? “He's just always had unbounded energy,” says his wife, Shirley. “He's fortunate that he's loved what he's done with his life. He has been blessed to have mentors who have had a profound influence on him. They have challenged him at the right times. And his interest is as high now as it's ever been.”

Common Cause

Lucey got his first taste of serving back in college. Shirley had spent a summer working in the Watts

District in Los Angeles when they were college sweethearts, and when she returned with eyes wide open, he told her he wanted to go with her the next summer. They went to Puerto Rico to rebuild a church that had blown down in a hurricane. They experienced poverty unlike what either had ever seen. And they felt the camaraderie of working with others in a common cause. It was a pivotal experience for them both.

The Luceys have been to Viet Nam on medical missions, and as part of a WakeMed program, Don has been to Nicaragua a number of times, where WakeMed has a relationship with Hospital Escuela Oscar Danilo Rosales Anguello in Leon. He will continue to travel to Nicaragua, even though he has officially retired.

No one who has watched Lucey over the years would really expect him to stop work. In fact, when employment agents out of Texas came to interview him about the job he was leaving so they could get a sense of what a replacement would look like, they commented to him that he still seemed to have plenty of energy. “They asked me if I'd like to work for them,” says Lucey with a laugh. “I asked them if they meant I should become a headhunter and they said no, they could use me for temp work in clinics around the country.”

Lucey spent January in Fargo, N.D. and plans to spend April in New Mexico. To keep things interesting, he's made a deal with Shirley that they will only go to states they've never been to before.

Asked what he has missed since retirement, Lucey replied, “What I miss most is running around with my residents. They force you to think—you have to keep up. You can't be intellectually lazy around them. I miss the energy I derived from them.”

Lucey still volunteers twice a month at the Open Door Clinic, but now he can give daytime hours. “I've been working with another retired doctor, an OB/GYN from Duke named Richard Dwayne. We have a great relationship. It's fun to work at the clinic or on mission trips, because the workers have a common goal and have to be creative and are always nice people.

“I know there are some doctors now who are disillusioned with medicine,” he says. “Sure, there's more paperwork and things have changed. But physicians still want to help and I see those doctors all the time in my work. I'm optimistic about the profession.”

Before the Colors Fade

by Sherry Williamson, *INSIDE DUMC*

DEAN'S LECTURE SERIES

with **Charles Hammond, MD'61, HS'61-'69**

This is the first in a series of conversations with prominent emeritus or current members of the DUMC faculty who were crucial in the growth and development of the School of Medicine and the Health System. The series is sponsored by the Office of the Dean and led by Edward Halperin, MD, vice dean. DukeMed Alumni News will carry excerpts from selected sessions.

Hammond is the E. C. Hamblen Professor and 21-year former chair of the Department of Obstetrics and Gynecology at Duke University Medical Center. He also is president of the American College of Obstetricians and Gynecologists.

What was it like to work with the early “greats” of the medical school?

When I came here in 1957 as a med student, Duke was a small private college with a fairly new medical school, but even then I perceived it as a place where great things were going to happen. Dean [Wilburt] Davison, the first dean of the medical school, was in the latter part of his career. A pediatrician, he was a charismatic person who came to Duke as a young man and brought with him the first wave of faculty. Faculty like Deryl Hart, chair of surgery, Eugene Stead, chair of medicine, and Bayard Carter, chair of obstetrics and gynecology—all had been first-tier appointments to the medical school staff when they were in their early 30s. They were active, bright, and capable. The energy of the institution was vibrant.

What was it like to be a house officer and faculty member at Duke before Roe vs. Wade, the 1973 Supreme Court decision legalizing abortion?

It was a terrible time before Roe vs. Wade. We had a constant parade of patients who had septic criminal abortions. They could not afford or obtain elective termination, so to terminate the pregnancy someone had put a stick or something else in their uterus. Our antibiotics were primitive then, so we didn't have a lot of options. They came in with terrible infections and possibly could be saved only by a hysterectomy. I saw a lot of women die or lose their reproductive capability.

What was it like to be a house officer and faculty member at Duke during desegregation?

Dean Davison, his successor, the house officers, and faculty all felt desegregation was right. There was no animosity or rancor against minorities being admitted in the medical school or faculty. It was not so true with all of our patients. We moved through that period in a better fashion than I hoped, at least from my perspective as not being African-American but having much respect for those who were. It did take most of us being willing to stand up and say this is the way we do things at Duke—if you're my student or house officer, you're going to be treated like any other student or house officer.

What have you learned from your many years at Duke that you would like to pass along?

When I became chair in 1980, the chairs of medicine and surgery dominated this institution. We stood as silos, touching but not mixing. As the first wave of chairs retired, the remaining senior leaders decided it was time we worked together across departmental and divisional lines; not to be so territorial; and accept responsibility for the whole institution, not just your piece of it. I can't believe the difference between the 1950s and the institution today. To be able to participate in that transition has been wonderful.

What was it like to be involved in a major 20th century medical advance with gestational trophoblastic carcinoma, the first human cancer to be cured through chemotherapy?

In 1955, Roy Hertz and his National Institutes of Health (NIH) colleagues had taken a chemotherapeutic and successfully treated the first patient with metastatic choriocarcinoma, which was 98 percent lethal within six months of diagnosis. Then NIH started the treatment with 200 patients. As a clinical associate with NIH, I helped develop the treatment protocols, monitoring, and treatment methods. That's the way research should be done—focus the resources in an institution with a group of people capable of dealing with it. Once you've established the principles, then move into regional centers for patients who have to come from afar and then move into the communities where most of these patients are successfully treated today.

The next lecture in the Dean's Lecture Series will be with William J. Anlyan, MD, chancellor emeritus.

“When I came here in 1957 as a med student, Duke was a small private college with a fairly new medical school, but even then I perceived it as a place where great things were going to happen.”

—Charles Hammond, MD'61, HS'61-'69

Leaving No Child Behind

E. Stephen Edwards, MD'63, didn't grow up wealthy, but his parents were able to pay for his education. Before he entered Duke medical school, his father made a pact with him—in exchange for a medical education, Edwards would provide health care for as many people as possible.

by Emma Martin

To this day, Edwards strives to uphold his part of the oath. For his entire career as a pediatrician, his underlying goal has been to increase access to health insurance and bring quality health care to children and their families.

Children Left Behind

Edwards retired last year after more than 30 years of pediatric practice at Raleigh Children and Adolescent Medicine. He is the current president of

the American Academy of Pediatrics (AAP), which offers advocacy, public education, and training to promote the upbuilding of the child health care system in the United States.

Edwards' agenda for this year is ambitious to say the least. He's pushing to increase the number of children who receive medical care, improve the quality of health care delivered by pediatricians, and provide adequate reimbursement for pediatricians and specialists.

A medical primary care “home” and adequate health insurance for all children are Edwards’ leading goals.

In North Carolina, two major health care programs exist for children, Medicaid and the State Child Health Insurance Program (SCHIP). Together, the two programs provide coverage for children in families with incomes of up to 200 percent of the federal poverty level—about \$37,000 for a family of four.

For children in families with incomes higher than the Medicaid threshold, SCHIP steps in to provide coverage. North Carolina, which has one of the nation’s highest SCHIP participation rates, had to close enrollment in SCHIP recently because there are more applicants than the program’s funds can cover.

