Chairman

February 14, 1972

Dear Sir:

The American Association of Physicians Assistants has been formed recently to comply with the urgent need to coordinate and properly structure the activities of this newest, rapidly growing member of the American Health Care delivery team - the Physician's Assistant.

The form and function of the AAPA is described in the attached advance pre-print copy of the new AAPA Brochure.

Will you help us make the AAPA an effective organization by posting the enclosed Flyer describing the AAPA on the hospital employee bulletin board and with it a copy of the AAPA Brochure? Your assistance is greatly appreciated.

Cordially,

Paul F. Palace

P.S. Would you please forward the attached copies of this letter to:

Chief of Medicine
Chief of Surgery