While he can’t immediately solve the SCHIP funding problem, Edwards hopes to boost enrollment for children who qualify for Medicaid. In North Carolina, close to three-fourths of the total number of uninsured children are eligible for Medicaid or SCHIP, but are not enrolled. Unlike SCHIP, Medicaid is an entitlement program, meaning that all eligible children will be enrolled if they apply.

Edwards and the AAP have worked to boost public awareness of Medicaid and state programs through the organization’s state chapters and the grassroots efforts of pediatricians’ offices. In North Carolina, a joint committee of pediatricians, dentists, audiologists, pharmacists, occupational therapists, and N.C. Health and Human Services personnel has met monthly for the last four years to promote the Medicaid and SCHIP programs. In the past, North Carolina has also used media advertising as a promotion tool.

Edwards expects incremental improvement to the number of children with health insurance this year, but realizes the struggle will continue long after his term as president has expired.

Fighting for Basic Rights

“Health care is a basic right as an American citizen,” says Edwards. “It is a tragedy that this country has not seen fit to meet this need—it is as necessary as clothing, shelter, and food.” The cost of providing health care to children is only a fraction of that of adults, he adds, and yet at some point in the year, almost one-fourth of the children in the nation have no health insurance, says Edwards.

Currently, there are no programs to cover those children whose family income falls outside of the income limits of both Medicaid and the SCHIP. The AAP supports the Stark-Rockefeller MediKids Bill, introduced in May 2001. It would provide coverage for all children, regardless of their family’s income. Depending on their income level, parents would pay

a percentage of the premium through taxes. The bill will be introduced again this year, but due to budget cuts and restrictions, progress is unlikely.

For now, Edwards and the AAP are throwing their weight behind Medicaid and SCHIP.

“These programs are in danger of being cut, and they affect those at the lowest income level,” said Edwards.

In 1970, Edwards was instrumental in developing children’s Medicaid coverage in North Carolina. He

A medical primary care “home” and adequate health insurance for all children are Edwards’ leading goals.

served as a liaison between his colleagues in the North Carolina Pediatric Society and the leaders of the Medicaid program.

“Under his leadership, both the participation of physicians and families began to grow,” said Tom Vitaglione, senior fellow of the North Carolina Child Advocacy Institute. He remembers that many times over the years, Edwards worked with other pediatricians and state leaders to create state programs such as SCHIP, including helping to secure approval from the North Carolina General Assembly.

Fulfilling a Pact

While Edwards’ child advocacy interests have broadened to the national level, he is still regarded as a beloved family doctor in his hometown of Raleigh, N.C.

“I tried to convince him to stay until my kids grew up,” Shannon Klappenbach, 33, told the *Raleigh News and Observer*. She took her three children, ages 4, 2, and an infant, to Edwards. Edwards was her pediatrician too, and she remembers how he would sit down on a little stool to talk to her at her level.

Though Edwards’ path has taken him to greater heights than the average family pediatrician, he says his every motivation and his passion lies in the philosophy he adopted from his father at the genesis of his medical career.

E. Stephen Edwards, MD’63, resides in Raleigh, N.C., with his wife, **Sylvia, N’63**. He is a past president of the North Carolina Pediatric Society and a former member of the clinical pediatric faculty at the UNC-Chapel Hill School of Medicine.

Submit your class note online at <http://medalum.duke.edu>. You may also mail class notes to Duke Medical Alumni Association, Class Notes, 512 S. Mangum Street, Suite 400, Durham, NC 27701-3973, or send an e-mail note to dukemed@mc.duke.edu. Due to space limitations, we are not always able to publish all the class notes we receive for a given issue. If you didn't see yours in this issue, please look for it the next time. All class notes are posted on the Medical Alumni Association web site for a six month period.

1930s

George K. Massengill, T'31, MD'36, Davison Club, is retired and lives in Springmoor Retirement Home in Raleigh, N.C.

Arnold L. Field, MD'39, is retired from surgery practice. He resides in Fort Lauderdale, Fla., with his wife, Marion, who is an associate professor of biology.

Kenneth D. Weeks, Sr., MD'39, practiced general internal medicine in his hometown of Rocky Mount, N.C., from 1946 until 1988. Since August of 2001, he has been an independent resident at the Foundation of the Albemarle Retirement Community in Tarboro, N.C. He has one daughter and two sons.

1940s

Joseph H. Cutchin, Jr., MD'42, retired from family practice in April of 1998. He resides in Sherrills Ford, N.C.

Robert L. Baeder, T'41, MD'44, is retired from family practice. He resides in Manchester, N.J., and is enjoying his restored health after having undergone a successful triple bypass cardiac surgery in March of 2001. He recently attended the weddings of three of his grandchildren.

Wilton G. Fritz, T'42, MD'44, Davison Club, is retired from practicing obstetrics and gynecolo-

gy. He lives in Satellite Beach, Fla., with his wife, Anne. He enjoys golfing, bowling, and gardening.

C. Warren Irvin, Jr., T'42, MD'44, HS'44-'45, has been attending classes at the University of South Carolina in Columbia, S.C., for the past 15 years. In October of 2002, he became an honorary alumnus of USC. He has been deeply involved with rare books at the USC library and is honorary curator of the rare books collection.

Herman F. Froeb, MD'47, retired in March of 2002 after a successful 55 years in medicine. In July of 2002, he and his wife, Helen, celebrated 50 years of marriage. They live in La Jolla, Calif.

R. Franklin Poole, Jr., MD'47, is a pediatrician in Raleigh, N.C., where he works two mornings a week for his son, James. He and his wife, **Harriet, WC'45**, have been married for 56 years. In his spare time, he enjoys golf, gardening, and spending time at his home in Bald Head Island, N.C.

Frederick C. Vogell, MD'47, enjoys golfing and fishing and is currently finishing a journal. He and wife, Tisha, reside in The Villages, Fla.

William P. Wilson, T'43, MD'47, HS'49-'54, is a psychiatrist at LifeWay Mental Health Associates

and a seminary professor at the Houston Graduate School of Theology, where he has been named Distinguished Professor of Counseling. He resides in Durham, N.C., with his wife, Elizabeth. They have five children and 15 grandchildren. In his spare time, he enjoys traveling, teaching, practicing medicine, and doing missionary work.

Richard N. Wrenn, T'43, MD'47, HS'47-'54, Davison Club, is a retired orthopedic surgeon residing in Charlotte, N.C., with his wife, **Doris, N'48**. He enjoys hunting, fishing, and practicing medicine in the Third World. He established a reconstructive hospital in northern Pakistan and has participated in educational programs in Ethiopia and Jordan.

William Lies III, T'46, MD'48, HS'49-'55, Davison Club, practices general pediatrics and resides in Dothan, Ala. In his spare time, he enjoys raising orchids, making furniture, metal working, and visiting his children and grandchildren.

Gloria G. Cochran, WC'45, MD'49, is retired from practicing pediatrics. She resides in Norman, Okla.

Robert L. Hallet, MD'49, HS'49-'50, practices obstetrics and gynecology in Columbus, Ohio, where he lives with his wife, **Sondra, WC'48**.

They have four children and eight grandsons.

1950s

Chester W. Fink, T'47, MD'51, is professor emeritus of pediatrics at the University of Texas Southwestern Medical Center in Dallas, Texas. In April of 2002, he was honored with an award by the Japan Rheumatology Association. He and his wife, Dorothy, reside in Trinidad, Texas. They travel overseas twice a year, and have three children and two grandchildren.

David H. Johnston, T'48, MD'51, retired from internal medicine and gastroenterology practice at the Lexington Clinic in August 1994. He and his wife, Peggy, reside in Lexington, Ky. They have five grown children. One of their sons, David, is completing his final year of gastroenterology fellowship at Vanderbilt University Medical Center. They also have eight grandchildren.

Noble J. David, T'48, MD'52, HS'59, Davison Club, has been featured in a series of articles published by the *Journal of Neuro-Ophthalmology* on the legacy of neuro-ophthalmology. Included in this publication was a tribute, "Noble J. David, MD, Reminisces," in his honor. These articles can be found in the Volume 22, Number 3, 2002 issue of the Journal. David is professor emeritus of the University of Miami. He resides in Coral Gables, Fla.

Colonel William B. Jones, MD'54, is retired from orthopedic surgery, hand surgery, and aerospace medicine. He is currently building a

mountain home and enjoys traveling in the Orient. He resides in Greenville, S.C., with his wife, Ann. They have three children and three grandsons and are expecting their first granddaughter in February of 2003.

Robert B. Yudell, T'50, MD'54, Davison Club, began working two days a month in a charity eye clinic through the Lions Club. He resides in Charlotte, N.C. He enjoys playing tennis and traveling, both domestically and abroad.

Joseph P. Bunn, T'54, MD'57, resides in Oviedo, Fla., with his wife, Katherine. He enjoys gardening, being active on committees of the Winter Park Health Foundation, attending church programs, and spending time with his 12 grandchildren. He is a recent graduate of Spellbinders, a storytelling program.

Robert G. Moseley, T'53, MD'57, HS'57-'62, is retired after running a solo pediatric practice for 23 years. He is actively involved with his church's participation in the Wake Interfaith Hospitality Network, which feeds and houses homeless families. He resides in Raleigh, N.C., with his wife, **Nelle, WC'53, MD, HS'57-'58, HS'62-'64**. They have two children, **Walter, T'86, MD'90**, and **Nelle, MBA'98**.

Boris L. O'Mansky, MD'57, has been taking courses in musical theory and composition at The Peabody Institute. For the past 19 years, he has been a member of the Board of Trustees of the Union of American

Hebrew Congregations. He and his wife, Marlyn, reside in Pikesville, Md. They have three children.

Harold P. Schulz, Jr., MD'57, retired from practicing ophthalmology after 30 years of solo practice. He and his wife, Betty, have been married for 44 years. They have two sons and four grandchildren. They reside in Hillsborough, Calif.

Robert L. Smith, T'54, MD'57, Davison Club, is a clinical associate professor of obstetrics and gynecology at the University of Washington. He presented a paper, "Cosmic Radiation and Risks to the Pregnant Frequent Flyer," in September of 2002 at the 50th International Congress of Aviation and Space Medicine in Sydney,

Australia. He resides in Shoreline, Wash.

Druery Thorn, MD'57, is retired from family practice. He and his wife, Elaine, reside in Wellsville, Kan., in the summer; and Sun City West, Ariz., in the winter. In their Kansas home, he works hard to improve pastureland and reverse 50 years of neglect on a family farm passed down by his father. He and Elaine have been married more than 50 years. They have three daughters, seven grandsons, and one granddaughter.

Roger J. Berry, MD'58, is retired from practicing radiology and oncology. He is a trustee of Bishop Barrow's Charity and a governor of King William's College. He is a

council member of the Order of St. John and serves on its fundraising committee. He and his wife, Valerie, reside in the Isle of Man, British Isles.

Edward H. Laughlin, MD'58, recently released his book, *Coming to Terms with Cancer*, a glossary of cancer-related terms written for the layperson, published by the American Cancer Society. He is a professor of surgery at the University of Alabama in Birmingham/Huntsville and former chair of the Department of Surgery.

Charles E. Rackley, T'55, MD'58, Davison Club, is a professor of medicine and director of the Lipid Disorder Center at Georgetown University Medical Center. He cur-

rently lectures on lipids and heart disease in women. His wife, **Betsy, N'63**, is CEO of Merrybuds, a flower nursery business. They reside in Washington, D.C., and have one son, Edward, who works with Doctors Without Borders in Amsterdam; one daughter, Colman, who lives in Beijing, China, with her husband; and one grandson.

Floyd L. Wergeland, Jr., MD'58, HS'58, recently finished writing the history of ophthalmology in the United States Army. He resides in Bonita, Calif., and has two children.

George A. Engstrom, MD'59, HS'59-'62, is a pediatrician at Cabarrus Pediatric Clinic in Concord, N.C., where he

resides with his wife, **Linda, N'60**. He is the chair of the task force on development for the North Carolina Pediatric Society. He has four daughters, two of whom are married; two grandsons, and one granddaughter.

Richard J. Hildebrandt, MD'59, Davison Club, is retired from maternal and fetal medicine. In his leisure, he enjoys woodworking, traveling, gardening, and reading. He and his wife, **Frances, N'59**, recently celebrated their 45th wedding anniversary. They reside in Newport, N.C.

Alonzo H. Myers, Jr., T'55, MD'59, works part time as an orthopedic surgeon. He and his wife, Dorothea, reside in Roanoke, Va.

smile

James F. White, MD'59, retired in 1999 from internal medicine practice. He currently enjoys going on medical missions to Kenya, building furniture, biking, and windsurfing. He resides in Chapin, S.C., with his wife, Kathy. They have three children and four grandchildren.

Harold A. Wilkinson, MD'59, PhD'62, HS'61-'62, retired from neurosurgery practice and his position as chief of neurosurgery at Newton-Wellesley Hospital at the end of 2002. He continues to publish clinical research. He and his wife, Alice, live in Wellesley Hills, Mass., where she teaches piano and performs in concerts.

1960s

Philip H. Pearce, MD'60, HS'60-'67, has retired from obstetrics and major practice. He travels, plays tennis, and partakes in church activities. He resides in Durham, N.C., with his wife, Ann. They have three children and seven grandchildren.

John W. Brown, MD'61, HS'61, HS'65-'66, Davison Club, now practices at Newberry Surgical Associates, P.A., in Newberry, S.C. He resides in Irmo, S.C., with his wife, Susan. They have four children, John, Janice, Norabeth and Anna.

C. James Dellinger, T'58, MD'61, is medical director for Loris Rural Health Clinics and resides in North Myrtle Beach, S.C., with his wife, Bertha.

Charles B. Hammond, MD'61, HS'62-'69, Davison Club, is the president of the American College of Obstetricians and Gynecologists. He stepped down as chair of the Duke Department of Obstetrics and Gynecology in April of 2002, where he remains as professor and practitioner. He and wife, Peggy, reside in Durham, N.C.

James R. Harp, T'54, MD'61, HS'62-'65, retired from anesthesia and is now a child psychiatrist. He works two days a week in a residential facility for troubled adolescents. He is currently trying to learn Spanish and classical guitar. He and his wife, **Gail, WC'60, G'66**, live in Bala Cynwyd, Penn. They have been married for 46 years.

Charles H. Colvin III, MD'62, is retired from practicing internal medicine. He lives in Birmingham, Ala. He and his wife, Adele, have been married for more than 40 years. They have one son and two daughters.

Alden W. Dudley, Jr., T'58, MD'62, Davison Club, is associate dean of academic affairs at the University of Virginia School of Medicine in Charlottesville, Va. He and his wife, **Mary, WC'59, G'61, PhD'66**, live in Roanoke, Va. They have two sons.

Donald H. Frank, MD'62, Davison Club, practices at the Neurosurgical Group of New Jersey. He enjoys traveling, golfing, bicycling, and collecting antiques. His wife, Cynthia, is editor-at-large of *House & Garden* magazine. His daughter, Amanda, is a student at the New York

School of Interior Design. He also has two sons, Brian and James.

Patrick J. Logue, MD'62, HS'62-'63, Davison Club, retired from orthopedic practice in 2000. He and his wife, Joyce, live in Belle Air Shores, Fla. They have seven children, all of whom are college graduates; and 10 grandchildren, all under age 6.

Sidney R. Fortney, MD'63, is a retired medical missionary. He lives in Southport, N.C., with his wife, **Janie, N'61**.

R. Schuyler Gooding, MD'64, still works full-time practicing neurosurgery at age 67. He resides in Omaha, Neb., with his wife, Mary Ann.

Frederic H. Gerber, MD'65, is retired from

practicing radiology. He resides in Medina, Wash., with his wife, Zenta Z. Gerber. They have two sons, David and Michael.

Edgar J. Sanford, T'62, MD'65, HS'69-'72, is a graduate student in computer science at the University of South Florida. He is also the course director for fourth-year medical students. He resides in Lutz, Fla.

Emanuel Newmark, MD'66, is an ophthalmologist with Regional Eye Institute in West Palm Beach, Fla. He is listed in Guide to America's Top Ophthalmologists, Guide to Top Doctors, How to Find the Best Florida Doctors, Who's Who in America, and Who's Who in the World.

David N. Broadbent, MD'67, is vice-president

of the Children and Youth Services of Rochester Primary Care Network, medical director of VIA Health School-Based Programs, and chairman of the Rochester Lead-Free Coalition. He is currently taking piano lessons, volunteering in his church, and reviewing proposals for school-based health centers. He and his wife, Sally, reside in Rochester, N.Y., and have one son and two daughters.

W. Edwin Dodson, T'63, MD'67, Davison Club, is associate vice chancellor, associate dean for medical school admissions, and professor of pediatrics and neurology at the Saint Louis Children's Hospital. He founded The Family Support Network, a child abuse prevention agency that recently celebrated its 25th anniversary. He is also

StudentAlumni Link

Ever wish you were back in medical school?

What if you could have the camaraderie...without the classes?
—the thrill of discovery...without the agony of anatomy?

The new Student-Alumni Link program, sponsored by the Medical Alumni Association, pairs alumni mentors with incoming medical students.

You'll share the wisdom of your experience and get a glimpse of medicine from the perspective of tomorrow's Duke Docs.

For more information or to volunteer, please visit medalum.duke.edu, and click on "Volunteer," or call Heather Lemons, (919) 667-2527.

past president and chairman of the Board of Epilepsy Foundation of America. He and his wife, Karen, live in Saint Louis, Mo.

J. William Futrell, T'63, MD'67, is past-president of the American Association of Plastic Surgeons. He is co-founder of Stem Source, Inc., and resides in Pittsburgh, Penn. He and his wife, Annie, have been married for nearly 38 years. They have two daughters, Allison and Kristin.

Rufus W. Head, MD'67, was called to active duty as a naval reservist in January of 2002 and was stationed at the U.S. Naval Hospital in Camp Lejeune, N.C., until July of 2002. In September, he retired from the Naval Reserve after 24 years of service. He and his wife, Susan, reside in North Bridgton, Maine. They have two children.

Robert N. Marshall, Jr., MD'67, HS'67-'70, is director of pediatric endocrinology at T.C. Thompson Children's Hospital in Chattanooga, Tenn., where he resides with his wife, Margaret, whom he married in January of 2002. His oldest son, Robert, is a first-year resident in anesthesiology at UNC and his youngest son, Allen, is finishing his third year of medical school at UNC. His daughter, Karen, will be moving back to Chapel Hill, N.C., with her husband, who is starting an oral surgery fellowship.

Robin T. Vollmer, T'63, MD'67, HS'72-'73, is chief of surgical pathology and cytopathology at the Durham Veterans Administration Medical Center in Durham, N.C.

He just completed a study in which he discovered a serum that generates a better measure of response to chemotherapy in patients with non-small cell lung cancer. His wife, **Pam, A'78**, is the lead pathologist assistant in Duke surgical pathology. Together, they have three children.

Ted R. Kunstling, T'65, MD'68, Davison Club, received the 2002 Trustee Service Award from the North Carolina Hospital Association for his service on the Raleigh Community Hospital Advisory Board. His daughter, **Claire, T'98**, graduated from Harvard Law School in June of 2002 and is an associate with Covington and Burling in Washington, D.C. His daughter, **Amy, T'93, L'96**, is an assistant attorney general with the North Carolina Department of Justice. He and his wife, **Frances, WC'65**, reside in Raleigh, N.C.

1970s

Harvey J. Cohen, MD'70, PhD'70, recently moved to Sunrise Assisted Living in Arlington, Va.

John C. Gretes, MD'72, is a clinical nephrologist at The Center for Renal Medicine, Inc., in Newport News, Va. He and his wife, Rosie, have three sons, Will, Paul, and Andrew; one daughter-in-law, Brianne; and twin grandsons, James and John.

David B. Jarrett, MD'72, is president of the Mental Health Association of Northeast Georgia and also works full time in his private practice. He and his wife, Patricia, have been married for two years. They reside in Athens, Ga. He has one son attending

Florida State University, and another son at NYU Film School. He also has one stepson and one stepdaughter.

Nancy T. Livingston, WC'68, MD'72, currently

practices adolescent and adult psychiatry and psychoanalysis in Durham, N.C. She is also a teaching analyst on the faculty of the UNC-Duke Psychoanalytic Education Program and serves on the

Board of Directors of the Lucy Daniels Foundation. She and her husband, Bill, have been married for 22 years. Together, they have five children.

Reunion Save-the-Date

glory days

DUKE MEDICAL ALUMNI WEEKEND 2003
October 30–November 1, 2003

Medical classes from years ending in 3 or 8, and any classes from 1953 and earlier are invited to attend Medical Alumni Weekend, October 30–November 1, 2003.

The weekend celebration will include an awards luncheon, continuing medical education events, class gatherings, and an induction ceremony for members of the class of 1953—the newest members of the Half Century Club.

David K. Wellman, T'68, MD'72, HS'71-'78, Davison Club, is chief medical officer for United Emergency Services, Inc., in Durham, N.C. He decided to retire from active practice after an eight-year stint in the Duke emergency room, and entered the private sector of emergency medicine. He and his wife, Carol, have four daughters, one son, and two grandsons.

Geoffrey B. Hartwig, MD'73, Davison Club, is director of the Sleep Disorders Center at Forrest General Hospital and chief neuro-imager at the Hattiesburg Clinic in Hattiesburg, Miss. His wife, Marcia J. Hartwig, PhD, has joined the Hattiesburg Clinic as its first clinical psychologist. They have one son, **Matthew, MD'01, HS'Current**; and one daughter, Melanie.

Robert S. McConaughy, MD'73, HS'73-'74, has a private practice of child and adolescent psychiatry. He is also medical director of a residential group home for children. He resides in Seattle, Wash., with his wife, Mary Ann, and enjoys going on Boy Scout hikes with his two sons.

William A. Findlay, MD'74, is in private practice in Grand Junction, Colo. He enjoys hiking, biking, cross-country skiing, and fishing. His wife, Jane, is a kindergarten teacher. They have four children and expected their first grandchild in December 2002.

Richard A. Hopkins, T'70, MD'74, HS'74-'84, is the chief of cardiac surgery at Brown University and was named the Karl E. and Gloria A. Karlson Professor of Cardiac Surgery. He and his wife,

Jeannette, N'80, reside in Providence, R.I. They have three children.

Jared N. Schwartz, MD'74, PhD'75, HS'73-'77, Davison Club, is director of the Department of Pathology and Laboratory Medicine of Presbyterian Pathology Group in Charlotte, N.C. He is also secretary/treasurer of the College of American Pathologists. His daughter, **Rachael, F'02**, graduated from Fuqua School of Business in 2002. His daughter Sarah, graduated from Hamilton College. His wife, Diane, graduated with honors from the Institute of Culinary Education in August of 2001.

William K. Campbell, MD'75, is president-elect of the Buncombe County Medical Society and founder of a nine-provider family practice group. He volunteers at

the Asheville-Buncombe County Christian Ministry Medical Clinic. He and his wife, Sharon, reside in Asheville, N.C. Their oldest daughter, Jessica, is a second-year medical student. They also have another daughter, Molly.

Gale McCarty, WC'72, MD'75, HS'74-'80, Davison Club, is currently working on a master's degree in health evaluation services specializing in medical information. She is continuing her clinical and research work as a full professor at the University of Virginia Division of Rheumatology and Immunology in Charlottesville, Va.

York E. Miller, MD'76, Davison Club, was recently appointed the Thomas L. Petty Endowed Chair in Lung Research at the University of Colorado. He enjoys mountain biking, fishing and

hunting. He and his wife, Marsha, reside in Denver, Colo., with their two sons, whom he coaches in soccer.

Anthony D. Morgan, E'69, MD'76, is a hospitalist for Duke University Medical Center at Raleigh Community Hospital. He and his wife, Carol, reside in Durham, N.C. Their daughter, Fiona, is an editor at Duke University Press; their daughter, Margot, is working towards a PhD in politics at Rutgers University; and their son, Drake, is a senior at Durham Academy, where his lacrosse team won the state championship.

Marjorie A. Boeck, MD'77, earned the board-certified status of diplomate of the American Board of Bariatric Medicine. She resides in Dallas, Texas, with her husband, Perrin C. White.

Joseph O. Gehrett, Jr., T'74, MD'77, practices internal medicine and lives in Auburn, Wash., with his wife, Barbara.

Paul P. Gilbert, MD'77, completed a three-week stint in August at Kikuyu Orthopedic and Rehabilitation Center in Kikuyu, Kenya, where 27 million Kenyans are served by 16 orthopedists. He practices orthopedic surgery in Charlotte, N.C., where he resides with his wife, Jane, who is an accomplished artist. Their two daughters are undergraduate students at Colgate University.

Gail E. Herman, MD'77, PhD'81, is director of the Division of Human Genetics at the Children's Research Institute in Columbus, Ohio. In 2000, she was promoted to full professor with tenure.

40% by 04!

The Fund for DukeMed CHALLENGE

Your gift to The Fund for DukeMed will work **three times as hard** this year as it:

1. is matched 1:1 by the Medical Alumni Council through a \$100,000 Alumni Challenge Match,
2. helps The Fund for DukeMed alumni participation rate grow from 30% to 40% by the end of THE CAMPAIGN FOR DUKE January, 2004, and
3. keeps Duke's medical student debt among the lowest of private schools across the nation.

Please say "yes!" when you receive your call asking for your support of The Fund for DukeMed.

The Fund for DukeMed 2002-2003

She resides in Columbus with her son, Drew.

Jonca C. Bull-Humphries, MD'78, was named office director of the Center for Drug Evaluation and Research, part of the Food and Drug Administration. She resides in Washington, D.C., with her husband, Derrick.

1980s

David E. Ludlow, MD'80, Davison Club, was recently assigned as group surgeon for the 19th Special Forces Group and was promoted to the rank of colonel in the Army National Guard. He and his wife, Yoko, reside in Spanish Fork, Utah. Their son, Spencer, began medical school in the fall at Ohio State University.

Chalmers M. Nunn, Jr., T'76, MD'80, HS'80-'85, Davison Club, was elected to the board of the American College of Physician Executives. He is also a board member of the Lynchburg Chamber of Commerce. He resides in Lynchburg, Va., with his wife, **Catherine, N'78**. They have two daughters and one son.

John R. Dein, T'77, MD'81, was recently recognized by Healthgrades, Inc., for having the most outstanding heart surgery program in California. He lives in Sacramento with his wife, Nancy. They have four children.

William D. Middleton, E'77, MD'81, published a textbook, *General and Vascular Ultrasound—Case Series*. He resides in Saint Louis, Mo., with his wife, Mary. They have two children.

David L. Simel, MD'81, HS'81-'86, A'90, was recently promoted to professor of medicine at Duke University Medical Center. He resides in Durham, N.C., with his wife, **Joanna Piscitelli, MD'81, HS'81-'85**.

Robert E. Bledsoe, Jr., MD'82, Davison Club, practices obstetrics and gynecology at Athens Women's Clinic in Athens, Tenn. He enjoys playing basketball and serving as a youth advisor at his church. His daughter, Courtney, graduated from high school as valedictorian and attends Emory and Henry College. His son, Rob, is a sophomore high school honor student and basketball player, and his son Bradley is an eighth grade honor student who also plays basketball.

Richard Frothingham, MD'82, HS'90-'93, is an assistant professor at Duke University Medical Center. He specializes in infectious diseases and currently cares for veterans living with HIV. He and his wife, Margaret, reside in Durham, N.C.

William R. Herzog, Jr., T'78, MD'82, HS'83-'87, is an associate professor at the University of Maryland. He also co-founded NovaVascular, a start-up biotechnology company. He resides in Baltimore, Md., and has three children.

Jim Lingle, MD'82, HS'88, received board certification in medical acupuncture in 2001. He resides in Decatur, Ga., with his spouse, Charles Wallom.

Susan P. Lodewijks, T'78, MD'82, relocated to a new office after her

former office burned down in June of 2002. She practices family medicine in Thornleigh, Australia, where she lives with her husband, John, who teaches economics at the university level; and their three children, Ben, Emma, and Rachel.

Alice Ormsby, MD'82, left to start a new dermatology practice last fall after spending more than 13 years at Virginia Mason Clinic in Kirkland, Wash. Her husband, Robert Freid, owns a management consulting firm serving the electronics industry. They reside in Woodinville, Wash., and have five-year-old twin sons.

J. Philip Saul, T'78, MD'82, is chief of pediatric cardiology and medical director of the Children's Hospital at the Medical University of South Carolina in Charleston, S.C. His wife, **Amy M. Davis, T'76**, was a development director at an independent school until her retirement. She now enjoys being a volunteer and a homemaker. They have one son, Davis, and one daughter, Lillian.

Leslie A. Schultz-Suhonen, T'78, MD'82, is an

internist in a group practice of 50 physicians, where she spends much time with patients and emphasizes preventive medicine. Her husband, Matti Suhonen, MD, is an invasive radiologist who performs PICA and coronary angiography and runs an MRI firm providing general radiology services. They reside in Kuopio, Finland, where they are raising their two children.

Bruce M. Freedman, T'79, MD'83, Davison Club, is a plastic surgeon in private practice in McLean, Va. He enjoys contributing to the David Sabiston Surgical Society Research Fellowship out of gratitude to Dr. Sabiston for furthering his career. In his leisure, he enjoys running and traveling with his two children, Michael and Katie.

Robert Murrah, T'79, MD'83, HS'83-'85, opened a new solo orthopedic practice in Orlando, Fla. He and his wife, Lisa, reside in Winter Park, Fla., with their children, Will, Brad, Hamilton, and Annie.

Robin L. Schaten, MD'83, and her husband, Eli C. Stein, wel-

comed their first children, Aaron and Adena, in February of 2002. They reside in Boulder, Colo. She is a partner at the Longmont Clinic, a 50-physician multi-specialty medical practice, and serves as medical advisor for the Head Start program in Longmont, Colo.

David Feldman, T'80, MD'84, HS'89-'92, Davison Club, completed the Executive MBA program at NYU and is looking for more administrative roles in addition to his plastic surgery practice. He enjoys swimming, spending time with his family, and traveling with his wife, Debra, during the summer. They reside in Scotch Plains, N.J. Their oldest daughter recently began high school.

Lyman Scott-William Smith, T'78, MD'84, recently completed a stint as team physician for the Carolina Hurricanes hockey team in Raleigh, N.C. His daughter, Julie, is currently ranked first in the United States in the 12-year-old age group in swimming, and holds two national titles. He practices at Raleigh Orthopedic Clinic in Raleigh, N.C.

Claire L. Spain-Remy, MD'85, served as the chief of staff for the Tacoma General Hospital for the 2001-2002 term. She resides in Lakewood, Wash., with her husband, Claude, a real estate investor. They have three daughters.

Tana A. Grady-Weliky, MD'86, Davison Club, was appointed senior associate dean for medical education at the University of Rochester School of Medicine, where she served as associate dean for undergraduate medical education for the past four years. While directing the General Psychiatry Residency Program at Duke, she helped to lead the development of a combined residency in internal medicine and psychiatry. She resides in Pittsford, N.Y., with her husband, Michael Weliky, PhD.

Linda H. Gilliam, MD'87, completed a master of divinity degree in May of 2002 at Baptist Theological Seminary in Richmond, Va. She is director of Church Hill Christian Wellness Center in Richmond, which provides health education, lifestyle modification support, a fitness center, and general educational services to an underserved, inner-city population. She was also ordained into the ministry in October of 2002. Her husband, **F. Roosevelt Gilliam III, MD'82, HS'83-'88**, is a cardiac electrophysiologist in private practice with Virginia Cardiovascular Specialists. They have a five-year-old daughter, Rachel.

Reggie D. Parlier, MD'87, recently became a fellow to the American Academy of

Family Physicians. He spends his spare time as an assistant Cub Scout master, teaching adult Bible study and children's Sunday school, skiing, and scuba diving. He resides in Gastonia, N.C., with his wife, Barbara. They have two sons, David, 10; and Mark, 8.

1990s

Michael A. Warner, T'86, MD'90, Davison Club, manages a busy private practice in the fields of ophthalmology and oculoplastics. He and his wife, Claire, have three children, all of whom have already attended a Duke Championship Final Four game. They reside in Hermiton, Ore.

Thomas G. Catena, MD'92, has been working at a mission hospital in rural Kenya for the past three years. In September of 2002, he started working at a new mission hospital in Nairobi, Kenya, which is geared toward serving the city's slum population.

Helen M. Gordon, MD'92, is a faculty physician at Greater Baltimore Medical Center. She currently practices internal medicine and hospice and palliative care. She passed her hospice and palliative care boards in Fall 2001. She enjoys gardening, reading novels, fixing up an old sailboat, and raising her eight-year-old daughter, Abigail.

Kenneth S. Boockvar, MD'93, received the Pfizer/American Geriatrics Society Foundation for Health in Aging Junior Faculty Scholarship for Health Outcomes in Geriatrics. He practices geriatric medi-

cine at the Mount Sinai School of Medicine. He resides in New York, N.Y., with his wife, Tovah P. Klein, MD. They have two children, Elam, and Aaron.

Matthew T. Roe, MD'93, HS'93-'96, S'01, received a masters of health sciences in clinical research from Duke University in December of 2001.

Vickie F. Ingledue, MD'95, established Mount Jefferson Family Medicine, P.A., in August of 1999, a private family practice in her hometown of Jefferson, N.C. She and her husband, Tom, have been married for 11 years and have a three-year-old son, Griffin.

Steven M. Kent, T'91, MD'95, and his wife, **Karin, T'91**, welcomed their first child, Mitchell, in February of 2002. Steve is stationed at Walter Reed Army Medical Center as a staff cardiologist and director of the cardiology clinic. He recently completed a six-month deployment to Bosnia in support of the NATO stabilization force. Karin is in private practice as a pediatrician with Spring Valley Pediatrics in Washington, D.C.

Harry W. Durgin, Jr., E'92, MD'96, and his wife, **Kristi W. Durgin, MD'98**, welcomed the birth of their first child, Isabella Marie Durgin, in September of 2001. They reside in Meridian, Miss.

Seth D. Kaplan, MD'96, and his wife, Kathryn, welcomed the birth of their first child, Daniel, in January of 2002. They reside in Dallas, Texas.

Georgine M. Lamvu, T'93, MD'97, completed an OB-GYN residency at

UNC in 2001 and is currently completing a fellowship in advanced laparoscopy and gynecologic surgery and an MPH in epidemiology. She also runs MEDWorld, an organization dedicated to recycling medical equipment and donating it to developing nations. She resides in Durham, N.C.

Joanne Lager, MD'98, completed a pediatric residency at UNC in December of 2001 and began a pediatric hematology/oncology fellowship at Duke University Medical Center in January of 2002. She lives in Durham, N.C., with her husband, Patrick.

Daniel M. Yoder, MD'98, completed his ophthalmology residency at Bascom Palmer Eye Institute in Miami, Fla., in June 2002, where he has accepted a one-year vitreoretinal fellowship position followed by a year as chief resident. He and his wife, Tanya, expected their first child in October 2002.

Dan G. Blazer III, T'92, G'94, MD'99, married his wife Christy, on May 5, 2002. He is a surgery fellow at the National Institutes of Health. The couple will reside in Rockville, Md.

2000s

Felice James-Rodriguez, T'96, MD'00, was the 2001-2002 chief resident in family medicine at Duke University Medical Center. She resides in Marion, S.C., and has a four-year-old son, Cristian.

House Staff Notes

1940s

Marvin L. Weil, MD, HS'46-'48, is retired from practicing academic medicine and child neurology. From 1989 until 2000, he was an active participant in the Department of Biochemistry at the University of Oxford, where he still attends many interesting teaching sessions of the Department of Neurology. He enjoys the benefits of living in the United Kingdom with his wife, Joyce, where they visit the theater, opera, and museums.

1950s

J. Arnold Mittelman, MD, HS'49-'50, recently retired from general surgery. He enjoys tennis, golf, and boating. He and his wife, Barbara, reside in West Hartford, Conn. Both of their sons are married and run a family business.

Jack W. Trigg, Jr., MD, HS'58-'59, is president and program chairman for the Emeritus Club at St. Vincent's Hospital in Birmingham, Ala., where he resides with his wife, Dorothy. In his leisure time, he enjoys golfing, fishing, and traveling.

1970s

Mark E. Frankel, MD, HS'66-'70, is a consultant in medical management in Tuscon, Ariz., where he lives with his wife, Mary Lou. He served as medical director of Pima Health Plan for two years and of the Pasqua Yaqui Indian Tribe for one year. He received his certification in medical management from the American College of Physician Executives. He enjoys traveling to Hawaii and volunteering at the North Kohala Community Hospital.

David K. Lemon, MD, HS'72-'73, still practices invasive cardiology and teaches residents full-time in Des Moines, Iowa. He has also written a book about elderly patients entitled *So Far So Good*. He and his wife, Suzanne, reside in Clive, Iowa. Their eldest son, Peter, is an oral surgeon who practices near Des Moines.

William N. Grosch, MD, HS'70-'74, D'74, was promoted to professor of psychiatry with tenure at Albany Medical College in Albany, N.Y., in August 2001. He is also director of pastoral services at the Capital District Psychiatric Center in Albany. In October 2001, he led a psychiatric delegation to China for the People to People Ambassadors Program. In June 2002, with a National Council of Churches delegation, he joined the Jimmy Carter Work Project of Habitat for Humanity in Durban, South Africa, to build 100 homes in five days. He resides in Guiderland, N.Y., with his wife, Kay. Their son, Adam, attends Colgate University and their daughter, Holly, attends St. Lawrence University.

James H. Wood, MD, HS'74, is a consultant neurosurgeon practicing in Atlanta, Ga. He was voted a Top Doctor in *Atlanta Magazine* 2001 and contributed a chapter entitled "Cerebrospinal Fluid" for a second edition of *Encyclopedia of Neurosciences*. He and his wife, Mary, reside in Atlanta and have two sons, John and Justin.

William M. Thompson, MD, HS'72-'75, returned to Duke University Medical Center in July of 2001 after leaving the University of Minnesota as chairman of

radiology. He received the 2001 Gold Medal from the Association of University Radiologists, the Cannon Medal from the Society of Gastrointestinal Radiologists, and the Achievement Award from the Association of Program Directors in Radiology. He resides in Chapel Hill, N.C., with his wife, Judy.

Mark B. Horton, MD, HS'75-'76, is a health officer and deputy agency director for public health at Health Care Agency in Orange County, Calif. He enjoys biking, jogging, traveling, and reading. He and his wife, Mary Ann Miller, reside in La Jolla, Calif.

George Hemstreet, MD, PhD'75, HS'70-'76, was named the Malashock Chair of Urologic Surgery at the University of Nebraska Medical Center (UNMC), where he is also

chief of urologic surgery and professor of surgery. He joined UNMC after serving 20 years as George Lynn Cross Research Professor of Urology at the University of Oklahoma Health Sciences Center. While at the University of Oklahoma, he led a multidisciplinary research team to develop new methods for quantifying proteins in single cells. His research in bladder and prostate cancer has centered on finding cell markers that will allow for early detection and prevention of cancer. In addition to his extensive research on bladder cancer, he pioneered biomarker research in esophageal and lung cancer in China as part of a program co-sponsored by the National Cancer Institute. He is one of few Americans to be named to the prestigious Chinese Academy of Medical Sciences. He is former president of the Oklahoma

State Urologic Association and received the American Medical Association Citation for Meritorious Services for his help with the Oklahoma City bombing victims. He resides in Omaha, Neb., with his wife, Yuan.

David J. Lebowitz, MD, HS'74-'76, continues to work in private practice in Beverly, Mass., where he battles the stresses of capitated care, paperwork, and patient needs. He has worked his way up through partner retirement to become president of a 12-physician multi-specialty group north of Boston. He continues practicing nephrology and internal medicine. In his leisure, he enjoys flyfishing and gardening. He lives in Topsfield, Mass., with his wife, Nancy.

Timothy D. Coughlin, MD, HS'79, is a founding member of the eight-

5,000 Applicants, 100 Openings

Admissions Office Needs Alumni Volunteers

If you graduated from Duke School of Medicine in 1982 or later, **Brenda Armstrong, WC'70, MD, HS'75-'79**, director of admissions, needs your help. By interviewing prospective students from your region, you can play an important role in deciding which of the many applicants receive the coveted invitation to enroll at DukeMed.

For more information, visit medalum.duke.edu, click on "volunteer" or call Margaret Moody at 919-667-2514 or e-mail margaret.moody@duke.edu.

doctor Reno Family Physicians and past president of the Nevada Academy of Family Physicians. He is currently president of the Nevada Health Professionals Assistance Foundation. He and his wife, Monica, reside in Reno, Nev. Their oldest son, Zachary, recently graduated from UNLV law school.

Lynn H. Harrison, Jr., MD, HS'74-'79, was named the Craighead Chair in Surgery at the Louisiana State University Health Sciences Center's School of Medicine in New Orleans. He also serves as professor and chief of the Section of Cardiothoracic Surgery there. He resides in Gretna, La., with his wife, Lura.

Donald P. Jones, MD, HS'78-'79, is former chairman of surgery at St. Joseph's Health Center in Toronto, Canada. He is now chief of thoracic surgery at Hackensack University Medical Center in Hackensack, N.J. He and his wife, Patricia McEwan, MD, have three children.

1980s

Oscar G. Bascug, MD, HS'79-'81, has been on sabbatical following surgery and plans on retiring from private surgical practice. He resides in Silver Spring, Md.

Richard H. Wiebe, Sr., MD, HS'72-'82, is former university professor and chairman at the University of South Dakota and East Tennessee State University. He currently resides in Kure Beach, N.C., with his wife, Jackie.

Merry N. Miller, MD, HS'83-'87, was appointed chair of the Department of Psychiatry and Behavioral Sciences at the James H. Quillen College of Medi-

cine at East Tennessee State University. She lives in Johnson City, Tenn., with her husband, Barney.

Peter F. White, MD, HS'88-'89, recently established Biopsy Diagnostics, a national outpatient surgical pathology laboratory specializing in dermatopathology and gastropathology. He resides in Spartanburg, S.C., with his wife, Mary Socci White, PhD.

1990s

Jonathan J. Aarons, MD, HS'87-'90, is medical director of the Coral Springs Surgical Center in Coral Springs, Fla. He and his wife, Marlene, recently celebrated their 15th wedding anniversary. They have two children, David, age 10, and Daniel, age six.

Paul D. Banick, MD, HS'89-'92, is pulmonary and critical care division chief at the University of Tennessee at Knoxville. He and his wife, Elizabeth, have three children, Kate, 7, Anna, 5, and Mary Margaret, 3.

Imhotep K. Carter, MD, T'84, HS'92-'93, accepted an assistant professor position in the Department of Surgery at the University of Texas Medical Branch in Galveston, Texas. He enjoys singing in a choir and listening to lectures by prominent theologians. He has formed a band of musicians from the trauma center called "Recovery Room," that performs in clubs and at local functions. He and his wife, Katrina, have been married 15 years. They expected their third child in December of 2002.

Charles M. Maxfield, MD, HS'89-'93, Davison Club, is director of radiol-

ogy at Kosair Children's Hospital in Louisville, Ky. His wife, **Sharon, MD'89, HS'90-'94, Davison Club**, works part-time at Jewish Hospital in Louisville. They reside in Anchorage, Ky., and have two sons, Charles, Jr., 6, and Jack, 4.

Laura K. Newby, MD, HS'87-'93, S'02, is an associate professor at Duke University Medical Center. She resides in Durham, N.C.

Lisa E. Adams-Mount, MD, HS'93-'95, practices geriatric medicine at North Strand Senior Health Center in Little River, S.C., where she resides with her husband, Bruce.

Stacy G. Fisher, MD, HS'94-'97, is director of women's cardiac services at Sinai Hospital in Baltimore, Md. Her husband, Stephen Fisher, MD, PhD, is completing a fellowship in orthopedics and surgery of the hand and upper extremity. They reside in Baltimore and have a two-year-old son, Michael.

2000s

Brian J. Malloy, MD, HS'94-'00, is a diplomate of the American Board of Urology. He currently enjoys flyfishing, upland gamebird hunting, camping, mountain biking, traveling, canoeing, and building a house. He and his wife, Joan, reside in Great Falls, Mont. They have two children, Bayley and Griff.

Jeffrey R. Bytomski, MD, HS'01-Current, recently completed a primary care and sports medicine fellowship and passed the CAQ exam for sports medicine. He has three children, Jarek, Trevor, and Alexandria. He lives in Durham, N.C.

Julian C. Lentz, Jr., T'38, MD'42, of Fayetteville, N.C., died on October 26, 2002. After graduating from medical school, he served in World War II in the Army Medical Corps. He established a medical practice in Maryville, Tenn., where he specialized in internal medicine with an emphasis in cardiology. During his career, he served as president of the AMA Rural Health Council. He eventually moved to Fayetteville, N.C., where he worked as chief of staff at the VA Hospital. He is survived by his wife, Dean; two daughters, Jane and Fran; one son, Jay; one sister, Mary; and 12 grandchildren.

James M. San, T'42, MD'44, of Tampa, Fla., died on December 26, 2002. A U.S. Army captain, he served as a medical officer until 1947. Tampa's fourth pediatrician, he opened his practice in 1949, where he developed a reputation as an expert on childhood poisoning. He practiced until his retirement in 1990. He was a charter member and past president of the Florida Pediatric Society and past president of the American Academy of Pediatrics. He is survived by four children; three granddaughters; and a twin sister.

Frederick H. Taylor, Sr., MD'45, of Saint Simons Island, Ga., died on April 1, 2002. He was widely recognized for his research in tuberculosis and gained national attention with Paul Sanger, MD, and Giles LePage, MD, for pioneering the development of an artificial Orlon artery, a discovery still used in heart surgeries. Prior to entering medical school,

he served as a naval officer, and he was a veteran of World War II. During his career, he worked as a thoracic surgeon at Carolinas Medical Center, Presbyterian Hospital, University Memorial Hospital, and Mercy Hospital in Charlotte, N.C. He founded the Children's Heart Clinic in Charlotte, N.C., and was a member of the Board of Trustees of Mercy Hospital. He also held membership in several professional associations, including the American College of Surgeons; the Society of Thoracic Surgeons; the American Association of Thoracic Surgery; and the Southern Surgical Association. He is survived by his wife of 20 years, Kathryn; two sisters; one daughter; two sons; and five grandchildren.

L. Howard Williams, T'47, MD'51, of Richmond, Va., died on December 28, 2002. He practiced obstetrics and gynecology in Richmond for 40 years. It was estimated that he had delivered more than 10,000 babies. He was also an assistant clinical professor of obstetrics and gynecology at Virginia Commonwealth University's Medical College. In 1962, he won a Republican seat in Virginia's 3rd District. He also served as a diplomate of the American Board of Obstetrics and Gynecology and was a member of the Medical College of Virginia Hospital Authority Board. He is survived by his wife, Eloise; four sons, Roger, Steve, David, and Van; one brother, Harold, and a sister, Tollie.

Bernard F. Fetter, MD'44, HS'51-'53, Davison Club, of Durham, N.C., died on

November 5, 2002. A professor emeritus of pathology, he served on the Duke faculty from 1955 until 1991. He was a member of several professional organizations, including the American Association of Pathologists and Bacteriologists, the American Academy of Dermatology, and the American Society of Clinical Pathologists. He was a former chair of the Section on Pathology of the North Carolina Society of Pathologists. In 1983, he received the Distinguished Teaching Award from Duke Medical Alumni Association. He is survived by his wife, Ann; a son, Richard; two daughters, Kathryn and Mary; two sons-in-law; five grandchildren; and one great-grandchild.

James B. Berry, MD'50, of Garden City, S.C., died on January 13, 2003. He practiced medicine for more than 50 years in Marion County, where he was senior physician at the Marion Medical Group. A former Marion County Citizen of the Year, he helped to start the county's first school for LPNs. He was a lifelong member of the Methodist Church and was active in efforts to serve the mentally retarded. He served as vice president of the South Carolina Association for Retarded Children and was a member of the State Commission of Mental Retardation. He was also a member of the Marion County Board of Education and the Marion County Vocational School Board. He is survived by his wife, Anne; three sons, James, Thomas, and Allen; two sisters, Rachel and Mary; and four grandchildren.

John T. Dees, MD'52, died on February 7, 2003. At the time of his death, he was serving as president of the North Carolina Medical Board, which licenses and disciplines 32,000 doctors, physician assistants and nurse practitioners. During his career, he was a family practice physician in his native Burgaw, N.C., for nearly 40 years. He served as chief of staff at Pender Memorial Hospital and medical director of the Pender County Health Department and Pender County Prison System. He was very active in the local community, including chairing the hospital board of trustees. Pender County has twice recognized Dees with the Distinguished Service Award. In 1956, he received the North Carolina Community Man of the Year Award and in 1964, he was presented North Carolina's highest honor, the Order of the Long Leaf Pine. In October of 2002, he was presented the Distinguished Alumnus Award from Duke University Medical Alumni Association. He is survived by his wife, Jenny; four children, Fred, Alicia, Tyler, and Richard; and seven grandchildren.

Joseph L. McGerity, T'50, MD'54, of San Rafael, Calif., died on October 25, 2002. He was a retired colonel of the U.S. Army. After retiring from the military in 1978, he became a clinical professor of allergy at the University of California at San Francisco, and later served on the clinical faculty at Stanford University for more than 20 years. He was a member of the American Academy of Allergy and Immunology

and past president of the Allergy, Asthma, and Immunology Foundation Board of northern California. He is survived by his wife, Lily; two daughters, Kate and Mary; one step-daughter, Debbie; one step-son, Gary; and one sister, Marilu.

Archibald C. Magee, MD, HS'55-'56, died on October 9, 2002. He resided in Washington, N.C.

Daniel M. Jacobs, Jr., MD'59, of Jacksonville, Fla., died on August 26, 2002. During his career, he served on the staffs of Humphreys Memorial Hospital, Riverside Hospital, St. Vincent's Medical Center, and the VA Outpatient Clinic. He was a member of the Florida Medical Association and the Duval County Medical Society. He is survived by his partner, David; mother, Mary; two sisters, Mary Ann and Patricia; and many nieces, nephews, and cousins.

Maurice A. Lesage, MD, HS'56-'59, of Chapel Hill, N.C., died on January 27, 2003, following an extended illness. A native of Paris, France, he received his medical degree from the University of Paris and began his career as a general practitioner after completing his residency at Duke. During World War II, he was a member of the Resistance during the occupation of Paris, treating patients underground. In the late 1950s, he was on staff at Duke as a researcher in cardiac and thoracic surgery and practiced general surgery in Roxboro, N.C.
